Excerpt: ... Appendix A List of Steamboats on the Upper Mississippi River, 1823-1863 In the following compilation I have endeavored to give as complete a history as possible of every boat making one or more trips on the upper

Mississippi River -- that is to say, above the upper rapids -- prior to 1863, not counting boats engaged exclusively in the rafting business. Owing to the repetition of names as applied to different steamers, which were built, ran their course, and were destroyed, only to be followed by others bearing the same name, it is altogether likely that some have escaped notice. Others that may have made the trip have left no sign. In nearly every case the record is made either at St. Paul or at Galena. Whenever possible, the names of the master and clerk are given. Where boats were running regularly in the trade but one notation is made: "St. Paul, 1852; 1854; etc.," which might include twenty trips during the season. The record covers the period from 1823, when the first steamer, the "Virginia," arrived at St. Peters from St. Louis, with government stores for Fort Snelling, up to 1863, one year after the writer left the river. ADELIA--Stern-wheel; built at California, Pa., 1853; 127 tons;

~~St. Paul, 1855; 1856, 1857--~~  
Capt. Bates, Clerk Worsham. ADMIRAL--Side-wheel; built at McKeesport, Pa., 1853; 245 tons; 169 feet long, 26 feet beam; in St. Paul trade 1854--Capt. John Brooks; went into Missouri River trade; was snagged and sunk October, 1856, at head of Weston Island, in shallow water; had very little cargo at time; was raised and ran for many years thereafter in Missouri River trade. ADRIATIC--Side-wheel; built at Shousetown, Pa., 1855; 424 tons; was in great ice jam at St. Louis, February, 1856. ADVENTURE--In Galena trade 1837--Capt....

Donald A. Wilson 2007-06  
Maine steamboats existed in two different arenas: the ocean steamers that traveled up the coast and the inland steamers, which are the focus of this book. The Maine wilderness once witnessed an enormous movement of people, goods, and mail through steamboat

traffic. Originally freighters provided supplies and merchandise for the lumber industry and, with the lack of roads, they were the only dependable transportation to many sporting lodges and resorts. Boat traffic also delivered indispensable goods to lakeside villages and outposts. Eventually sportsmen and vacationers discovered the beauties of the lakes and mountains, and steamboat companies formed early in the 19th century to serve the growing numbers of visitors and businesses. Thousands of families trekked from the southern cities to the interior to delight in a popular Northeast pastime. Getting to places was a chore as well as an adventure, and the railroads and the steamboats did the job. At one time, they facilitated the cycles of life in the Maine woods.

2016-11-05 According to James  
Lloyd, the 1856 publisher of  
this guide, "The price of this  
volume is so small, that every  
man, woman and child, should  
have a copy for  
reference..."However true that  
may have been, they might not  
have wanted to refer to it while  
ACTUALLY RIDING ON A  
STEAMBOAT.The largest

~~portion of the book is taken up~~  
with detailed accounts of  
horrific steamboat accidents  
involving boiler explosions,  
collisions with other ships,  
capsizing, and damage from  
river detritus. In one instance  
he records a conflagration that  
consumed twenty-three  
steamboats in New Orleans in  
1849.It reads extremely well  
and a modern equivalent might  
be 1955 classic, "A Night to  
Remember" about Titanic, only  
with scores of wrecks instead  
of one. In some of the cases,  
criminal charges were brought  
against crew members for  
negligence or because they  
blew up a boiler while racing  
another steamboat while  
carrying 300 passengers.It  
makes fascinating reading of  
an era long gone and Lloyd did  
a very creditable job of  
cataloging scores of accidents.  
Why he felt this would be  
appropriate reading for  
children while traveling is  
something we can never know.
