India's Approach to Border Management Pushpita Das 2023-01-26

This book attempts to provide a comprehensive understanding of the circumstances which have shaped India's approach towards its international borders and the framework it has developed to better manage its borders. The book argues that persistence of various cross-border threats and challenges and an absence of robust intra-regional trade among its neighbouring countries forced India to employ a security-centric and unilateral approach to border management with emphasis on hardening the borders to cross-border trade and travel and keeping the border areas underdeveloped to act as a buffer against external conventional threats. Besides discussing the threats and challenges that India faces along the borders, the book aims to develop an understanding of India's border management practices by analysing various programmes and initiatives such as the raising of border guarding forces; building of physical and electronic fences; the establishment of modern facilities for smoothening legitimate cross-border travel; the development of the border areas through special programmes; and increasing trade and connectivity as well as other cooperative bilateral mechanisms. Veterans' Lament Oliver L. North 2020-10-06 What is happening to our country? This question is heard more and more frequently these days as Americans worry about the unrelenting attacks by so-called progressives on the foundation, core values, and history of our nation. Nobody is more concerned than those Americans who volunteered to serve in uniform and willingly put their lives on the line to protect the United States and all it represents. Based on interviews by the authors, this book explains why many of our American heroes believed in and loved our nation enough to go into harm's way to defend it, and why so many of them now question if America is still the country they fought for. More importantly, it asks—is America still worth fighting for?

Eurasia Without Borders Katerina Clark 2021-11-02 A long-awaited corrective to the controversial idea of world literature, from a major voice in the field. Katerina Clark charts interwar efforts by Soviet, European, and Asian leftist writers to create a Eurasian commons: a single cultural space that would overcome national, cultural, and linguistic differences in the name of an anticapitalist, anti-imperialist, and later antifascist aesthetic. At the heart of this story stands the

literary arm of the Communist International, or Comintern, anchored in Moscow but reaching Baku, Beijing, London, and parts in between. Its mission attracted diverse networks of writers who hailed from Turkey, Iran, India, and China, as well as the Soviet Union and Europe. Between 1919 and 1943, they sought to establish a new world literature to rival the capitalist republic of Western letters. Eurasia without Borders revises standard accounts of global twentieth-century literary movements. The Eurocentric discourse of world literature focuses on transatlantic interactions, largely omitting the international left and its Asian members. Meanwhile, postcolonial studies have overlooked the socialist-aligned world in favor of the clash between Western European imperialism and subaltern resistance. Clark provides the missing pieces, illuminating a distinctive literature that sought to fuse European and vernacular Asian traditions in the name of a post-imperialist culture. Socialist literary internationalism was not without serious problems, and at times it succumbed to an orientalist aesthetic that rivaled any coming from Europe. Its history is marked by both promise and tragedy. With clear-eyed honesty, Clark traces the limits, compromises, and achievements of an ambitious cultural collaboration whose resonances in later movements can no longer be ignored.

The Border Kingdom D. Nurkse 2018-06-05 From the award-winning poet: a powerful collection that explores the biblical past and the terrifying politics of the present, the legacy of fathers and the flawed kingdoms they leave their sons. Now in paperback. In "Ben Adan," a stunning poem in the opening sequence of the collection, we witness the drama between a captor and the prisoner commanded to dig his own grave ("perhaps in a moment / he will lift me up / and hold me trembling, / more scared than I / and more relieved"). "After a Bombing" examines children's drawings as deep symbolic reactions to 9/11. The subtly majestic "Lament for the Makers of Brooklyn" builds the poignant case for a lost world: "Where is Policastro the locksmith now?" the poet asks. "Half-blind, he wore two pairs of glasses / held together by duct tape, / . . . / afterward the key turned / for you but not for me." In exploring the small empires of human conflict, which expand in all directions, Nurkse

is attuned to the scraps of beauty or insight that marginal characters and corners of the world might offer up in the midst of moral darkness. With *The Border Kingdom*, he has given us a collection unfailingly rich in imagery, undaunted in subject and spirit.

Riding the back roads and rolling through small towns, the four riders experience the landscape and history of the region, and find life on the road doesn't always go smooth.

Showdown in the Sonoran Desert Ananda Rose 2012-05-01 This book offers reflections on a daunting and controversial ethical question: How should we treat the strangers who enter this country illegally? To understand the experience of those directly confronted by this problem, Ananda Rose traveled to the Sonoran desert at the border between the U.S. and Mexico. There she gathered opinions from Minutemen, Border Patrol agents, Catholic nuns, humanitarian air workers, left-wing protestors, ranchers, and other ordinary citizens in southern Arizona. She depicts the results of these interviews as two starkly opposed ideological perspectives: that of religious activists who embrace a biblically-inspired model of hospitality that stresses love of strangers and a "borderless" compassion; and that of law enforcement, which is concerned with safety, security, and strict respect for international borders.

The Dingoes' Lament John Bois 2018-11-01 The Dingoes reached the climax of their Australian success in 1974 with their self-titled LP and singles *Way Out West* and *Boy on the Run*. They were inducted in the ARIA Hall of Fame in 2009. This is the story of the Dingoes' one chance to make it big on the international stage. It is a rollicking road trip of five Aussie musicians travelling across the USA in preparation for their big break - supporting their stable-mates Lynyrd Skynyrd on a national tour. It is a story of making music, life in a band, but above all it is a yarn, in

the best Australian tradition, spun around true events and real characters.

Border Optics Camilla Fojas 2021-06-08 Examines how the US-Mexico border is seen through visual codes of surveillance When Donald Trump promised to “build a wall” on the U.S.-Mexico border, both supporters and opponents visualized a snaking barrier of concrete cleaving through nearly two thousand miles of arid desert. Though only 4 percent of the US population lives in proximity to the border, imagining what the wall would look like came easily to most Americans, in part because of how images of the border are reproduced and circulated for national audiences. *Border Optics* considers the US-Mexico border as one of the most visualized and imagined spaces in the US. As a place of continual crisis, permanent visibility, and territorial defense, the border is rendered as a layered visual space of policing—one that is seen from watchtowers, camera-mounted vehicles, helicopters, surveillance balloons, radar systems, unmanned aerial vehicles, and live streaming websites. It is also a space that is visualized across various forms and genres of media, from maps to geographical surveys, military strategic plans, illustrations, photographs, postcards, novels, film, and television, which combine fascination with the region with the visual codes of surveillance and survey. *Border Optics* elaborates on the expanded vision of the border as a consequence of the interface of militarism, technology, and media. Camilla Fojas describes how the perception of the viewing public is controlled through a booming security-industrial complex made up of entertainment media, local and federal police, prisons and detention centers, the aerospace industry, and all manner of security technology industries. The first study to examine visual codes of surveillance within an analysis of the history and culture of the border region, *Border Optics* is an innovative and groundbreaking examination of security cultures, race, gender, and colonialism.

Migration, Security, and Resistance Graham Hudson 2021-11-15 This volume explores the digitization, privatization, and spatial displacement of border security and the effects these have on political accountability and migrant rights. The governance of security and migration is unfolding in new political spaces. Cooperation and competition among immigration officials, border guards, transnational security corporations, IT companies, local police, and international organizations has decoupled migration governance from national political structures. The chapters in the volume examine how these dynamics affect the deployment and constraint of sovereign power in the United States, Canada, the United Kingdom, and the EU. Contributors trace this process from the disciplinary perspectives of law, political science, sociology, criminology, and geography. Part I of the book explores the reconfiguration of security and migration governance through historical processes of privatization, digitization, and the rescaling of border control technologies to local and global spaces. Part II explores how migrant rights actors have responded by rescaling resistance to global and local levels. This book will be of much interest to students of critical security studies, global governance, migration studies, and international relations.

Borderline Americans Katherine Benton-Cohen 2011-03-04 “Are you an American, or are you not?” This was the question Harry Wheeler, sheriff of Cochise County, Arizona, used to choose his targets in one of the most remarkable vigilante actions ever carried out on U.S. soil. And this is the question at the heart of Katherine Benton-Cohen’s provocative

history, which ties that seemingly remote corner of the country to one of America's central concerns: the historical creation of racial boundaries. It was in Cochise County that the Earps and Clantons fought, Geronimo surrendered, and Wheeler led the infamous Bisbee Deportation, and it is where private militias patrol for undocumented migrants today. These dramatic events animate the rich story of the Arizona borderlands, where people of nearly every nationality—drawn by “free” land or by jobs in the copper mines—grappled with questions of race and national identity. Benton-Cohen explores the daily lives and shifting racial boundaries between groups as disparate as Apache resistance fighters, Chinese merchants, Mexican-American homesteaders, Midwestern dry farmers, Mormon polygamists, Serbian miners, New York mine managers, and Anglo women reformers. Racial categories once blurry grew sharper as industrial mining dominated the region. Ideas about home, family, work and wages, manhood and womanhood all shaped how people thought about race. Mexicans were legally white, but were they suitable marriage partners for “Americans”? Why were Italian miners described as living “as no white man can”? By showing the multiple possibilities for racial meanings in America, Benton-Cohen's insightful and informative work challenges our assumptions about race and national identity.

Separated by the Border Gena Thomas 2019-10-29 Gena Thomas tells the story of five-year-old Julia, whose harrowing journey with her mother from Honduras to the United States took her from cargo trailer to detention center to foster care. Weaving together the stories of birth mother and foster mother, this book shows the human face of the immigrant and refugee, the challenges of the immigration and foster care systems, and the tenacious power of motherly love.

Water Conflicts Mark Zeitoun 2020 "Our ambition with this book is that it helps transform at least a few inter-state water conflicts, by providing a lucid way to understand and to address their complex nature. The need for clarity is urgent, if researchers and analysts are to assist all those who are caught up in, and suffer from, water conflicts. While we wrote this book, mothers in Aleppo dodged snipers' bullets as they collected

water for their children - just as so many mothers before them did, in Jenin in 2002, Sarajevo in 1994, Beirut in 1985, Leningrad in 1943, and Warsaw in 1944 and 1914. Explosive weaponry, designed to penetrate eighteen-inch thick concrete bunkers, ripped through the zinc roofs of several water treatment plants in Iraq; drinking water channels were demolished in Dombass; cholera spread through wastewater in Yemen, and superbugs mutated in the wastewater in Gaza. In most cases, the repair crews who risked their lives to supply clean water were denied access or shot at. The Bolivian Lake Poopó dried up as we were finishing the first draft of our early chapters. Caused by unregulated abstractions for agriculture and mining, this catastrophe evidences our collective inability to adequately manage human need for food and minerals, and human greed for money. However, it seems we have not learnt lessons from our past mistakes - rather we appear intent on repeating them. Lake Poopó has now joined the well-documented graveyard water bodies of Lake Urmia, Lake Tulare, the Oglala (or Ogallala) and Ceylanpinar Aquifers and the Dead Sea (and others counting). Each of these is an example of how tensions generated in the political and economic systems that run our lives can devastate our relationship and reliance upon the natural environment. Cambodia's Tonlé Sap Lake - not to mention millions of its fish and thousands of local fishermen - is currently at risk because of upstream dams in Laos, Thailand and China (see Box Matthews). The likely outcome is that the monsoon-driven flood-pulse of the river is contained to such an extent that the Mekong river no longer washes back into the lake when it reaches the sea. This is a stark example of a worrying global trend, resulting from extensive construction of large dams building despite public-private-civil society consensus on their destructive downsides. Sea-land nutrients, which sea-to-river fish rely upon (most famously, salmon), have been virtually eliminated - with global nutrient flow standing at only 4% of historic levels. According to WWF, freshwater species' populations declined by 81% from 1970-2012, with an average annual decline of 3.9%"--

Framing Borders Ian Kalman 2021-03-01 Framing Borders addresses a

fundamental disjuncture between scholastic portrayals of settler colonialism and what actually takes place in Akwesasne Territory, the largest Indigenous cross-border community in Canada. Whereas most existing portrayals of Indigenous nationalism emphasize border crossing as a site of conflict between officers and Indigenous nationalists, in this book Ian Kalman observes a much more diverse range of interactions, from conflict to banality to joking and camaraderie. *Framing Borders* explores how border crossing represents a conversation where different actors "frame" themselves, the law, and the space that they occupy in diverse ways. Written in accessible, lively prose, Kalman addresses what goes on when border officers and Akwesasne residents meet, and what these exchanges tell us about the relationship between Indigenous actors and public servants in Canada. This book provides an ethnographic examination of the experiences of the border by Mohawk community members, the history of local border enforcement, and the paradoxes, self-contradictions, and confusions that underlie the border and its enforcement.

Border Games Peter Andreas 2022-10-15 In this third edition of *Border Games*, Peter Andreas charts the rise and transformation in policing the flow of drugs and migrants across the US-Mexico border. Recent border crackdowns and wall-building campaigns, he argues, are not unprecedented. Rather, they are the outcome of an escalatory dynamic already in motion—but now played out on a far bigger stage, with higher stakes, and in new security and political contexts. Focusing on the power of symbolic politics and policy feedback effects, Andreas traces the logic behind such buildup. Border policing is an attractive political mechanism for handling the often unintended consequences of past policy choices, signaling a commitment to territorial integrity and projecting an image of territorial authority. Yet its negative aftermath is not only frequently glossed over; it also fuels further escalation. With new chapters on the border policies of the Obama, Trump, and Biden administrations, *Border Games* continues to help readers grasp how the busiest border in the world is also one of the most fortified, and why it plays such a complicated and contentious role in both domestic politics and US-

Mexico relations.

Deforming American Political Thought Michael J. Shapiro 2016-02-19 *Deforming American Political Thought* offers an alternative to the dominant American historical imagination, treating issues that range from the nature of Thomas Jefferson's vision of an egalitarian nation to the persistence of racial inequality. Presenting multifaceted arguments that transcend the myopic scope of traditional political discourses, Michael J. Shapiro summons disparate disciplines and genres – architecture, crime stories, novels, films, and jazz/blues music (among others) to provide approaches to the comprehension of diverse facets of American political thought from the founding to the present. The book's various investigations disclose that there have always been dissenting voices, articulated in diverse genres of expression that cast doubt on the moral purpose and exceptionalism of the American mind. This highly anticipated updated second edition features a preface focusing on aesthetic theory and the contributions of artistic genres for political analysis, and a completely new chapter on critical thinking about the US western and urban encounters afforded by the two HBO series, *Deadwood* and *The Wire* respectively.

World Regional Geography Lydia Mihelic Pulsipher 2010-12-10 Like no other textbook, Pulsipher and Pulsipher's *World Regional Geography* puts a human face on the study of regional geography, showing how larger geographical forces affect the lives of individuals and communities around the globe. It's a refreshing, people-centered approach to the subject focusing on the stories of real people, global trends and interregional linkages, and contemporary topics that transcend regional borders (the war on terrorism, global political order, interregional trade, the global economy, popular culture, the environment, and the Internet). *Antaeus* 1973

Passive Revolution in West Bengal Ranabir Samaddar 2013-04-18 In the wake of the enormous interest across the globe in the fall of the Left Front in West Bengal, this book describes the Left era as one of passive

revolution: limited reforms and changes, big compromises, corruption of the commissars and the failure of the Left in assessing popular discontent and anger; thus, it is the end of revolution even in passive form. A collection of articles by Samaddar from leading national dailies and journals between 1977 and the downfall of the Left in West Bengal, this book analyses the era of the Left rule, its political decisions and its social and economic viability. Samaddar argues that the Left's rule and its own governmental style destroyed the hegemony it had built up through assiduous work of decades. A commentary on contemporary history and an assessment of it, this work helps the reader understand, better, the re-emergence of the Maoist movement in West Bengal, the governmental techniques of the Left and the dynamics of popular politics.

Covering the Border War Sang Hea Kil 2019-11-08 Covering the Border War: How the News Media Create Crime, Race, Nation, and the USA-Mexico Divide examines the notion of the body politic in border newspaper coverage of the USA-Mexico divide and how the nation and immigration are racially imagined in crime news discourse, where whiteness is associated with order and brownness is associated with disorder in a variety of imaginative, nativist ways. By applying critical discourse analysis methodology to the Los Angeles Times, Arizona Republic, Albuquerque Journal, and Houston Chronicle during a peak epoch of border militarization policies (1993-2006), brownness emerges through a news crime frame that reflexively shows the values and meanings of whiteness and the nation. At the body scale, border crossings threaten the whiteness of the national body through suggestions of rape and disfigurement. Border news discourse feminizes the nation with nurturing resources and services under threat of immigrant "rape" as well as expresses racial anxiety about a "changing face" of the nation. Border news coverage constructs immigrants as home intruders at the house scale, both human and animal. Whiteness at this scale reflexively signifies a law-abiding, rightful owner of property protecting against criminal trespassing. Brown immigrants are also seen as wild animals, which constructs whiteness burdened with the task of

animal management. Whiteness at the regional scale suggests a masculinized, militarized battleground or a settled region threatened by a brown, cataclysmic flood. Finally, the nation scale complements the body scale but in a more contemporary and scientific way. Whiteness reflects a body politic fighting the disease of cancer/immigration in two ways: with an imagined militaristic, immune system and with hi-tech, aggressive operations. This "diseased body politic" communicates whiteness and nativism about the border through discursive border symptoms and border operations that represent the intersection of immunology discourse, the racial construction of the body politic, and anxiety about postmodern economic transformation and its impact on national borders.

Voices of Lament Natasha Sistrunk Robinson 2022-09-20 Our culture wants you to be happy. It rewards those who smile through the pain, who pretend everything's fine, who compartmentalize grief and get on with life. But everything's not fine. And God does not expect us to pretend it is. He wants all of us--including our pain. Perhaps nowhere in Scripture do we get as full a picture of the heights and depths of the human experience as in the Psalms. The outpourings of emotion never shy away from the darkest moments of life, and yet they also point toward the light--toward the God in whom we place our hope. Inspired by Psalm 37, *Voices of Lament* is a powerful collection of reflections from Christian Women of Color on themes of injustice, heartache, and deep suffering. Their essays, prayers, poems, and liturgies lay bare the experiences of the oppressed even as they draw us into deeper intimacy with God and a more fulsome understanding of each other. For anyone who longs to better express and understand the beauty of lament held in holy tension

with hope and love, this extraordinary collection presents both well-known and new voices from various ethnic and people groups and different generations, putting God's faithfulness on full and glorious display.

The Victims at the Berlin Wall 1961-1989 Hans-Hermann Hertle 2011 In 'The Victims of the Berlin Wall, 1961-1989', authors Hans-Hermann Hertle and Maria Nooke reveal the stories of 136 victims of the Berlin Wall.

Collapsed Empires José M. Faraldo 2020-07 The Russian revolution of October 1917, born of the devastation of the Great War, exerted its influence around the globe. Its massive consequences shaped the Twentieth Century and are still with us. Taking 1917 as a point of departure, this book focus on the consequences of imperial and state collapse after 1917 in spatial and chronological dialogue. The contributors examine how profound institutional change created narratives and representations of national memories. They explore the nationalist movements that shaped the new countries and bring to life the communist activists who helped to transform the old world as a tragedy of terrible dimensions unfolded.

Counterterrorism Policies in Central Asia Mariya Y. Omelicheva 2010-09-13 During the last two decades, Central Asian states have witnessed an intense revival of Islamic faith. Along with its moderate and traditional forms, radical and militant Islam has infiltrated communities of Muslims in Central Asia. Alarmed by the border incursions, sporadic terrorist violence and religious anti-governmental campaigns, the leadership of all Central Asian states adopted extensive measures against radical Islam and intensified counterterrorism policies. This book examines the dangerous tendency of counterterrorism policies of the Central Asian states to grow more alike amid propensities for divergence and attributes this trend to the impact of the social context in which these states operate. It underscores the importance of international setting that shapes governments' perceptions of terrorism and their counterterrorism policies. Applying a comprehensive theoretical framework, which integrates different mechanisms of international

influences on state behaviour, the author explains the Central Asian states' perceptions of terrorist threat and their counterterrorism responses. The book analyses the counterterrorism policies of Kazakhstan and Kyrgyzstan, the two Central Asian states that have been least affected by terrorist violence and Islamism but chose to combat those threats vigorously. Using materials derived from a wide range of sources, including legal documents, officials' memoirs and fieldwork, this research will contribute to studies in Asian politics and national security, and international relations.

United and Divided Mike Dennis 2004-03-01 The system transformation after German unification in 1990 constituted an experiment on an unprecedented scale. At no point in history had one state attempted to redesign another without conquest, bloodshed or coercion but by treaties, public policy and bureaucratic processes. Unification was achieved by erasing the eastern political and economic model. However, in the meantime it has become clear that the same cannot be said about social transformation. On the contrary, social and cultural attitudes and differentiation have continued and resulted in deep divisions between West and East Germany. After unification, the injustices of politics seemed to have been replaced, in the eyes of most former GDR citizens, by unexpected injustices in the personal spheres of ordinary people who lost their jobs and faced unknown realities of deprivation and social exclusion. These are the main concerns of the contributors to this volume. Incorporating new research findings and published data, they focus on key aspects of economic, political, and social transformation in eastern Germany and compare, through case studies, each area with developments in the west.
