Generational Intelligence Simon Biggs 2013-10-31 The question of communication and understanding between different generations is emerging as a key issue for the twenty-first century. The advent of ageing populations may lead to increased conflict or solidarity in society, and provokes a profound ambivalence both in public and in the private sphere. In a new approach, Biggs and Lowenstein offer a critical examination of Generational Intelligence as one way of addressing these issues. How easy is it to put yourself in the shoes of someone of a different age group? What are the personal, interpersonal and social factors that affect our perceptions of the 'age other'? What are the key issues facing families, workplaces and communities in an ageing society? This book sets out a way of thinking about interpersonal relations based on age, and the question of communication between people of different ages and generations. The book challenges existing orthodoxies for relations between adults of different ages and draws out steps that can be taken to increase understanding between generational groups. The authors outline a series of steps that can be taken to enhance Generational Intelligence, examine existing theories and social issues, and suggest new directions for sustainable relations between generational groups.

Aging in America Lawrence R. Samuel 2017-01-31 Aging is a preoccupation shared by beauty bloggers, serious journalists, scientists, doctors, celebrities—arguably all of adult America, given the pervasiveness of the crusade against it in popular culture and the media. We take our youth-oriented culture as a given but, as Lawrence R. Samuel argues, this was not always the case. Old age was revered in early

America, in part because it was so rare. Indeed, it was not until the 1960s, according to Samuel, that the story of aging in America became the one we are most familiar with today: aging is a disease that science will one day cure, and in the meantime, signs of aging should be prevented, masked, and treated as a source of shame. By tracing the story of aging in the United States over the course of the last half century, Samuel vividly demonstrates the ways in which getting older tangibly contradicts the prevailing social values and attitudes of our youth-obsessed culture. As a result, tens of millions of adults approaching their sixties and seventies in this decade do not know how to age, as they were never prepared to do so. Despite recent trends that suggest a more positive outlook, getting old is still viewed in terms of physical and cognitive decline, resulting in discrimination in the workplace and marginalization in social life. Samuels concludes *Aging in America* by exhorting his fellow baby boomers to use their economic clout and sheer numbers to change the narrative of aging in America.

Contemporary Adulthood Jeffrey S. Turner 1989

Lesbian, Gay, Bisexual, and Transgender Aging Douglas C. Kimmel 2006 This volume fills a unique gap. Gerontologists seldom focus on special concerns of gay and lesbian older adults, lesbian, gay, bisexual, and transgender aging organizations rarely address issues of aging, and the mental health field has demonstrated an ability to marginalize both aging and homosexuality. This book lays out the state of knowledge with respect to lesbian, gay, bisexual, and transgender aging—physical health, sexuality, family ties, victimization, and legal and financial concerns. The references at the

end of individual chapters and the bibliographical material at the end of the book provide an invaluable resource. For any gerontologist intrigued by the interplay of historical changes and individual aging, it is difficult to imagine a more powerful example than Lesbian, Gay, Bisexual, and Transgender Aging. Evolution of attitudes toward homosexuality, the emergence of HIV/AIDS, and legal protections beginning to be afforded to same-sex relationships are all part of the changing world that has shaped and been shaped by lesbian, gay, bisexual, and transgender individuals who are now old.

Successful Aging Sheung-Tak Cheng

2015-01-26 This book brings together state-of-the-art research on successful aging in Asian populations and highlights how the factors that contribute to successful aging differ from those in the West. It examines the differences between the Asian and Western contexts in which the aging process unfolds, including cultural values, lifestyles, physical environments and family structures. In addition, it examines the question of how to add quality to longer years of life. Specifically, it looks at ways to promote health, preserve cognition, maximize functioning with social support and maintain emotional well-being despite inevitable declines and losses. Compared to other parts of the world, Asia will age more quickly as a result of the rapid socioeconomic developments leading to rising longevity and historically low fertility rates in some countries. These demographic forces in vast populations such as China are expected to make Asia the main driver of global aging in the coming decades. As a result, researchers, professionals, policymakers, as well as the commercial sector, in both East and West, are increasingly interested in gaining a deeper understanding of aging in Asia.

Old Age and the Search for Security Carole Haber 1993-12-22 "Haber and Gratton lay to rest many conventional assumptions concerning the place of older persons in American history." - Choice "Haber and Gratton's meaty little book does more than provide an intelligent synthesis of existing old-age history; its new interpretations, insights, and shifts of emphasis will provoke responses and help move historians' work away from the now threadbare original disputes in the field toward new questions and approaches." -- American Historical Review "Indeed, Haber and Gratton give us a refreshingly multidimensional history of the shift

in old-age security from work, assets, or children to government annuities." -- Contemporary Sociology "... the history of old age has finally come of age. The authors successfully synthesize the best of the earlier social and cultural studies with new empirical evidence and recent findings of economic historians." -- Journal of Economic History "A truly 'revisionary' interpretation of the cultural and structural forces that shaped the elderly's lives from the colonial period to the present. Lucid and controversial, [it] is bound to be widely cited and hotly contested." -- W. Andrew Achenbaum

This social history of the American elderly offers a provocative new view of aging in the United States. It revises traditional assumptions about the economic status of the old and challenges the long-held contention that industrialization destroyed family relationships.

Aging and the Religious Dimension Susan A. Eisenhandler 1994-02-17 Aging and religion has been badly neglected in the field of Gerontology. This book, containing 13 chapters of original theory and research, is devoted to understanding the place that religion and spirituality hold in the lives of elderly persons. The authors, each experts in their own field, approach this issue from their backgrounds in the social sciences and the humanities. Overall this is a ground-breaking collection: It is one of the first attempts to seek to understand the role that religion plays in the lives of elderly persons. Based on their various multi-disciplinary perspectives, the authors make use of a variety of qualitative and quantitative methodologies as well as personal narrative and literature to grapple with this issue. Finally, the book is unique in that it addresses scholars and students, including the educated layman, rather than the professional alone.
