Reference Service Expertise

William A. Katz 1993

This important volume presents a wealth of practical ideas for improving the art of reference librarianship. *Reference Service Expertise* provides pragmatic ways for librarians to aid patrons, consider reference collections and how

they are employed, and assess various technologies in reference work. Dedicated to the idea that reference service is a benevolent desire to help the sometimes puzzled library user, this unique book describes numerous and varied means to that end and encourages reference librarians to become familiar with the multiple resources available in modern libraries. Reference Service Expertise pinpoints specific areas in which librarians can increase their knowledge in order to become more efficient. These strategies include using a systems approach in reference instruction for library professionals; guidelines for academic librarians to use for evaluating facilities, services, and staff as to how effectively they welcome users and validate their information needs; using team teaching to instruct users about library services; developing legal reference skills to support the constitutional right-to-know in a self-governing society; and helping non-science librarians

to become science literate by reading popular science literature, watching science television programs, visiting science museums, and generally increasing their awareness of the problem of science illiteracy among the general population. A wide variety of resources available in today's reference libraries are discussed to help librarians become better informed about the options available to their patrons, including: ERIC and NTIS and the information gap between the two databases resources on the evolving market economy or investments in the Commonwealth of Independent States fee-based services PsycLIT (CD-ROM), PsycINFO (online), and the difference in retrieval patterns using the same vocabulary of terms interactive media centers-- advantages and shortcomings Reference librarians in all types of libraries will benefit from chapters that describe specific methods for improving their own personal effectiveness as well as

2014-03-28 This book is a collection of three independent but closely related studies. The focus is on the potential causes of skill mismatch, the extent of skill mismatch, the socio-demographic make-up of skill mismatch, and the consequences of skill mismatch in terms of earnings as well as employer sponsored adult

education/training. A distinction is made between skill mismatch and education mismatch. All three studies use data from the Adult Literacy and Lifeskills Survey (ALLS) to

investigate the relationships between select outcomes and skill supply-demand characteristics as well as their interactions which materialize into skill match-mismatch situations. The dataset contains direct measures of literacy skills as well as measures of the use of these skills at work which allow for a direct measure of literacy match-mismatch. The analysis points to the complex ways in which mismatch is generated and the need for an accurate and up to date measure of mismatch, one that reflects the possibilities for skill gain and skill loss over the lifespan, and reflects differences in the quality of qualifications. It also emphasizes that addressing mismatch requires a careful consideration of both the demand and supply sides of the labour market, so as to understand better the variety of factors which may have a negative impact on the effectiveness of skill formation, skill maintenance, and also skill use. Among the key findings: Skill demand

characteristics appear to be as important as skill supply characteristics in explaining observed variation in earnings. There is a substantive association between the requirement to read at work and earnings, which is independent of whether individuals have high or low levels of literacy proficiency. Premiums associated with literacy skills are strongest in occupation types where they are most relevant, but premiums associated with the requirement to use those skills are nevertheless found to be strong within all occupational groups. The requirement to read at work seems to have a strong association with the incidence of participation in employer supported adult education/training. This has important implications for understanding better the relationship between how work is organized and the decision to further invest in human capital. Advocacy to Zealousness
Kelly Anders 2012 *Advocacy to Zealousness: Learning Lawyering Skills from Classic Films* includes 26 skills, listed in alphabetical order and appearing in separate chapters, which should ideally be in every lawyer's toolbox. Each is an example of professionalism, and all are

possible for every current or future lawyer to attain or sharpen. They also speak to our needs in the legal profession in the new millennium. Interspersed throughout the text are subtle references to diversity, both in the practice of law, as well as in various film references and storylines. Each chapter includes a discussion of the skill and its use for lawyers, a synopsis of the film associated with the skill, film discussion questions, and brief exercises for improvement. The format encourages readers to either methodically review each chapter in alphabetical order, or skip around as needs and interests dictate. The book concludes with a comprehensive index. Images, be they positive or negative, are powerful and long lasting. Those found in popular films are often our only points of reference until we meet the real thing -- or assume the role ourselves. Many professors already use film clips in their classes, but, until *Advocacy to Zealousness*, there was no

singular point of reference for films selected solely for the purpose of fostering and sharpening lawyering skills. Legal skills training needn't be dry or cumbersome. With creativity and planning, it can instead be educational, memorable, and enjoyable -- while also remaining comprehensive and relevant -- thereby enhancing the practice of law and the legal profession as a whole. Anders spent more than three years sharpening the list of lawyering skills, and she researched and analyzed 327 films to select the 26 that are included in the book. Every film selected was released before the adoption of the modern film rating system in 1968, which facilitates showing them in a variety of classroom settings because they lack the expletives, nudity, and graphic violence frequently found in modern films. Additionally, each film is available in DVD format, and most feature diverse characters in leading or supporting roles.
