**The Boundary Riders** Joan Phipson 1962 Having finished their inspection of the boundary fence in good time, Bobby, Jane and Vincent decide to do some exploring on foot. They gradually become lost, almost die of exposure and hunger, eventually find shelter at an isolated farmhouse only to discover that it is slowly being hemmed in by rising floodwaters.

**The Adult Rider** Sarah Montague 2009-05-16 Sarah Montague's *The Adult Rider* describes everything you need to know if you are interested in introducing (or reintroducing) horses to your life. The book begins with a thorough description of all equestrian disciplines—from Western (barrel racing, reining, cutting, penning) to English (show jumping, dressage, eventing) and so much more! You might try endurance riding, in which you and your equine partner hit the trails for miles, or maybe you've considered polo, a sport gaining popularity in the United States and creating opportunities for eager beginners. Perhaps you love horses, but aren't so sure you want to ride—Montague will introduce you to the thrill of driving, the artistry of in-hand competitions, and the joys of miniature horses. Whichever discipline you consider, the author takes you step by step through the process, from choosing a stable (what to look for in an instructor and in a barn) to picking out your new riding clothes (you need only a helmet and sturdy shoes to start, but there's a world of apparel and accessories once you're hooked). Do you think you might want to buy a horse

someday? *The Adult Rider* describes this process as well, but also introduces you to other alternatives—like leasing, a month-to-month arrangement that lets you see how a horse fits into your life in both time and money before you make a commitment. *The Adult Rider* recognizes that we are not the same as the resilient kids who fearlessly hop their pony over a fence for that very first time. Montague discusses what makes adults mentally and physically different, and how to overcome these challenges. In the chapter "The View from the Other Side of the Arena," Montague interviews several riding instructors on the difference between teaching kids and adults and the ways in which adults learn differently. All in all, the point is to have fun and *The Adult Rider* provides you with the know-how to jump into the horse world with both eyes open.

**Louisiana Rambles** Ian McNulty 2011 "McNulty delivers an inimitable take on Cajun and Creole Louisiana--the siren call of zydeco dancehalls pulsing in the country darkness; of crawfish "boiling points" and traditional country smokehouses; of Cajun jam sessions, where even wallflowers are compelled to dance; of equine gambits in the cradle of jockeys; and of fishing trips where anyone can land impressive catches. In south Louisiana, distilled European heritage, the African American experience, and modern southern exuberance mix with tumultuous history and fantastically fecund natural environments. The territories McNulty opens to the reader are arguably the nation's most exotic and culturally distinct destinations"--Page 4 of cover.

**Dark Water** Robert Clark 2008-10-07 Birthplace of Michelangelo and home to untold masterpieces, Florence is a city for art lovers. But on November 4, 1966, the rising waters of the Arno threatened to erase over seven centuries of history and human achievement. Now Robert Clark explores the Italian city's greatest flood and its aftermath through the voices of its witnesses. Two American artists waded through the devastated beauty; a photographer stows away on an army helicopter to witness the tragedy first-hand; a British "mud angel" spends a month scraping mold from the world's masterpieces; and, through it all, an author asks why art matters so very much to us, even in the face of overwhelming disaster.

**Essentials of Economics** James D Gwartney 2014-05-10 Essentials of Economics, Second Edition is a text intended for a one-term course in economics for college students. It attempts to teach students of the analytic way of studying economics and provides the basics of the concept of political economy and uses this knowledge to explain the choice process in the public sector. The book presents a comprehensive survey of economics. It contains chapters that highlight the importance of the microincentive structure of macroeconomic markets; identifies the determinants of supply, as well as the impact of public policy on those determinants; and presents both adaptive and rational expectations theory. The linkage between production theory and the cost curves faced by the firm; examination of the market structure; and the role of regulation and deregulation are covered as well. Economics students will find the book very useful.

**The Flood Between Us/The Heart of the Rodeo** Nicole Higginbotham-Hogue 2020-03-04 The Flood Between Us When a flood hits Grant's Landing, Jack is one of the first to respond by bringing her construction company to the town to rebuild houses. The town is suffering from lack of supplies, lack of business, and lack of housing, so members of the town are required to call in further assistance. Jill, a member of Hope's Integrity, decides to drive supplies to the small town, meeting the bruiting Jack who both challenges and excites her. The two women grow into each other's worlds despite the great differences that they have, but when conflicts from their pasts come to light, will they be able to stick together, or will the floods of differences that they have sweep them apart? The Heart of the Rodeo Blake Young is one of the best bull riders that Melville has seen in years. When she ends up falling off a bull during one of the biggest competitions of her career, she is placed in the hands of an in-home doctor, Dr. Jane Steibold and one of her worst fears, not being able to take care of herself. Blake and Jane clash at first, but as Blake gets used to the restrictions of her new lifestyle, she begins to realize that having Jane in her life might be just what she needed all along.

**Clumsy Floodplains** Dr Thomas Hartmann 2012-11-28 Extreme floods cause enormous damage in floodplains, which levees cannot prevent. Therefore, it is vital for spatial planning to provide space for water retention in these areas. Land use planners, water management agencies, landowners, and policymakers all agree on this challenge, but attempts to make the space for rivers to provide retention are generally not very successful. Adopting an innovative interdisciplinary approach, this book examines how society can manage the use of the floodplains along rivers in the face of extreme floods, focusing in particular on the relation between social arrangements and the elemental forces of floods. The book firstly analyses why contemporary floodplain management is so often clumsy and ineffective by looking at various real-life situations in Germany, using Cultural Theory to provide a much-needed, but previously neglected social perspective. These analyses show a pattern of activity resulting from different rationalities which dominate the floodplains in different phases. During extreme floods, it is rational to manage floodplains as dangerous areas; sandbags and disaster management dominate the scene. After some time, the rationality

of control takes over the floodplain management; policymakers discuss flood risk and water managers build levees. When public attention diminishes, floodplains become inconspicuous until more and more stakeholders regard floodplains as profitable land. The current system of planning, law, and property rights even encourages stakeholders to act out their plural rationalities. A permanent dynamic imbalance of different rationalities leads to a robust social construction of the floodplains which results in viable but clumsy floodplains. In the course of time, however, the patterns of activity in the floodplains lead to an increase in intensity and frequency of extreme floods, and to more vulnerable potential damages in the floodplains. Risk increases. Coping with this situation needs another kind of floodplain management. This book proposes an innovative concept - Large Areas for Temporary Emergency Retention (LATER) - in "Clumsy Floodplains" as an alternative to levee-based flood protection. The concept aims at reducing damage by extreme floods in a catchment area by inundating less valuable areas to protect places that are more valuable. It finally examines how this LATER concept might be implemented in areas where there is currently a clumsy style of floodplain management, what interventions are required and how these might come about effectively. Again, using Cultural Theory, the book puts forward a valuable land policy solution which aims at implementing LATER in clumsy floodplains and which develops an obligatory insurance against natural hazards as a responsive land policy for LATER. The book represents the author's PhD research, which he conducted as research assistant at the department for Land Policy, Land Management and Municipal Geoinformation at the School of Spatial Planning, TU Dortmund University, Germany.
