Beatrix Potter Linda Lear
2008-03-04 Peter Rabbit, Mr. McGregor, and many other Beatrix Potter characters remain in the hearts of millions. However, though Potter is a household name around the world, few know

the woman behind the illustrations. Her personal life, including a romantic relationship with her publisher, Norman Warne, and her significant achievements outside of children's literature remain largely unknown. In Linda Lear's enchanting new

biography, we get the life story of this incredible, funny, and independent woman. As one of the first female naturalists in the world, Potter brought the beauty and importance of nature back into the imagination at a time when plunder was more popular than preservation. Through her art she sought to encourage conservation and change the world. With never before seen illustrations and intimate detail, Lear goes beyond our perennial fascination with Potter as a writer and illustrator of children's books, and delves deeply into the life of a most unusual and gifted woman--one whose art was timeless, and whose generosity left an indelible imprint on the countryside.

Flying Cloud David W. Shaw
2009-10-13 *Flying Cloud* is the riveting and thoroughly researched tale of a truly unforgettable sea voyage during the days of the California gold rush. In 1851, navigator Eleanor Creesy set sail on the maiden voyage of the clipper ship *Flying Cloud*,

traveling from New York to San Francisco in only 89 days. This swift passage set a world record that went unbroken for more than a century. Upon arrival in San Francisco, *Flying Cloud* became an enduring symbol of a young nation's daring frontier spirit.

Illustrated with original maps and charts as well as historical photographs, Shaw's compelling narrative captures the drama of this thrilling adventure. In a position almost unheard of for a woman in the mid-19th century, Eleanor Creesy served as the ship's navigator. With only the sun, planets, and stars to guide her, she brought *Flying Cloud* safely around Cape Horn at the height of a winter blizzard, faced storms, dodged shoals, and found her way through calms to make the swift passage possible. Along with her husband, Josiah, the ship's captain, she sailed the mighty 3-masted clipper through 16,000 miles of the fiercest, most unpredictable oceans in the world. Shaw vividly recreates 19th-century

seafaring conditions and customs, for both the crew and the passengers who entrusted their fate to an untested ship. Including excerpts from letters and diaries of passengers, Shaw recounts Flying Cloud's victory in the face of adversity—including sabotage, insubordination, and severe damage to the clipper's mainmast that might have sunk her with all hands lost. But the ship triumphed and would ultimately sail the world. Flying Cloud brings to life, for the first time, the glory of one of America's most important seafaring tales and one woman's incredible achievements.

Shoot the Widow Meryle

Secret 2011-06-08 The first rule of biography, wrote Justin Kaplan: "Shoot the widow." In her new book, Meryle Secret, acclaimed biographer

("Knowing, sympathetic and entertainingly droll"—The New

York Times), writes about her comic triumphs and misadventures as a biographer in search of her nine celebrated subjects, about how the hunt for a “life” is like working one’s way through a maze, full of fall starts, dead ends, and occasional clear passages leading to the next part of the puzzle. She writes about her first book, a life of Romaine Brooks, and how she was led to Nice and given invaluable letters by her subject’s heir that were slid across the table, one at a time; how she was led to the villa of Brooks’ lover, Gabriele d’Annunzio (poet, playwright, and aviator), a fantastic mausoleum left untouched since the moment of his death seventy years before; to a small English village, where she uncovered a lost Romaine Brooks painting; and finally, to 20, rue Jacob, Paris, where Romaine’s lover, Natalie Barney, had fifty years before entertained Cocteau, Gide, Proust, Colette, and others. Secret describes how her next book—a life of

Berenson—prompted Francis Steegmuller, fellow biographer, to comment that he wouldn’t touch the subject with a ten-foot pole. For her life of British art historian Kenneth Clark, Secret was given permission to write the book by her subject, who surreptitiously financed it in the hopes of controlling its contents; we see how Clark’s plan was foiled by a jealous mistress and a stash of love letters that helped Secret navigate Clark’s obstacle course. Among the other biographical (mis)adventures, Secret reveals: how she tracked Salvador Dalí to a hospital room, found him recovering from serious burns sustained in a mysterious fire, and learned that he was knee-deep in a scandal involving fake drawings and prints and surrounded by dangerous characters out of Murder, Inc. . . . and how she went in search of a subject’s grave (Frank Lloyd Wright’s) only to find that his body had been dug up to satisfy the whim of his last wife. A fascinating account of a

life spent in sometimes arduous, sometimes comical, always exciting pursuit of the truth about other lives.

The Coffin Trail Martin Edwards 2011-09-30 "...a beautifully-evoked sense of the Lake District and an interesting and diverse group of characters. Martin Edwards got plenty of kudos for his Harry Devlin series, and he should get even more for this one. His DCI Hannah Scarlett is a fine creation." —Peter Robinson, New York Times

bestselling author Oxford historian and TV personality Daniel Kind and his new lover, Miranda, both want to escape to a new life. On impulse they buy Tarn Cottage in Brackdale, an idyllic valley in the Lake District that Daniel knew as a boy, a place so remote that the dead had to be carried out over the peaks on pack animals along the ancient Coffin Trail. Tarn Cottage was once home to Barrie Gilpin, an autistic youth suspected of a savage murder. A young woman visitor to the valley had been found laid out on the Sacrifice Stone, an ancient pagan site up on the fell. Barrie fell to his death near the crime scene before he could be questioned. All these years later, Daniel retains his belief in Barrie's innocence and questions his own policeman father's handling of the case. When DCI Hannah Scarlett and her squad launch a cold case review, Brackdale's skeletons begin to rattle. The wild geography of the Lakes District plays against local literary references, all backdrop to the lives of villagers and outsiders

drawn to this beautiful spot—but for what reasons? The Coffin Trail launches a new series by a master British hand.

With Love from the Inside

Angela Pisel 2016-08-09 Angela

Pisel's poignant debut explores the complex relationship between a mother and a daughter, and their quest to discover the truth and whether or not love can prevail—even from behind bars. Grace Bradshaw knows the exact minute she will die. On death row for murdering her infant

son, her last breath will be taken on February 15 at 12:01 a.m. Eleven years, five months, and twenty-seven days separate her from the last time she heard her precious daughter's voice and the final moment she'd heard anyone call her Mom. Out of appeals, she can focus on only one thing—reconnecting with her daughter and making sure she knows the truth. Secrets lurk behind Sophie Logan's big house and even bigger bank account. Every day when she kisses her husband good-bye, she worries her fabricated life is about to come crumbling down. No one knows the unforgivable things her mother did to tear her family apart—not her husband, who is a prominent plastic surgeon, or her "synthetic" friends who live in her upscale neighborhood. Grace's looming execution date forces Sophie to revisit the traumatic events that haunted her childhood. When she returns to her hometown, she discovers new evidence about her baby brother William's death seventeen years

ago—proof that might set her mother free but shatter her marriage forever. Sophie must quickly decide if her mother is the monster the prosecutor made her out to be or the loving mother she remembers—the one who painted her toenails glittery pink and plastered Post-it notes with inspiring quotes (“100 percent failure rate if you don't try”) all over Sophie's bathroom mirror—before their time runs out.

The Book of Why Judea Pearl
2018-05-15 A pioneer of artificial intelligence shows how the study of causality revolutionized science and the world 'Correlation does not imply causation.' This mantra was invoked by scientists for decades in order to avoid taking positions as to whether one thing caused another, such as smoking and cancer and carbon dioxide and global warming. But today, that taboo is dead. The causal revolution, sparked by world-renowned computer scientist Judea Pearl and his colleagues, has cut through a century of confusion

and placed cause and effect on a firm scientific basis. Now, Pearl and science journalist Dana Mackenzie explain causal thinking to general readers for the first time, showing how it allows us to explore the world that is and the worlds that could have been. It is the essence of human and artificial intelligence. And just as Pearl's discoveries have enabled machines to think better, *The Book of Why* explains how we can think better.

Country Life 1972

Paedofaith Rich Lusk
2005-05-04 "At what point is it reasonable to suggest that a covenant child has faith? When she can articulate the gospel? When he can explain the concept of justification? Only after they have gone through an extended period where faith is tested and proven to be real faith? Or is the capacity for faith directly linked to a certain age or level of maturity? The Scriptures indicates that we can be confident that our children have faith from the womb and that we can expect that faith to flower and bloom

throughout their life by God's grace. Cornelius Van Til wrote about his experience growing up in a Christian home-'Though there were no tropical showers of revivals, the relative humidity was always very high ... I was conditioned in the most thorough fashion. I could not help believing in God-in the God of Christianity-in the God of the Bible!' What is the nature of such faith? From where does it come and what do the Scriptures have to say about it? How can anyone say that an infant has the capacity for faith? In this book, Rich Lusk answers these questions and more, giving hope to Christian parents that their little ones do indeed belong to Christ and have the capacity to trust Him"--Back cover.

Original Blessing Danielle Shroyer 2016-11-01 Of the world's three major religions, only Christianity holds to a doctrine of original sin. Ideas are powerful, and they shape who we are and who we become. The fact that many Christians believe there is something in human nature that is, and will always be, contrary to God, is not just a problem but a tragedy. So why do the doctrine's assumptions of human nature so infiltrate

our pulpits, sermons, and theological bookshelves? How is it so misconstrued in times of grief, pastoral care, and personal shame? How did we fall so far from God's original blessing in the garden to this pervasive belief in humanity's innate inability to do good? In this book, Danielle Shroyer takes readers through an overview of the historical development of the doctrine, pointing out important missteps and overcalculations, and providing alternative ways to approach often-used Scriptures. Throughout, she brings the primary claims of original sin to their untenable (and unbiblical) conclusions. In *Original Blessing*, she shows not only how we got this doctrine wrong, but how we can put sin back in its rightful place: in a broader context of redemption and the blessing of humanity's creation in the image of God.

Using Research Instruments

Peter Birmingham 2003-12-08

Clear, accessible and practical, this guide introduces the first-

time researcher to the various instruments used in social research. It assesses a broad range of research instruments - from the well-established to the innovative - enabling readers to decide which are particularly well suited to their research.

The book covers:

questionnaires interviews
content analysis focus groups
observation researching the things people say and do. This book is particularly suitable for work-based and undergraduate researchers in education, social policy and social work, nursing and business administration. It draws numerous examples from actual research projects, which readers can adapt for their own purposes. Written in a fresh and jargon-free style, the book assumes no prior knowledge and is firmly rooted in the authors' own extensive research experience. Using Research Instruments is the ideal companion volume to The Researcher's Toolkit. Together they offer a superb practical introduction to conducting a social research project.
