Sub Duty Book Review: Unveiling the Magic of Language

In an electronic digital era where connections and knowledge reign supreme, the enchanting power of language has been apparent than ever. Its capability to stir emotions, provoke thought, and instigate transformation is actually remarkable. This extraordinary book, aptly titled "**Sub Duty**," published by a highly acclaimed author, immerses readers in a captivating exploration of the significance of language and its profound affect on our existence. Throughout this critique, we shall delve into the book's central themes, evaluate its unique writing style, and assess its overall influence on its readership.

The Duty of Peace Amongst the Members of the Same State ... A Sermon [on Rom. Xiv. 19], Etc James GARDINER (Sub-Dean of Lincoln.) 1713

"Execute against Japan" Joel Ira Holwitt 2009-04-01 " . . . until now how the Navy managed to instantaneously move from the overt legal restrictions of the naval arms treaties that bound submarines to the cruiser rules of the eighteenth century to a declaration of unrestricted submarine warfare against Japan immediately after the attack on Pearl Harbor has never been explained. Lieutenant Holwitt has dissected this process and has created a compelling story of who did what, when, and to whom."—The Submarine Review "Execute against Japan should be required reading for naval officers (especially in submarine wardrooms), as well as for anyone interested in history, policy, or international law."—Adm. James P. Wisecup, President, US Naval War College (for Naval War College Review) "Although the policy of unrestricted air and submarine warfare proved critical to the Pacific war's course, this splendid work is the first comprehensive account of its origins—illustrating that historians have by no means exhausted questions about this conflict."—World War II Magazine "US Navy submarine officer Joel Ira Holwitt has performed an impressive feat with this book. . . . Holwitt is to be commended for not shying away from moral judgments . . . This is a superb book that fully explains how the United States came to adopt a strategy regarded by many as illegal and tantamount to 'terror'."—Military Review

Thunder Below! Eugene B. Fluckey 1997-07 Under the leadership of her fearless skipper, Captain Gene Fluckey, the Barb sank the greatest tonnage of any American sub in World War II. At the same time, the Barb did far more than merely sink ships—she changed forever the way submarines stalk and kill their prey.

Heroes Beneath the Waves Mary Nida Smith 2015-11-17 The unbelievable stories of the heroic men who sailed under the sea. In *Heroes Beneath the Waves*, many brave men who rode submarines to great depths and across the oceans into unknown territory share their experiences, fears, and thoughts. They allow us to travel back in time through their memories. Trained for years to keep silent—for "loose lips sink ships"—many still believe what they know to be classified and refuse to disclose even the minutest of recollections. Others, however, want to leave a legacy of reminiscences for people to learn and live by—to know that freedom is not free. Some stories will never be told. Held within the secret confines of their souls, these deep sea veterans block them out for self-perseverance. Yet, there are others who will never escape their own minds; they relive their underwater experiences over and over with eyes open or shut. *Heroes Beneath the Waves* is about teenage boys who left farms, small towns, and inner cities to defend the United States and democracy worldwide. Signing up for United States Navy submarine duty was an adventure of a lifetime during the early 1940s. Dreams of torpedoing Japanese and German ships and subs consumed their thoughts. Those who returned home as young men were older and wiser. *Heroes Beneath the Waves* was written to honor these men—gallant heroes—who served and are serving today on submarines. Skyhorse Publishing, as well as our Arcade imprint, are proud to publish a broad range of books for readers interested in history—books about World War II, the Third Reich, Hitler and his henchmen, the JFK assassination,

conspiracies, the American Civil War, the American Revolution, gladiators, Vikings, ancient Rome, medieval times, the old West, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

Model Rules of Professional Conduct American Bar Association.

House of Delegates 2007 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Pigboat 39 Bobette Gugliotta 2014-04-23 A historic account of the US Navy's cramped, outdated submarine that was forced to remain in service during World War II. Constructed in 1923, the American submarine S39 was practically an antique when the Japanese struck Pearl Harbor in 1941. With defective torpedoes, a semi-trained crew, and a primitive ventilation system (hence the nickname), she nevertheless sank two enemy vessels and eluded pursuit to fight again in the Solomons. This is the little-known story of how an unprepared navy fought with what it had until the tide could be turned. Bobette Gugliotta was one of the S-39 wives. With the technical assistance of her husband, Guy, an officer who served on three of the S-class boats during the war, she presents an accurate and absorbing account of submarine operations and warfare. No less valuable is her candid and sympathetic portrayal of the men and women whose lives were caught up in the voyage of the S-39. Praise for *Pigboat 39* "There are very few accounts of the exploits of these submarines. This book is a gem; essential for World War II and naval history collections." —Library Journal "The account of S39's 2,000-mile flight cackles with action." —Navy Times "Captures in vivid style the valiant spirit of the men who held the line in the face of disaster. But equally important, by depicting the roles played by the wives of the crew members, Gugliotta has helped to fill a gap that has largely been ignored by naval historians." —U.S. Naval Proceedings "A remarkable evocation." —Louisville Courier-Journal

The USS Puffer in World War II Craig R. McDonald 2015-03-19 Submarines were responsible for about 55 percent of the tonnage of the Japanese fleets sunk during World War II. The 22 percent casualty rate of U.S. submariners was the highest of the military services. This volume traces the career of the submarine the USS Puffer from the laying of her keel and her commissioning on April 27, 1943, until her departure for the scrap yard in late 1960. Compiled from interviews with former crew

members, including the author's father, Donald B. McDonald, as well as other contemporary sources, it follows the crew of the Puffer through nine war patrols. Events recollected include the First War Patrol, which resulted in a record-setting 38 hour submergence because of enemy fire; the dangerous transfer of torpedoes while surfaced in enemy waters; and the wild bombardment of Japanese shore installations with the 5-inch deck gun. There are numerous wartime photographs and appendices providing a list of awards earned by the crew and a summary of claimed successful attacks. Brief biographies of the seven commissioned officers are also included.

Deep Strike Rick Campbell 2021-03-25 The U.S. Atlantic fleet is in a race to stop a rogue Russian submarine, before it devastates the east coast of the U.S. A shoulder-launched missile attack on a convoy of vehicles leaving the U.N. headquarters in New York kills several diplomats, including the American ambassador. Security footage reveals that the killer behind the attack is a disgraced former special forces operative, Mark Alperi. With funding from the nearly shattered ISIS, Alperi is planning an attack on the U.S. that will be more devastating than 9/11. He bribes a desperate Russian submarine commander to launch a salvo of missiles at various targets along the East Coast of the United States. When the Russian submarine sinks the U.S. sub that is tracking it, the U.S. military is alarmed. When Intelligence uncovers Alperi's plot, though, it becomes a race against time - find the Russian sub and sink it before it can launch a devastating nuclear attack. The exceptional new novel in Rick Campbell's full-throttle Trident Deception series, perfect for fans of Tom Clancy, Clive Cussler and Brad Thor. Praise for Rick Campbell 'Compelling and thrilling ... a must-read' Jack Coughlin, New York Times bestselling author of Shooter and Time to Kill 'A fistfight of a thriller. Zoomies, Subs And Zeros Admiral Charles Lockwood 2015-11-06 The exploits of the Submarine Rescue League, which had the job of picking up American flyers shot down while attacking objectives in the Pacific. 'In writing this book, the authors had a triple purpose. First, to write the superbly human history of the Submarine Lifeguard League while those who participated in its creation and in its splendid work are still among us to tell that story. It is a chapter of Naval and Air Force operations in the Pacific that richly deserves preservation. Second, to convey to submariners whose vessels took part in the saving of the lives of hundreds of Air Force, Navy, and Marine Corps men an essential picture of the overall scope of their activities; as well as to give aviators whose lives were saved by submarines—and their families—a view of the far-flung operations established for snatching airmen from Japs as well as from death at sea. There remains one more reason for the writing of this book and, perhaps, it is, after all, the most important: namely, to impress upon those who have a voice in such matters at defense and Congressional levels that with new long-range planes and nuclear powered submarines, the lifesaving know-how acquired by submarine and air commanders through bitter and time-consuming experiences should be preserved for future generations of submariners and airmen.' Author's Preface.

Black Submariners in the United States Navy, 1940-1975 Glenn A. Knoblock 2011-04-04 For as long as an American naval force has existed, black sailors have served it with bravery, distinction, and little or no recognition. They have since earned praise for service in the American Revolution, the War of 1812, and the Civil War, and more recently, they were integral to the development of the U.S. Submarine Service. Their roles limited by segregation, black submariners nonetheless were a key element of the "Silent Service" throughout World War II. With desegregation came expanded opportunities, and black submariners witnessed the birth and evolution of the nuclear-powered submarine, and some of the tensest moments of the Cold War. These men paved the way for those who followed—their contributions deserve recognition, and their stories deserve to be told. This exploration of the role of African

American submariners chronicles their service from World War II through the Cold War era. An historical overview of black sailors and the evolution of the Steward's Branch, to which black sailors were eventually restricted, precede descriptions of becoming a steward and a submariner, and of life as a submariner during World War II. An account of black submariners in post-war service during desegregation, the development of the nuclear submarine, and throughout the Cold War follows. Oral histories of more than fifty black submariners who served in World War II and post-war form the heart of the book. Photographs of the men profiled, including wartime photographs, complement the text. Appendices outline the naval steward rating system, list all black submarine stewards serving in World War II, top stewards by number of war patrols, and those lost or killed during wartime service. Rear Admiral Melvin G. Williams, Jr., submarine fleet commander and son of one of the men profiled, provides a foreword.

Sub Mark Roberts 2008-04-01 True tales of life and death as told by those who fought in the briny depths. From the undersea warfare of World War II through the Cold War stand-offs in the deep to the cutting-edge technology of the modern U.S. Navy, submarines have evolved into the front line of our nation's defense at sea. And the men who sail them have become heroes above and below the waves. These are their stories. Compiled from interviews and recollections from submarine veterans and accompanied by detailed photos and illustrations of both man and machine at work, Sub is a gripping chronicle of undersea warfare as told by those who know firsthand what it means to drop through the hull of a boat, to sink into the dark, freezing waters of the deep—and to have death never more than one torpedo away.

The Men Stephen Leal Jackson 2010 Submarine duty during World War II was one of the most statistically deadly, physically demanding, and emotionally challenging assignments in the U. S. Navy. The boats had few crew comforts, and war patrols, typically thirty to sixty days in length, were so exhausting that the submarine sailors often got a month of rest after each patrol. What would motivate men to volunteer for this unmistakably difficult and dangerous job? This is the question that The Men will answer using the oral histories of enlisted submarine veterans, a collection of letters of one sailor who did not return, and other primary sources. These volunteers, from diverse locales and backgrounds, ignored the danger, accepted the privations, and exalted in the camaraderie. Their excitement, fear, and humble heroism is captured in their own words; the real story of the undersea war in the Pacific told by the men who fought it. A veteran of the United States Navy, Stephen Leal Jackson spent eight years in the submarine force serving on the USS Los Angeles (SSN 688) and the USS Florida (SSBN 728). Jackson's service included several Western Pacific cruises to the oceans, lands, and ports described in The Men. A lifelong student of American history, Jackson's ongoing research concentrates specifically on World Wars I and II. Jackson received his Master of Arts in American History from Providence College and is currently in the Ph.D. program at Salve Regina University. Jackson has served as the primary spokesperson for a major electrical utility on nuclear and environmental issues. His unique perspective as a onetime navy enlisted submariner, trained historian, and skilled communicator allows Jackson to provide clear and easy access to the fascinating experiences of the men who fought the undersea battles during World War II.

Submarine Admiral I. J. Galantin 1997-05 Offers an insider's account of the development of the ballistic missile submarine, and a lifelong love affair with submarines.

Standing Watch Jonathan Li-Chung Leung 2019-04-30 The first book to capture and preserve the inside story of the exclusive brotherhood that manned the front lines of the Cold War Featuring interviews from seventeen veteran submariners, Standing Watch: American Submarine Veterans Remember the Cold War Era offers the perspective of the submariners themselves—lending them a voice and paying homage to their service. Jonathan Li-Chung Leung provides an original glimpse into a world of unique challenges and characters, a life isolated and submerged, and a duty defined by the juxtaposition of monotonous routine and unparalleled excitement. These personal accounts of life below the surface offer readers a front-row seat to close encounters with Soviet submarines and the naval blockade during the Cuban Missile Crisis, as well as an intimate understanding of daily life onboard the vessels, the culture of military discipline, and the religious-like fervor exercised in honoring traditions big and small. By applying first-hand perspectives to a larger thematic overview, this book uses authentic narratives to deliver a lively and colorful picture of the Silent Service. Set against the backdrop of sobering geo-political disputes and their own

role as the nation's defenders against a seemingly ambiguous super-enemy, these veterans focus on their responsibilities and reflect on careers built on the simple axioms of pride and service. This invigorating and unalloyed account is an unprecedented addition to the existing literature on naval and military history.

In the Course of Duty Don Keith 2005 Recounts the seventy-two-hour sea battle between the USS Batfish and a Japanese submarine in the final days of World War II.

Submarine Edward Latimer Beach 1990-04 Welcomed as the first book about American submarines in World War II to be written by a man who actually fought in them, this compelling personal account of the war beneath the sea firmly established Edward L. Beach's reputation as a writer in the early 1950s. Given the survival rate of those in the silent service, it is a story many submariners did not live to tell. In fact, most of the crew of Beach's boat, the USS Trigger, were lost soon after he left for another assignment. A veteran of twelve war patrols, Beach authentically recaptures the moments of elation, desperation, and numbing fear that were part of the daily lives of these warriors as they hunted down the enemy in the Pacific. Beach helped sink the Trigger's first ships and survived more than his share of exploding depth charges from avenging warships. This book weaves the Trigger's story with the equally thrilling tales of other battle-hardened submarines and the brave men who fought in them against the Japanese. Readers share in the destruction of five destroyers in four days and join in the deadliest game of all -- stalking other submarines. They also come to understand the terror and uncertainty of being at the other end of the pursuit, and silently sweating out depth-charge poundings in a leaking boat. For an authentic account of what went on under the waves, this book remains one of the very best. Book jacket.

Zoomies, Subs and Zeros Charles A. Lockwood 2019-03-23 As air battles with Japanese fighter planes increased over the Pacific toward the end of World War 2, the Submarine Lifeguard League was formed to rescue Allied aviators forced to either "hit the silk" or zoom their plane into the drink. The League helped save the lives of hundreds of Air Force, Navy, and Marine Corps pilots - including the life of future President George H. W. Bush - from Japs as well as from death at sea. Author Adm. Charles Lockwood (Hellcats of the Sea, Sink 'Em All) brings his usual flair for submarine stories to his eye-witness account of events, providing a breathless narrative of the hair-raising adventures of this little-known sub-division of the US Naval Fleet.

War Beneath the Waves Don Keith 2010-04-06 From the national bestselling author of *Final Patrol* comes a gripping story of heroism under the sea. In November 1943, while on war patrol in the Makassar Strait, the USS Billfish submarine was spotted by the Japanese, who launched a vicious depth charge attack. Explosions wracked the sub for fifteen straight hours. With his senior officers incapacitated, diving officer Charlie Rush boldly assumed command and led key members of the crew in a heroic effort to keep their ship intact as they tried to escape. Now, in *War Beneath the Waves*, this intense story is finally told in all its harrowing detail. It is an inspiring tale of one man's leadership and courage under fire, and of the remarkable efforts of a submarine crew to do their duty and save their ship.

Three Knots to Nowhere Ted E. Dubay 2014-02-18 This book follows the author's experiences in the United States Navy from 1966 through 1972. They include a personal background, boot camp, electrician's school, the U.S. Naval Nuclear Program, assignment to the USS Henry Clay during an overhaul in Charleston, South Carolina, subsequent transit to Hawaii, and deterrent patrols out of Guam. The work begins with the crew of one of the most powerful weapons on earth, the fleet ballistic missile

submarine USS Henry Clay, manning Battle Station Missile. What follows is a fresh perspective on the secret world of submarine life, ranging from behavioral insights and humorous anecdotes to many undocumented attributes of submarine life, exposing aspects of life under the sea no one else has revealed. This book is the most complete representation of submarine duty to date, with a high level of detail. The narrative focuses on the enlisted men—the backbone of the submarine service.

Cold War Submarines Norman Polmar 2004 Submarines had a vital, if often underappreciated, role in the superpower navies during the Cold War. Their crews carried out intelligence-collection operations, sought out and stood ready to destroy opposing submarines, and, from the early 1960s, threatened missile attacks on their adversary's homeland, providing in many respects the most survivable nuclear deterrent of the Cold War. In *Cold War Submarines*, Norman Polmar and K. J. Moore provide the definitive history of the design and construction of these undersea fleets.
