"Beautifully written and incredibly funny. . . I fell in love with Eleanor; I think you will fall in love, too!" —Reese Witherspoon  
Smart, warm, uplifting, the story of an out-of-the-ordinary heroine whose deadpan weirdness and unconscious wit make for an irresistible journey as she realizes the only way to survive is to open her heart. No one's ever told Eleanor that life should be better than fine. Meet Eleanor Oliphant: She struggles with appropriate social skills and tends to say exactly what she's thinking. Nothing is missing in her carefully timetabled life of avoiding social interactions, where weekends are punctuated by frozen pizza, vodka, and phone chats with Mummy. But everything changes when Eleanor meets Raymond, the bumbling and deeply unhygienic IT guy from her office. When she and Raymond together save Sammy, an elderly gentleman who has fallen on the sidewalk, the three become the kinds of friends who rescue one another from the lives of isolation they have each been living. And it is Raymond's big heart that will ultimately help Eleanor find the way to repair her own profoundly damaged one.

The Digital Transformation of Logistics Mac Sullivan 2021-03-30 The

digital transformation is in full swing and fundamentally changes how we live, work, and communicate with each other. From retail to finance, many industries see an inflow of new technologies, disruption through innovative platform business models, and employees struggling to cope with the significant shifts occurring. This Fourth Industrial Revolution is predicted to also transform Logistics and Supply Chain Management, with delivery systems becoming automated, smart networks created everywhere, and data being collected and analyzed universally. The Digital Transformation of Logistics: Demystifying Impacts of the Fourth Industrial Revolution provides a holistic overview of this vital subject clouded by buzz, hype, and misinformation. The book is divided into three themed-sections: Technologies such as self-driving cars or virtual reality are not only electrifying science fiction lovers anymore, but are also increasingly presented as cure-all remedies to supply chain challenges. In The Digital Transformation of Logistics: Demystifying Impacts of the Fourth Industrial Revolution, the authors peel back the layers of excitement that have grown around new technologies such as the Internet of Things (IoT), 3D printing, Robotic Process Automation (RPA), Blockchain or Cloud computing, and show use cases that give a glimpse about the fascinating future we can expect. Platforms that allow businesses to centrally acquire and manage their logistics services disrupt an industry that has been relationship-based for centuries. The authors discuss smart contracts, which are one of the most exciting applications of Blockchain, Software as a Service (SaaS) offerings for freight procurement, where numerous data sources can be integrated and decision-making processes automated, and marine terminal operating systems as an integral node for shipments. In The Digital Transformation of Logistics: Demystifying Impacts of the Fourth Industrial Revolution, insights are shared into the cold chain industry where companies respond to increasing quality demands, and how European governments are innovatively responding to challenges of cross-border eCommerce. People are a vital element of the digital transformation and must be on board to drive change. The Digital Transformation of Logistics: Demystifying Impacts of the Fourth

Industrial Revolution explains how executives can create sustainable impact and how competencies can be managed in the digital age - especially for sales executives who require urgent upskilling to remain relevant. Best practices are shared for organizational culture change, drawing on studies among senior leaders from the US, Singapore, Thailand, and Australia, and for managing strategic alliances with logistics service providers to offset risks and create cross-functional, cross-company transparency. The Digital Transformation of Logistics: Demystifying Impacts of the Fourth Industrial Revolution provides realistic insights, a ready-to-use knowledge base, and a working vocabulary about current activities and emerging trends of the Logistics industry. Intended readers are supply chain professionals working for manufacturing, trading, and freight forwarding companies as well as students and all interested parties.

*Case Studies in Ecotourism* Ralf Buckley 2003-01-01 As a counterpart to the growing volume of more theoretical literature in ecotourism, this volume presents a global compilation and analysis of over 170 real-life case studies in ecotourism, selected after an extensive screening process. It includes ecotours on land and sea, ecolodges and resorts, private reserves and public parks. The case studies range from the world's best models to test cases, small and large, unique to representative. Data has been drawn from independent audits by the author and others, as well as from published reports from universities,

multilateral and non-government organizations. The book shows what ecotourism can achieve, what constraints it faces, and provides a convenient and comprehensive reference for ecotourism enterprises, development agencies and university teaching.

*The Politics of Knowledge in Inclusive Development and Innovation* David Ludwig 2021-10-15 This book develops an integrated perspective on the practices and politics of making knowledge work in inclusive development and innovation. While debates about development and innovation commonly appeal to the authority of academic researchers, many current approaches emphasise the plurality of actors with relevant expertise for addressing livelihood challenges. Adopting an action-oriented and reflexive approach, this volume explores the variety of ways in which knowledge works, paying particular attention to dilemmas and controversies. The six parts of the book address the complex interplay of knowledge and politics, starting with the need for knowledge integration in the first part and decolonial perspectives on the politics of knowledge integration in the second part. The following three parts focus on the practices of inclusive development and innovation through three major themes of learning for transformative change, evidence, and digitisation. The final part of the book addresses the governance of knowledge and innovation in the light of political struggles about inclusivity. Exploring conceptual and practical themes through case studies from the Global North and South, this book will be of great interest to students, scholars, and practitioners researching and working in development studies, epistemology, innovation studies, science and technology studies, and sustainability studies more broadly.

**Extremely Loud & Incredibly Close** Jonathan Safran Foer 2005  
Jonathan Safran Foer emerged as one of the most original writers of his

generation with his best-selling debut novel, *Everything Is Illuminated*. Now, with humor, tenderness, and awe, he confronts the traumas of our recent history. What he discovers is solace in that most human quality, imagination. Meet Oskar Schell, an inventor, Francophile, tambourine player, Shakespearean actor, jeweler, pacifist, correspondent with Stephen Hawking and Ringo Starr. He is nine years old. And he is on an urgent, secret search through the five boroughs of New York. His mission is to find the lock that fits a mysterious key belonging to his father, who died in the World Trade Center on 9/11. An inspired innocent, Oskar is alternately endearing, exasperating, and hilarious as he careens from Central Park to Coney Island to Harlem on his search. Along the way he is always dreaming up inventions to keep those he loves safe from harm. What about a birdseed shirt to let you fly away? What if you could actually hear everyone's heartbeat? His goal is hopeful, but the past speaks a loud warning in stories of those who've lost loved ones before. As Oskar roams New York, he encounters a motley assortment of humanity who are all survivors in their own way. He befriends a 103-year-old war reporter, a tour guide who never leaves the Empire State Building, and lovers enraptured or scorned. Ultimately, Oskar ends his journey where it began, at his father's grave. But now he is accompanied by the silent stranger who has been renting the spare room of his grandmother's apartment. They are there to dig up his father's empty coffin.

Python language and the powerful Keras library. Written by Keras creator and Google AI researcher François Chollet, this book builds your understanding through intuitive explanations and practical examples. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications. About the Technology Machine learning has made remarkable progress in recent years. We went from near-unusable speech and image recognition, to near-human accuracy. We went from machines that couldn't beat a serious Go player, to defeating a world champion. Behind this progress is deep learning—a combination of engineering advances, best practices, and theory that enables a wealth of previously impossible smart applications. About the Book Deep Learning with Python introduces the field of deep learning using the Python language and the powerful Keras library. Written by Keras creator and Google AI researcher François Chollet, this book builds your understanding through intuitive explanations and practical examples. You'll explore challenging concepts and practice with applications in computer vision, natural-language processing, and generative models. By the time you finish, you'll have the knowledge and hands-on skills to apply deep learning in your own projects. *International Handbook of Virtual Learning Environments* Joel Weiss 2007-11-24 The International Handbook of Virtual Learning Environments was developed to explore Virtual Learning Environments (VLE's), and their relationships with digital, in real life and virtual worlds. The book is divided into four sections: Foundations of Virtual Learning Environments; Schooling, Professional Learning and Knowledge Management; Out-of-School Learning Environments; and Challenges for Virtual Learning Environments. The coverage ranges across a broad spectrum of philosophical perspectives, historical, sociological, political and educational analyses, case studies from practical and research settings, as well as several provocative "classics" originally published in other settings.

*Lives of the Orange Men* Waldemar Fydrych 2014 Between 1981 and 1989 in Wroclaw Poland, in an atmosphere in which dissent was forbidden and martial law a reality, the art-activist Orange Alternative movement developed and deployed their 'socialist sur-realism' in absurd street-painting and large-scale performances comprising tens of thousands of people dressed as dwarves, in an effort to destabilize the Communist government. It worked. Beginning with the 'dialectical painting' of dwarves onto the patches of white paint all over the city's walls, which uncannily marked the censorship of opposition slogans, the group moved on to both stage happenings and over-enthusiastically embrace official Soviet festivals in a way that transformed both of these into mass expressions of dissent. They illegally restaged the mass spectacle of the storming of the Winter Palace on the anniversary of the October Revolution using their own homemade tanks; organized patriotic

gatherings in which anyone waving red flags or wearing red (or eating red borscht, or covering oneself in ketchup) was arrested; and inspired other Orange Alternative groups to appear across the country. Although the group existed to the left of the mainstream opposition of Solidarity, their art was a key, acknowledged factor in the overthrow of the Communist government. *Lives of the Orange Men* tells the story of the movement's main protagonists, and is the first stand-alone English-language account of the Orange Alternative, written autobiographically by its central figure, and featuring an appendix of newly-translated key texts including Major's 'Manifesto of Socialist Surrealism', a timeline of every Orange Alternative happening and a new foreword from the Yes Men.

MICRADS is an international forum for researchers and practitioners to present and discuss the most recent innovations, trends, results, experiences and concerns in the various areas of defense and security, together with their technological development and applications. The main topics covered are: Information and Communication Technology in Education; Computer Vision in Military Applications; Engineering Analysis and Signal Processing; Cybersecurity and Cyberdefense; Maritime Security and Safety; Strategy, Geopolitics and Oceanopolitics; Defense planning; Leadership (e-leadership); Defense Economics; Defense Logistics; Health Informatics in Military Applications; Simulation in Military Applications; Computer Networks, Mobility and Pervasive Systems; Military Marketing; Military Physical Training; Assistive Devices and Wearable Technology; Naval and Military Engineering; Weapons and Combat Systems; Operational

Oceanography. The book is aimed at all those dealing with defense and security issues, including practitioners, researchers and teachers as well as undergraduate, graduate, master's and doctorate students.

**Communicating Protected Areas** Wendy Goldstein 2004 Protected areas operate within complex ecological and social systems, presenting challenges that cannot be resolved by technical solution alone. Achieving the management objectives of protected areas requires a social approach in which strategic communication is a key instrument. This publication explores the often underestimated potential of communication, sharing valuable experiences from protected areas across the world, drawing on papers presented at the Vth IUCN World Parks Congress, 2003 and others.

Carbohydrate-Based Vaccines A. Krishna Prasad 2019-09-23 The past three decades have witnessed the development and regulatory approval of glycoconjugate vaccines against several medically important bacterial pathogens, including *Haemophilus influenzae* type b, *Streptococcus pneumoniae*, *Neisseria meningitidis*, and *Salmonella typhi*. Immunologic protection against these and many other bacterial diseases is mediated through opsonophagocytic antibodies directed against the surface carbohydrates that define the bacterial serogroup or serotype and serve as virulence factors. These vaccines are composed of bacterial capsular polysaccharides chemically conjugated to immunogenic carrier proteins. Given that the diseases caused by these bacterial pathogens are most pronounced in infants and young children, the development of the glycoconjugate vaccine technology has had a considerable impact on public health. Many of the chapters in this volume were assembled as a follow-up from a symposium entitled "Carbohydrate-Based Vaccines and Adjuvants" which took place at the 254th American Chemical Society National Meeting held in Washington, DC (August 2017). The symposium was sponsored by Pfizer and the Carbohydrate (CARB) and Biotechnology (BIOT) divisions. This book, therefore, reflects the importance of this field toward design, development, manufacture and licensure of the complex carbohydrate-based (glycoconjugate) vaccines. The book has been organized into thirteen chapters, which cover a

comprehensive landscape including the clinical history, design, development, chemistry, manufacturing and control (CMC) aspects, pre-clinical assays, adjuvants and the various approaches used to develop carbohydrate-based vaccines.

**Open-Source Electronics Platforms** Trung Dung Ngo 2019-05-20

Open-source electronics are becoming very popular, and are integrated with our daily educational and developmental activities. At present, the use open-source electronics for teaching science, technology, engineering, and mathematics (STEM) has become a global trend. Off-the-shelf embedded electronics such as Arduino- and Raspberry-compatible modules have been widely used for various applications, from do-it-yourself (DIY) to industrial projects. In addition to the growth of open-source software platforms, open-source electronics play an important role in narrowing the gap between prototyping and product development. Indeed, the technological and social impacts of open-source electronics in teaching, research, and innovation have been widely recognized.

**Psychiatry and Decolonisation in Uganda** Yolana Pringle 2018-12-06

This open access book investigates psychiatry in Uganda during the years of decolonisation. It examines the challenges facing a new generation of psychiatrists as they took over responsibility for psychiatry at the end of empire, and explores the ways psychiatric practices were tied to shifting political and development priorities, periods of instability, and a broader context of transnational and international exchange. At its heart is a question that has concerned psychiatrists globally since the mid-twentieth century: how to bridge the social and cultural gap between psychiatry and its patients? Bringing together archival research with oral histories, Yolana Pringle traces how this question came to dominate both national and international discussions on mental health care reform, including at the World Health Organization, and helped spur a culture of experimentation and creativity globally. As Pringle shows, however, the history of psychiatry during the years of decolonisation remained one of marginality, and ultimately, in the context of war and violence, the decolonisation of psychiatry was incomplete.

**The Lost City of Z** David Grann 2009-08-10 \*\*NOW A MAJOR FILM STARRING ROBERT PATTINSON, CHARLIE HUNNAM AND SIENNA MILLER\*\* 'A riveting, exciting and thoroughly compelling tale of adventure' JOHN GRISHAM The story of Colonel Percy Harrison Fawcett, the inspiration behind Conan Doyle's The Lost World Fawcett was among the last of a legendary breed of British explorers. For years he explored the Amazon and came to believe that its jungle concealed a large, complex civilization, like El Dorado. Obsessed with its discovery, he christened it the City of Z. In 1925, Fawcett headed into the wilderness with his son Jack, vowing to make history. They vanished without a trace. For the next eighty years, hordes of explorers plunged into the jungle, trying to find evidence of Fawcett's party or Z. Some died from disease and starvation; others simply disappeared. In this spellbinding true tale of lethal obsession, David Grann retraces the footsteps of Fawcett and his followers as he unravels one of the greatest mysteries of exploration. **Government of the Shadows** Eric Michael Wilson 2009-03-15 Leading scholars discuss ideology and hotly contested post-structuralist theory. [Global Guidelines for the Restoration of Degraded Forests and Landscapes in Drylands](#) Nora Berrahmouni 2015 "Drylands cover nearly half of the earth's land surface and are home to one-third of the global population. They face extraordinary challenges, including those posed by desertification, biodiversity loss, poverty, food insecurity and climate change. Up to 20 percent of the world's drylands are degraded, and people living there are often locked into a vicious circle of poverty, unsustainable practices and environmental degradation. It is clear that serious efforts are needed to arrest dryland degradation and restore degraded lands, and the simple but urgent aim of these guidelines is to support such efforts It is the first time that global guidelines on dryland restoration are made available. These guidelines target two main groups

- policymakers and other decision-makers, and practitioners - because both have the power to bring about positive change. While they should be tailored to suit regional and local contexts, they present the essential components for the design, implementation and sustainability of restoration initiatives that can help build ecological and social resilience and generate benefits for local livelihoods. As illustrated by the rich case studies provided, the guidelines involve a vast range of actions, from on-the-ground activities such as habitat protection, assisted natural regeneration, sand-dune stabilization and planting, to policy improvements, provision of financial incentives, capacity development, and continuous monitoring and learning. Moreover, they show that restoration needs to be considered across the entire market value chain, from seed to end-product, as well as at the landscape level, including the mosaic of land uses, needs and expectations of interest groups."-- Publisher's description.

**Practical Research** Paul D. Leedy 2013-07-30 For undergraduate or graduate courses that include planning, conducting, and evaluating research. A do-it-yourself, understand-it-yourself manual designed to help students understand the fundamental structure of research and the methodical process that leads to valid, reliable results. Written in uncommonly engaging and elegant prose, this text guides the reader, step-by-step, from the selection of a problem, through the process of conducting authentic research, to the preparation of a completed report, with practical suggestions based on a solid theoretical framework and sound pedagogy. Suitable as the core text in any introductory research course or even for self-instruction, this text will show students two things: 1) that quality research demands planning and design; and, 2) how their own research projects can be executed effectively and professionally.

Global Public Relations Alan R. Freitag 2009-01-13 This text provides a structured and practical framework for understanding the complexities
