The Destructive Element Lyndsey Stonebridge 2018-10-24 Freud's account of the sublimated drives at work beneath the surfaces of advanced societies, alongside the modernist fictions of Joyce, Proust, Kafka, Woolf and others, both reflected and inaugurated a strain of modernism preoccupied with the darkest elements of the human psyche. In *The Destructive Element* Lyndsey Stonebridge examines the career and legacy of British psychoanalyst Melanie Klein as a lens through which to examine the 20th century's fascination with death drives, the sublimation of civilization's discontents and the socialization of children--fascinations that would surface throughout the cultural production of the West. At once cultural history and psychoanalytic theory, and a bold reformulation of the legacies of modernism, *The Destructive Element* is an essential contribution to our understanding of the Western tradition.

Contemporary Perspectives on Rhetoric Sonja K. Foss 2014-04-04 The anniversary edition marks thirty years of offering an indispensable review and analysis of thinkers who have exerted a profound influence on contemporary rhetorical theory: I. A. Richards, Ernesto Grassi, Chaïm Perelman and Lucie Olbrechts-Tyteca, Stephen Toulmin, Richard Weaver, Kenneth Burke, Jürgen Habermas, bell hooks, Jean Baudrillard, and Michel Foucault.

The brief biographical sketches locate the theorists in time and place, showing how life experiences influenced perspectives on rhetorical thought. The concise explanations of complex concepts are clear, engaging, insightful, and highly accessible, serving as an excellent primer for reading the major works of these scholars. The critical commentary is carefully chosen to highlight implications and to place the theories within a broader rhetorical context. Each chapter ends with a complete bibliography of works by the theorists.

Contemporary Composition Studies Edith Babin 1999-12-30 Composition studies is a rapidly growing and constantly changing field. At present, however, graduate students new to the field and writing teachers who want to make new connections between theory and practice have little choice of current reference works that define key terms in composition studies and provide information about the scholars and researchers who have shaped and are shaping the discipline. This book supplies this information in an easily accessible format and places both scholars and terms in the context of the field's development. Included are alphabetically arranged entries for 108 individuals who have developed the field and 128 terms central to the discipline. The first part of the book provides entries for leaders in composition studies. Each entry identifies the

areas in which the scholar has contributed most influentially to the field and provides both a chronological overview of the person's contributions and a bibliography of representative works. The second part includes entries for terms that are problematic both for newcomers and for those already familiar with the discipline. The entries for the terms show how the disciplinary context has shaped the ways in which they have been used. The entries also indicate how established thinkers in composition studies and other disciplines have explained or defined the terms, provide examples of the terms in context, and list scholars often associated with them. An appendix includes entries for scholars from other disciplines who have contributed to the field.

Rhetoric, Modality, Modernity Nancy S. Struever 2011-08-22 Since antiquity, philosophy and rhetoric have traditionally been cast as rivals, with the former often lauded as a search for logical truth and the latter usually disparaged as empty speech. But in this erudite intellectual history, Nancy S. Struever stakes out a claim for rhetoric as the more productive form of inquiry. Struever views rhetoric through the lens of modality, arguing that rhetoric's guiding interest in what is possible - - as opposed to philosophy's concern with what is necessary - - makes it an ideal tool for understanding politics. Innovative readings of Hobbes and Vico allow her to reexamine rhetoric's role in the history of modernity and to make fascinating connections between thinkers from the classical, early modern, and modern periods. From there she turns to Walter Benjamin, reclaiming him as an exemplar of modernist rhetoric and a central figure in the long history of the form. Persuasive and perceptive, *Rhetoric, Modality, Modernity* is a novel rewriting of the history of rhetoric and a heady examination of the motives, issues, and flaws of contemporary inquiry.

A Counter-history of Composition Byron Hawk 2007 Contests the assumption that vitalism and contemporary rhetoric represent opposing, disconnected poles in the writing tradition. Vitalism has been historically linked to expressivism and dismissed as innate and unteachable, whereas rhetoric is seen as a rational, teachable method for producing

argumentative texts. Hawk calls for the reexamination of current pedagogies to incorporate vitalism and complexity theory and argues for their application in the environments where students write and think today.

Richards on Rhetoric I. A. Richards 1991-06-13 Bringing together essays that span the career of I.A. Richards—as both literary critic and pedagogue—this collection provides a much-needed re-introduction to a thinker whose works have been largely neglected of late. Carefully chosen, edited, and annotated, the selections make accessible a wide array of Richards's ideas on language and learning, focusing on his discussion of literacy, his critique of positivist linguistics, his explorations of C.S. Peirce's semiotics, and his theory of translation, which led not only to his well-known analysis of the structure and foundation of metaphor but to one of the earliest and most cogent formulations of reader-response theory. Berthoff's editing eliminates the distracting elements of Richards's style—the digressions and obscure allusions that have often hindered readers, and have in part contributed to the neglect his work has met with in recent years—while identifying and illuminating the chief principles of his critical thought and practice. Organized in four parts—Practical Criticism, The Philosophy of Rhetoric, The Meaning of Meaning, and Design for Escape—the book offers a lucid introduction to Richards's writings, with valuable headnotes to each section and a unique index of "speculative instruments" that examines the principal ideas Richards thought with. Readers are certain to find this volume essential to an understanding of Richards's "practical criticism," and invaluable in sharpening and re-directing their own thoughts on current linguistic practice, literary criticism, and educational theory.

Encyclopedia of Rhetoric and Composition Theresa Enos 2011-04-06 This reference guide surveys the field, covering rhetoric's principles, concepts, applications, practical tools, and major thinkers. Drawing on the scholarship and expertise of 288 contributors, the *Encyclopedia* presents a long-needed overview of rhetoric and its role in contemporary education and communications, discusses rhetoric's contributions to various fields, surveys the

applications of this versatile discipline to the teaching of English and language arts, and illustrates its usefulness in all kinds of discourse, argument, and exchange of ideas. □

McLuhan: A Guide for the Perplexed W.

Terrence Gordon 2010-02-25 Marshall McLuhan was dubbed a media guru when he came to prominence in the 1960s. The Woodstock generation found him cool; their parents found him perplexing. By 1963, McLuhan was Director of the Centre for Culture and Technology at the University of Toronto and would be a public intellectual on the international stage for more than a decade, then linked forever to his two best known coinages: the global village and the medium is the message. Taken as a whole, McLuhan's writings reveal a profound coherence and illuminate his unifying vision for the study of language, literature, and culture, grounded in the broad understanding of any medium or technology as an extension of the human body. *McLuhan: A Guide for the Perplexed* is a close reading of all of his work with a focus on tracing the systematic development of his thought. The overriding objective is to clarify all of McLuhan's thinking, to consolidate it in a fashion which prevents misreading, and to open the way to advancing his own program: ensuring that the world does not sleepwalk into the twenty-first century with nineteenth-century perceptions.

Philosophy, Rhetoric, Literary Criticism Gary A. Olson 1994 Gary A. Olson presents six in-depth interviews with internationally prominent scholars outside of the discipline and twelve response essays written by noted rhetoric and composition scholars on subjects related to language, rhetoric, writing, philosophy, feminism, and literary criticism. The interviews are with philosopher of language Donald Davidson, literary critic and critical legal studies scholar Stanley Fish, cultural studies and African American studies scholar bell hooks, internationally renowned deconstructionist J. Hillis Miller, feminist literary critic Jane Tompkins, and British logician and philosopher of science Stephen Toulmin. Susan Wells and Reed Way Dasenbrock provide distinctly divergent assessments of the application of Donald Davidson's language theory to rhetoric and composition, and especially to writing pedagogy. Patricia Bizzell and John Trimbur

explore how Stanley Fish's neopragmatism might be useful both to composition theory and to literacy education. And Joyce Irene Middleton and Tom Fox discuss bell hooks's notions of how race and gender affect pedagogy. In two frank and sometimes angry responses, Patricia Harkin and Jasper Neel take J. Hillis Miller to task for seeming to support rhetoric and composition while continuing to maintain the political status quo. Similarly, Susan C. Jarratt and Elizabeth A. Flynn express skepticism about Jane Tompkins's vocal support of composition and of radical pedagogy particularly. And Arabella Lyon and C. Jan Swearingen analyze Stephen Toulmin's thoughts on argumentation and postmodernism. Internationally respected anthropologist Clifford Geertz provides a foreword; literacy expert Patricia Bizzell contributes an introduction to the text; and noted reader-response critic David Bleich supplies critical commentary. This book is a follow-up to the editor's (Inter)views: Cross-Disciplinary Perspectives on Rhetoric and Literacy, already a major work of scholarship in the field.

The Power of Words David S. Kaufer 2004-02-04 Over the past several years, David Kaufer and his colleagues have developed a software program for analyzing writing (DocuScope). This book illustrates the concepts and rhetorical theory behind the software analysis, examining patterns in writing and showing writers how their writing works in different categories to accomplish varying objectives.

The Mysterious Barricades Ann E. Berthoff 1999-01-01 *The Mysterious Barricades* criticizes the misconceptions of post-structuralism and then moves on to the reclamation of criticism as a philosophical activity concerned with how words work.

Rhetoric and the New Testament Stanley E. Porter 1993-10-01 What role did classical rhetoric play in the writing of the New Testament? What role does classical and modern rhetoric play in interpreting the New Testament today? What role should classical and modern rhetoric play in New Testament interpretation? These and related questions are asked in this collection of over twenty essays originally delivered as papers at the 1992 Heidelberg Conference on Rhetorical Criticism of Biblical Documents. This conference, the first of several

scheduled to address fundamental rhetorical issues of increasing importance in New Testament study, drew scholars from three continents and over fourteen countries, making it a truly international scholarly event and this a truly cosmopolitan publication. The authors' varying contexts resulted in a lively and challenging discussion well reflected in this volume's essays. The first part discusses rhetoric in the light of extended interpretation of a variety of New Testament texts. Luke and Acts, most of Paul's letters, and other New Testament documents are scrutinized using various rhetorical categories. In the second part, questions of rhetoric and methodology are raised. New approaches are tested in a number of essays that push the boundaries of traditional rhetorical study. These essays provide an excellent sampling of some of the major work being done in rhetorical study of the New Testament and suggest several avenues for future research.

Science, Democracy, and Curriculum

Studies John A. Weaver 2018-08-30 In this book John A. Weaver suggests curriculum studies scholars need to engage more in science matters. It offers a review of science studies writing from Ludwick Fleck and Thomas Kuhn to Philip Mirowski. The volume includes chapters on the rhetoric of science with a focus on the history of rhetoric and economics then on the rhetoric of models, statistics, and data, a critique of neoliberalism and its impact on science policy and the foundations of democracy, Harry Collin's and Robert Evans' theory of expertise followed by chapters on feminism with a focus on the work of Sharon Traweek, Karen Barad, and Vinciane Despret, postcolonial thought, with attention paid to the work of Daniela Bleichmar, Londa Schiebinger, Judith Carney, Sylvia Wynter, Paul Gilroy, and Sandra Harding, and a final chapter on Nietzsche's philosophy of science. Each section is introduced by an interlude drawing on autobiographical connections between curriculum studies and science studies.

The Constructivist Moment Barrett Watten 2010-03-01 Winner of the American Comparative Literature Association's Rene Wellek Prize (2004) As one of the founding poets and editors of the Language School of poetry and one of its

central theorists, Barrett Watten has consistently challenged the boundaries of literature and art. In *The Constructivist Moment*, he offers a series of theoretically informed and textually sensitive readings that advance a revisionist account of the avant-garde through the methodologies of cultural studies. His major topics include American modernist and postmodern poetics, Soviet constructivist and post-Soviet literature and art, Fordism and Detroit techno—each proposed as exemplary of the social construction of aesthetic and cultural forms. His book is a full-scale attempt to place the linguistic turn of critical theory and the self-reflexive foregrounding of language by the avant-garde since the Russian Formalists in relation to the cultural politics of postcolonial studies, feminism, and race theory. As such, it will provide a crucial revisionist perspective within modernist and avant-garde studies.

The Handbook of Communication History

Peter Simonson 2013-01-03 *The Handbook of Communication History* addresses central ideas, social practices, and media of communication as they have developed across time, cultures, and world geographical regions. It attends to both the varieties of communication in world history and the historical investigation of those forms in communication and media studies. The Handbook editors view communication as encompassing patterns, processes, and performances of social interaction, symbolic production, material exchange, institutional formation, social praxis, and discourse. As such, the history of communication cuts across social, cultural, intellectual, political, technological, institutional, and economic history. The volume examines the history of communication history; the history of ideas of communication; the history of communication media; and the history of the field of communication. Readers will

explore the history of the object under consideration (relevant practices, media, and ideas), review its manifestations in different regions and cultures (comparative dimensions), and orient toward current thinking and historical research on the topic (current state of the field). As a whole, the volume gathers disparate strands of communication history into one volume, offering an accessible and panoramic view of the development of communication over time and geographical places, and providing a catalyst to further work in communication history.

Rational Rhetoric David J. Tietge 2008-07-09
David J. Tietge examines the place and influence of scientific discourse in the popular consciousness of contemporary American society, offering critical strategies for recognizing, decoding, and understanding scientific language as it is used by both scientific and a-scientific agents and agencies.

Public Relations, Cooperation, and Justice
Charles Marsh 2017-04-21 Modern approaches to public relations cluster into three camps along a continuum: conflict-oriented egoism, e.g. forms of contingency theory that focus almost exclusively on the wellbeing of an entity; redressed egoism, e.g. subsidies to redress PR's egoistic nature; and forms of self-interested cooperation, e.g. fully functioning society theory. *Public Relations, Cooperation, and Justice* draws upon interdisciplinary research from evolutionary biology, philosophy, and rhetoric to establish that relationships built on cooperation and justice are more productive than those built on conflict and egoistic competition. Just as important, this innovative book shuns normative, utopian appeals, offering instead only empirical, materialistic evidence for its conclusions. This is a powerful, multidisciplinary, and well-documented analysis, including specific strategies for the enactment of PR as a quest for cooperation and justice, which aligns the discipline of public relations with basic human nature. It will be of interest to scholars and advanced students of public relations and communication ethics.

Rhetoric in Ancient China, Fifth to Third Century B.C.E Xing Lu 2022-03-10 Xing Lu examines

language, art, persuasion, and argumentation in ancient China and offers a detailed and authentic account of ancient Chinese rhetorical theories and practices within the society's philosophical, political, cultural, and linguistic contexts. She focuses on the works of five schools of thought and ten well-known Chinese thinkers from Confucius to Han Feizi to the the Later Mohists. Lu identifies seven key Chinese terms pertaining to speech, language, persuasion, and argumentation as they appeared in these original texts, selecting *ming bian* as the linchpin for the Chinese conceptual term of rhetorical studies. Lu compares Chinese rhetorical perspectives with those of the ancient Greeks, illustrating that the Greeks and the Chinese shared a view of rhetoric as an ethical enterprise and of speech as a rational and psychological activity. The two traditions differed, however, in their rhetorical education, sense of rationality, perceptions of the role of language, approach to the treatment and study of rhetoric, and expression of emotions. Lu also links ancient Chinese rhetorical perspectives with contemporary Chinese interpersonal and political communication behavior and offers suggestions for a multicultural rhetoric that recognizes both culturally specific and transcultural elements of human communication.

Victoria Welby and the Science of Signs Susan Petrilli 2017-09-08 Victoria Welby (1837-1912) dedicated her research to the relationship between signs and values. She exchanged ideas with important exponents of the language and sign sciences, such as Charles S. Peirce and Charles S. Ogden. She examined themes she believed crucially important both in the use of signs and in reflection on signs. But Welby's research can also be understood in ideal dialogue with authors she could never have met in real life, such as Mikhail Bakhtin, Susanne Langer, and Genevieve Vaughan. Welby contends that signifying cannot be constrained to any one system, type of sign, language, field of discourse, or area of experience. On the contrary, it is ever more developed, enhanced, and rigorous, the more it develops across different fields, disciplines, and areas of experience. For example, to understand meaning, Welby evidences the advantage of translating it into another word even from the

same language or resorting to metaphor to express what would otherwise be difficult to conceive. Welby aims for full awareness of the expressive potential of signifying resources. Her reflections make an important contribution to problems connected with communication, expression, interpretation, translation, and creativity.

The Topological Imagination Angus Fletcher
2016-04-04 In a bold and boundary defining work, Angus Fletcher clears a space for an intellectual encounter with the shape of human imagining. Joining literature and topology—a branch of mathematics—he maps the ways the imagination's contours are formed by the spherical earth's patterns and cycles, and shows how the world we inhabit also inhabits us.

Academic Constraints in Rhetorical Criticism of the New Testament J. David Hester Amador 1999-01-01 Rhetorical criticism promised to bring New Testament studies into a new era that approached the Bible as a document of persuasive discourse. Major proponents of this approach suggested that its potential lies in its democratization of biblical interpretation. To date, that promise has never been fulfilled. The reasons can be found by exploring the rhetoric of these rhetorical critics. Such an exploration uncovers systems of disciplinary constraints and discursive habits that keep rhetoric firmly within traditional units of academic biblical interpretation. The promise of rhetoric can only be fulfilled by shattering all notions of a rhetorical 'programme' of biblical interpretation.

Evaluating Adam Smith William Henderson 2006-10-16 Adam Smith is well recognized as the forefather of modern economics, but his success can be attributed not only to what he wrote but also to his use of language. In this exciting new book, Willie Henderson shows how Smith engaged creatively in writing about the economy, and analyzes the extent to which he tried to ensure that the reader is drawn into the text and informed by it. Demonstrating analysis methods that are helpful to new researchers on Smith's works, Evaluating Adam Smith sets his work in the cultural context of the eighteenth century and explores the lexical and conceptual inter-relations between Smith and the sources

he consulted. Issues explored include Smith's use of irony and his work in the context of wealth, virtue and happiness as presented in the *Moral Sentiments and the Wealth of Nations*. Henderson's informative study employs the literary techniques of close reading and close textual analysis and applies them to sustained passages of Smith's writing.

The Rhetorical Poetics of the Middle Ages

Robert O. Payne 2000 "How does one understand and manipulate figurative language? How does one evoke and harness emotion constructively? And how does one recall while revivifying the ambiguous compositions of earlier poets in different traditions for an immediate audience and for projected future audiences? In postmodern terms, these questions for the medieval poet invite scholarly attention to heteroglossia, stylistic polyphony, and the orchestration of various levels of figurative language."--BOOK JACKET.

The Humane Vision of Wendell Berry Mark Mitchell 2014-04-08 A striking contribution to the conversation that is conservatism Wendell Berry—poet, novelist, essayist, critic, farmer—has won the admiration of Americans from all walks of life and from across the political spectrum. His writings treat an extraordinary range of subjects, including politics, economics, ecology, farming, work, marriage, religion, and education. But as this enlightening new book shows, such diverse writings are united by a humane vision that finds its inspiration in the great moral and literary tradition of the West. In *The Humane Vision of Wendell Berry*, Mark T. Mitchell and Nathan Schlueter bring together a distinguished roster of writers to critically engage Berry's ideas. The volume features original contributions from Rod Dreher, Anthony Esolen, Allan Carlson, Richard Gamble, Jason Peters, Anne Husted Burleigh, Patrick J. Deneen, Caleb Stegall, Luke Schlueter, Matt Bonzo, Michael Stevens, D. G. Hart, Mark

Shiffman, and William Edmund Fahey, as well as a classic piece by Wallace Stegner. Together, these authors situation Berry's ideas within the larger context of conservative thought. His vision stands for reality in all its facets and against all reductive "isms"—for intellect against intellectualism, individuality against individualism, community against communitarianism, liberty against libertarianism. Wendell Berry calls his readers to live lives of gratitude, responsibility, friendship, and love— notions that, as this important new book makes clear, should be at the heart of a thoughtful and coherent conservatism.

Voices from the Middle Kathleen F. Malu 2010-10-01 The need for continued research at the middle level is clear and urgent. The previous volumes in this Handbook series testify to this urgency. While quantitative studies continue to be essential, there is a critical need to understand the complexities of the middle level community. One way to capture the rich, diverse mosaic of the voices and experiences of middle level participants and stakeholders is to use narrative inquiry methodology. The intent of this volume in *The Handbook* is to give voice to and broaden our understanding of the wide variety of participants and stakeholders who weave through the middle level. Such participants and stakeholders may include middle level teachers, school psychologists and counselors, students, parents, administrators, middle level researchers, research foundations, and community groups. In addition to hearing directly from these groups, this volume will focus on the intricate webs, connections and questions that these narratives hold and frame them within current middle level research, theory, and practice. Ultimately this volume will highlight the nuance, diversity and future directions that research may need to explore.

Investigating the Origin of the Asteroids and Early Findings on Vesta Clifford J. Cunningham 2017-09-20 This book assesses the origin of asteroids by analyzing the discovery of Vesta in 1807. Wilhelm Olbers, who discovered Vesta, suggested that the asteroids were the result of a primordial planet's explosion. Cunningham studies that idea in detail through the writings of Sir David Brewster in Scotland, the era's most prolific writer about the asteroids. He also

examines the link between meteorites and asteroids, revealing a synergy between Ernst Chladni, Romantic symbolism, and the music of the spheres. Vesta was a lightning rod for controversy throughout the nineteenth century with observers arguing over its size and color, and the astounding notion that it was self-luminous. It was also a major force for change, as new methods in the field of celestial mechanics were developed to study the orbital perturbations it is subject to. A large selection of private correspondence and scientific papers complete the first comprehensive historical study of Vesta ever published. With a synoptic look at the four asteroids, Ceres, Pallas, Juno and Vesta, Cunningham provides a valuable resource on asteroid origins and explains how they were integrated into the newly revealed solar system of the early nineteenth century.

Notes and Queries 1994

Theorizing Composition Mary Kennedy 1998-06-25 The last 25 years have witnessed extraordinary growth in the academic specialization variously described as composition studies or rhetoric and composition. What was noticeable about the field in its infancy was a preoccupation with practice, a lack of emphasis on theory, and an exclusive reliance on the writing process. As its disciplinary status has grown, the field has become far more theoretical. Composition studies has expanded its focus, reconceptualized the writing process, and embraced a wide range of critical perspectives. The result of this change is that terms such as poststructuralism, social

construction, gender, and genre, which were largely unknown in 1965, now dominate discussion. This reference book is a guide to the multiplicity of theories that have emerged to form the disciplinary foundation of composition studies. The volume consists of 66 entries, each of which is written by an expert contributor and focuses on a particular theory or group of theories. While the entries show how various individuals have contributed to theoretical movements, very few concentrate on the work of a single theorist. Each entry first provides a critical summary of a particular theory or group of theories, including key elements, basic concepts and claims, and information about seminal or particularly influential works. It then reviews the theory's critical reception in composition studies and discusses its significance in the field. The bibliography at the end of each entry lists primary texts and major scholarship related to the theory and provides additional suggestions for further reading. The volume closes with a selected bibliography of important works.

Intentions Arabella Lyon 2004-06-11 The relationship between an author's and an audience's intentions is complex but need not preclude mutual engagement. This philosophical investigation challenges existing literary and rhetorical perspectives on intention and offers a new framework for understanding the negotiation of meaning. It describes how an audience's intentions affect their interpretations, shows how audiences negotiate meaning when faced with a writer's undecipherable intentions, and defines the scope of understanding within rhetorical situations. Introducing a concept of intention into literary analysis that supersedes existing rhetorical theory, Arabella Lyon shows how the rhetorics of I. A. Richards, Wayne Booth, and Stanley Fish, as well as the hermeneutics of Hans-Georg Gadamer, fail to account for the complex interactions of author and audience. Using Kenneth Burke's concepts of form, motive, and purpose, she builds a more complex notion of intention than those usually found in literary studies, then employs her theory to describe how philosophers read Wittgenstein's narratives, metaphors, and reversals in argument. Lyon argues that our differences in intention prevent consistency in

interpretations but do not stop our discussions, deliberations, and actions. She seeks to acknowledge difference and the communicative problems it creates while demonstrating that difference is normal and does not end our engagement with each other. Intentions combines recent work in philosophy, literary criticism, hermeneutics, and rhetoric in a highly imaginative way to construct a theory of intention for a postmodern rhetoric. It recovers and renovates central concepts in rhetorical theory&—not only intention but also deliberation, politics, and judgment.

Coleridge's Dejection Ode J.C.C. Mays

2019-01-22 Coleridge's Dejection Ode completes J.C.C. Mays' analysis of Coleridge's poetry, following Coleridge's Ancient Mariner (Palgrave 2016) and Coleridge's Experimental Poetics (Palgrave 2013). "Dejection: An Ode" stands alone in Coleridge's oeuvre: written at a time of personal crisis, it reaches far back and deeply into his thinking in an attempt to find a poetic solution to ideas and problems he had mulled over for a long time. Mays reveals how the poem also marks the opening of the second half of Coleridge's career as both poet and thinker. In three central chapters Mays examines the new style that evolved in the process of writing the Ode: the technical means of metrics, rhyme and grammar; language and allusion; and symbol and structure. He recounts the complex, sometimes controversial critical history of the Ode, and suggests an editorial solution to the problem created by the Letter to Sara Hutchinson; re-evaluates the position of Wordsworth in the poem apropos the political statement it makes; clarifies the distinction between the views on Imagination expressed and those contained in Biographia Literaria; and traces the links of the concept "dejection" as it underpins Coleridge's late poems.
