Youth, Arts and Education Anna Hickey-Moody 2013 How are the arts important in young people's lives? In *Youth, Arts and Education*, Anna Hickey-Moody explores how the arts are ways of belonging, resisting, being governed and being heard. Drawing on the thought of Gilles Deleuze, she develops the theory of affective pedagogy, which explains the process of learning that happens through aesthetics.

'Hanging in with Kids' in Tough Times John Smyth 2010 This book brings a unique, innovative and refreshing perspective to one of the most protracted issues affecting young lives - disengagement from schooling. Rather than continuing to blame young people, as most educational policies do, this book examines disengagement from the vantage point of the lives, experiences, interests and aspirations of the communities from which young people come, and within which they are embedded. It uses a narrative and representational approach that gives detailed insights into the wider context of poverty, class, power, relationships and identity. A major and defining hallmark of the book is the emphasis it places upon a number of 'doings', - including community voice, identity formation, critical work education and education policy - all of which provide a very different set of scripts with which to reinvent the institution of high school.

Handbook of Public Pedagogy Jennifer A. Sandlin 2010-07-29 Bringing together scholars, public intellectuals, and activists from across the field of education, the *Handbook of Public Pedagogy* explores and maps the terrain of this burgeoning field. For the first time in one comprehensive volume, readers will be able to learn about the history and scope of the concept and practices of public pedagogy. What is 'public pedagogy'? What theories, research, aims, and values inform it? What does it look like in practice? Offering a wide range of differing, even diverging, perspectives on how the 'public' might operate as a pedagogical agent, this *Handbook* provides new ways of understanding educational practice, both within and without schools. It implores teachers, researchers, and theorists to reconsider their foundational understanding of what counts as pedagogy and of how and where the process of education occurs. The questions it raises and the critical analyses they require provide curriculum and educational workers and scholars at large with new ways of understanding educational practice, both within and without schools.

Stealing Innocence NA NA 2016-04-30 Continuing his ongoing social critique, Henry Giroux now looks at the way corporate culture is encroaching on the lives of children by exploring three myths prevalent in our society: that the triumph of democracy is related to the triumph of the market; that children are unaffected by power and politics; that teaching and learning are no longer linked to improving the world. Looking at childhood beauty pageants, school shootings and the omnipresent nihilistic chic of advertising, Giroux paints a disturbing picture of the world surrounding our children. Ultimately, he turns to the work of Antonio Gramsci, Paulo Freire and Stuart Hall for lessons about how we can reinstitute a realistic childhood for our children.

Globalization and Free Trade Natalie Goldstein 2010-06-23 Outlines the history of the expansion and globalization of national economies and explains how globalization evolved to its present state.

Parenting Out of Control Margaret K. Nelson 2012-03 They go by many names: helicopter parents, hovercrafts, PFHs (Parents from Hell). Drawing on a wealth of eye-opening interviews with parents across the country, Margaret K. Nelson cuts through the stereotypes and hyperbole to examine the realities of what she terms parenting out of control. Situating this phenomenon within a broad sociological context, she finds several striking explanations for why today's prosperous and well-educated parents are unable to set realistic boundaries when it comes to raising their children. Analyzing the goals and aspirations parents have for their children as well as the strategies and technologies they use to reach them, Nelson discovers fundamental differences among American parenting styles that expose class fault lines, both within the elite and

between the elite and the middle and working classes. Today's parents are faced with unprecedented opportunities and dangers for their children, and are evolving novel strategies to adapt to these changes -- this lucid and insightful work provides an authoritative examination of what happens when these new strategies go too far.

Disney Channel Tween Programming Christopher E. Bell 2020-08-31 Much has been written about the Walt Disney Company's productions, but the focus has largely been on animation and feature film created by Disney. In this essay collection, the attention is turned to The Disney Channel and the programs it presents for a largely tween audience. Since its emergence as a market category in the 1980s, the tween demographic has commanded purchasing power and cultural influence, and the impressionability and social development of the age group makes it an important range of people to study. Presenting both a groundbreaking view of The Disney Channel's programming by the numbers and a deep focus on many of the best-known programs and characters of the 2000s--shows like *The Wizards of Waverly Place*, *That's So Raven* and *Hannah Montana*--this collection asks the simple questions, "What does The Disney Channel Universe look and sound like? Who are the stories about? Who matters on The Disney Channel?"

Children and Consumer Culture in American Society Lisa Jacobson 2007-12-30 Children play a crucial role in today's economy. According to some estimates, children spend or influence the spending of up to \$500 billion annually. Journalists, sociologists, and media reformers often present mass marketing toward children as a recent fall from grace, but the roots of children's consumerism -- and the anxieties over it -- date back more than a century. Throughout the twentieth century, a wide variety of groups -- including advertisers, retailers, parents, social reformers, child experts, public schools, and children themselves -- helped to socialize children as consumers and struggled to define the proper boundaries of the market. The essays and documents in this volume illuminate the historical circumstances and cultural conflicts that helped to produce, shape, and legitimize children's consumerism. Focusing primarily on the period from the Gilded Age through the twentieth century, this book examines how and why children and adolescents acquired new economic roles as consumers, and how these new roles both reflected and produced dynamic changes in family life and the culture of capitalism. This volume also reveals how children and adolescents have used consumer goods to define personal identities and peer relationships -- sometimes in opposition to marketers' expectations and parental intentions.

Youth Cultures, Language, and Literacy Stanton Wortham 2011-03-15 Drawing upon international research, *Review of Research in Education*, Volume 35 examines the interplay between youth cultures and educational practices. Although the articles describe youth practices across a range of settings, a central theme is how gender, class, race, and national identity mediate both adult perceptions of youth and youths' experiences of schooling.

Take Back Higher Education H. Giroux 2004-06-24 At the beginning for the new millennium, higher education is under siege. No longer viewed as a public good, higher education increasingly is besieged by corporate, right-wing and conservative ideologies that want to decouple higher education from its legacy of educating students to be critical and autonomous citizens, imbued with democratic and public values. The greatest danger faced by higher education comes from the focus of global neo-liberalism and the return of educational apartheid. Through the power of racial backlash, the war on youth, deregulation, commercialism, and privatization, neo-liberalism wages a vicious assault on all of those public spheres and goods not controlled by the logic of market relations and profit margins. *Take Back Higher Education* argues that if higher education is going to meet the challenges of a democratic future, it will have to confront neo-liberalism, racism, and the shredding of the social contract.

Performance Autoethnography Norman K. Denzin 2018-04-20 This book is a manifesto. It is about rethinking performance autoethnography, about the formation of a critical performative cultural politics, about what happens when everything is already performative, when the dividing line between performativity and performance disappears. This is a book about the writing called autoethnography. It is also about what this form of writing means for writers who want to perform work that leads to social justice. Denzin's goal is to take the reader through the history, major terms, forms, criticisms and issues confronting performance autoethnography and critical interpretive. To that end many of the chapters are written as performance texts, as ethnodramas. A single thesis organizes this book: the performance turn has been taken in the human disciplines and it must be taken seriously. Multiple informative performance models are discussed: Goffman's dramaturgy; Turner's performance anthropology; performance ethnographies by A. D. Smith, Conquergood, and Madison; Saldana's ethnodramas; Schechter's social theatre; Norris's playacting; Boal's theatre of the oppressed; and Freire's pedagogies of the oppressed. They represent different ways of staging and hence performing ethnography, resistance and critical pedagogy. They represent different ways of "imagining, and inventing and hence performing alternative imaginaries, alternative counter-performances to war, violence, and the globalized corporate empire" (Schechner 2015). This book provides a systematic treatment of the origins, goals, concepts, genres, methods, aesthetics, ethics and truth conditions of critical performance autoethnography. Denzin uses the performance text as a vehicle for taking up the hard questions about reading, writing, performing and doing critical work that makes a difference.

Down with Childhood Paul Rekret 2017-09-19 Sometimes popular music registers our concerns and anxieties more lucidly than we realise. This is evident in the case of an ideal of childhood innocence in rapid decay in recent decades. So claims *Down with Childhood*, as it takes in psychedelia's preoccupation with rebirth and inner-children, the fascination with juvenilia amidst an ebbing UK rave scene and dozens of nursery rhyme hip-hop choruses spawned by a hit Jay-Z tune. As it examines the often complex sets of meanings to which the occasional presence of children in pop songs attests, the book pauses at Musical Youth's 'Pass the Dutchie' and other one-hit teen wonders, the career paths of child stars including Michael Jackson and Britney Spears, radical experiments in free jazz, and Black Panther influenced children's soul groups. In the process, a novel argument begins to emerge relating the often remarked crisis of childhood to changing experiences of work and play and ultimately, to an ongoing capitalist crisis that underlies them.

Globalization, Sport and Corporate Nationalism Jay Scherer 2010 Although New Zealand exists as a small (pop. 4.3 million), peripheral nation in the global economy, it offers a unique site through which to examine the complex, but uneven, interplay between global forces and long-standing national traditions and cultural identities. This book examines the profound impact of globalization on the national sport of rugby and New Zealand's iconic team, the All Blacks. Since 1995, the national sport of rugby has undergone significant change, most notably due to the New Zealand Rugby Union's lucrative and ongoing corporate partnerships with Rupert Murdoch's News Corporation and global sportswear giant Adidas. The authors explore these significant developments and pressures alongside the resulting tensions and contradictions that have emerged as the All Blacks, and other aspects of national heritage and indigenous identity, have been steadily incorporated into a global promotional culture. Following recent research in cultural studies, they highlight the intensive, but contested, commodification of the All Blacks to illuminate the ongoing transformation of rugby in New Zealand by corporate imperatives and the imaginations of marketers, most notably through the production of a complex discourse of corporate nationalism within Adidas's evolving local and global advertising campaigns.

Picturing the Woman-Child Morna Laing 2021-01-28 The childlike character of ideal femininity has long been critiqued by feminists, from Mary Wollstonecraft to Simone de Beauvoir. Yet, women continue to be represented as childlike in the western fashion media, despite the historical connotations of inferiority. This book questions why such images still hold appeal to contemporary women, after three, or even four, waves of feminism. Focusing on the period of 1990-2015, *Picturing the Woman-Child* traces the evolution of childlike femininity in British fashion magazines, including *Vogue*, *i-D* and *Lula*, *Girl of my Dreams*. These images draw upon a network of references, from *Kinderwhore* and

Lolita to *Alice in Wonderland* and the *femme-enfant* of Surrealism. Alongside analysis of fashion photography, the book presents the findings of original research into audience reception. Inviting contemporary women to comment on images of the 'woman-child' provides an insight into the meaning of this figure as well as an evaluation of theory on the 'female gaze'. Both scholarly and accessible, the book paves the way for future studies on how readers make sense of fashion imagery.

Critical Literacy Eugene F. Provenzo 2015-12-03 In *Critical Literacy* Eugene F. Provenzo Jr. challenges E. D. Hirsch's assumptions about culture and education. Calling for a broader and more democratic vision than Hirsch, Provenzo critiques Hirsch's legacy up through the current conservative educational agenda for education which, he argues, denies, not only the United States' diversity, but its democratic traditions of democratic participation. His book shows why critical faculties and skills of students are essential not only to the success of individual students but to their participation in a healthy democracy. Provenzo offers a list of 5,000 things every educated American ought to know-- none of them the same items as those included on Hirsch's list in *Cultural Literacy*. *Critical Literacy* is essential reading for those concerned with our schools and the future of our children.

Bad Murray Pomerance 2012-02-01 Examines the many forms of cinematic "badness" over the past one hundred years, from *Nosferatu* to *The Talented Mr. Ripley*.

Radical Relevance Laura Gray-Rosendale 2012-02-01 Exemplifies the struggles of scholars to work toward a more shared agenda for social change. In an effort to rethink the left, this interdisciplinary collection weaves together some of today's most powerful voices in contemporary left critical thought as they examine the fragmentation of American movements for social change, evaluate what critical scholarship might contribute to the task of renewing (or creating) a more unified and efficacious left, and explore the left's possibly inadequate dealings with many marginalized groups. Representing a diverse range of theoretical perspectives within several "textual" disciplines, the essays assess historical, practical, or speculative models for a "whole left"—a left constituted by a broad range of complexly interwoven interests, including issues of class, environment, gender, sexuality, disability, race, and ethnicity. The book exemplifies the struggles of scholars to work toward a more shared agenda for social change. At Northern Arizona University, Laura Gray-Rosendale and Steven Rosendale are Associate Professors of English. Gray-Rosendale is the coeditor (with Gil Harootunian) of *Fractured Feminisms: Rhetoric, Context, and Contestation* and the coeditor (with Sibylle Gruber) of *Alternative Rhetorics: Challenges to the Rhetorical Tradition*, both also published by SUNY Press. Rosendale is the editor of *The Greening of Literary Scholarship: Literature, Theory, and the Environment*.

The Corporate Assault on Youth Deron Boyles 2008 *The Corporate Assault on Youth* examines childhood as a social construction increasingly influenced by corporations and commercialism. Through case studies, critical analysis, and historical/philosophical research, the essays collected here expose the degree to which children are unwitting targets of marketing. With topics ranging from the presence of media branding in schools and school supplies to the subtler ways in which the public education system is influenced by corporate ideologies and purposes, this book draws much-needed attention to how educators, administrators, policymakers, parents, and children can become aware of, and counterbalance, the effects of the commercialism that is overwhelming students' understanding of the world and their place within it.

Media/cultural Studies Rhonda Hammer 2009 This anthology is designed to assist teachers and students in learning how to better understand and interpret our common culture and everyday life. With a focus on contemporary media, consumer, and digital culture, this book combines classic and original writings by both leading and rising scholars in the field. The chapters present key theories, concepts, and methodologies of critical cultural and media studies, as well as cutting-edge research into new media. Sections on teaching media/cultural studies and concrete case studies provide practical examples that illuminate contemporary culture, ranging from new forms of digital media and consumer culture to artifacts from TV and film, including Barbie and Big Macs, soap operas, Talk TV, Facebook, and YouTube. The lively articles show that media/cultural studies is an exciting and relevant arena, and this text should enable students and citizens to become informed readers and critics of their culture and society.

Curriculum Windows Thomas S. Poetter 2021-05-01 *Curriculum*

Windows: What Curriculum Theorists of the 2000s Can Teach Us about Schools and Society Today is an effort by students of curriculum studies, along with their professor, to interpret and understand curriculum texts and theorists of the 2000s in contemporary terms. The authors explore how key books/authors from the curriculum field of the 2000s illuminate new possibilities forward for us as scholar educators today: How might the theories, practices, and ideas wrapped up in curriculum texts of the 2000s still resonate with us, allow us to see backward in time and forward in time - all at the same time? How might these figurative windows of insight, thought, ideas, fantasy, and fancy make us think differently about curriculum, teaching, learning, students, education, leadership, and schools? Further, how might they help us see more clearly, even perhaps put us on a path to correct the mistakes and missteps of intervening decades and of today? The chapter authors and editors revisit and interpret several of the most important works in the curriculum field of the 2000s. The book's Foreword is by renowned curriculum theorist William H. Schubert.

The Oxford Handbook of Children's Literature Julia Mickenberg 2012-11-29 Remarkably well researched, the essays consider a wide range of texts - from the U.S., Britain and Canada - and take a variety of theoretical approaches, including formalism and Marxism and those related to psychology, postcolonialism, reception, feminism, queer studies, and performance studies ... This collection pushes boundaries of genre, notions of childhood ... Choice. Back cover of book.

Mirror Images Diana Silberman-Keller 2008 This book considers education in both formal and informal settings, and looks critically at the accepted dichotomy between education and popular culture. It argues that popular culture is capable of educating and that education shares many characteristics with popular culture, and tries to overcome these dichotomous relationships while also trying to clarify the reciprocal effects between the two.

Key Concepts in Childhood Studies Allison James 2012-07-25 "Arranged alphabetically, core ideas about 'Agency' and 'Development' through to 'Socialisation' and 'Youth' are explained in straightforward language, with a concise introduction to key theoretical debates, as well as up to date references." - Martin Woodhead, The Open University "A challenging text that is recommended for all levels of the BA in Childhood Studies programme. The short, focussed chapters provide students with a comprehensive overview of a topic which they can then research in further depth." - Sharron Galley, Centre for Childhood Studies, Stockport College "This book gives a fantastic first look at many key concepts which are new to students in a way that is easily approachable and understandable. A great place to start further studies." - Kathryn Peckham, Chichester University This book has already proved itself as a market leader in Childhood Studies. All of the strengths of the First Edition have been retained. The book is comprehensive and judged with the needs of students in mind. It is a model of clarity and precision and has been acknowledged as such in reviews and course feedback. The new edition thoroughly revises old entries and adds new ones. The book is the most accessible, relevant student introduction to this expanding, interdisciplinary field. It is an indispensable teaching text and an ideal prompt for researchers.

Victims of Obtrusive Violence G.K. Lieten 2015-08-21 This volume describes how children's experience with violence may affect and endanger their education, as well as their physical safety and their general well-being. It includes all forms of physical, psychological and sexual abuse, and neglect against children at home, at school, and in public spaces in two different areas of Kenya (rural and urban), while taking into account its environmental and cultural factors. This volume is unique, not only because of its focus on a less researched yet highly acute social problem but also because it provides inside knowledge by giving the children a voice through their direct participation in the data collection.

Children's Books for Grown-Up Teachers Peter Appelbaum 2017-09-25 Teachers and prospective teachers read children's books, but that reading is often done as a "teacher" - that is, as planning for instruction - rather than as a "reader" engaged with the text. Children's Books for Grown-Up Teachers models the kind of thinking about teaching and learning - the sort of curriculum theorizing - accomplished through teachers' interactions with the everyday materials of teaching. It starts with children's books, branches out into other youth culture texts, and subsequently to thinking about everyday life itself. Texts of curriculum theory describe infrastructures that support the crafts of inquiry and learning, and introduce a new vocabulary of poaching, weirding, dark matter, and jazz. At the heart of this book is a method of reading; Each

reader pulls idiosyncratic concepts from children's books and from everyday life. Weaving these concepts into a discourse of curriculum theory is what makes the difference between "going through the motions of teaching" and "designing educational experiences. This book was awarded the 2009 AERA Division B (Curriculum Studies) Outstanding Book Award.

Higher Education: Handbook of Theory and Research John C. Smart 2007-05-16 This handbook series provides a compendium of literature reviews on a wide array of topics of interest to the higher education scholarly and policy communities. Each chapter provides a comprehensive review of research findings on a selected topic, critiques the research literature, and sets forth an agenda for future research. Coverage focuses on twelve general areas that encompass the salient dimensions of scholarly and policy inquiries undertaken in the international community.

Disposable Youth: Racialized Memories, and the Culture of Cruelty Henry A. Giroux 2012-03-22 Facing a crisis unlike that of any other generation, young people are caught between the discourses of consumerism and a powerful crime-control-complex, and are viewed increasingly as commodities or are subjected to the dictates of an ever expanding criminal justice system. Drawing upon critical analyses, biography, and social theory, Disposable Youth explores the current conditions of young people now face within an emerging culture of privatization, insecurity, and commodification and raises some important questions regarding the role that educators, young people, and concerned citizens might play in challenging the plight of young people, while deepening and extending the promise of a better future and a viable democracy.

Everyday Food Practices Tarunna Sebastian 2021-06-29 In Everyday Food Practices, Tarunna Sebastian examines the everyday food journeys of people in diverse metropolitan communities. Sebastian investigates how food knowledge and education inform food choices and are influenced by the media, social and familial interaction, globalised food retailers, and alternative food networks.

International Handbook of Children, Media and Culture Sonia Livingstone 2008-03-06 Deliberately selected to represent as many parts of the globe as possible, and with a commitment to recognizing both the similarities and differences in children and young people's lives - from China to Denmark, from Canada to India, from Japan to Iceland, from - the authors offer a rich contextualization of children's engagement with their particular media and communication environment, while also pursuing cross-cutting themes in terms of comparative and global trends.

Giroux Reader Henry A. Giroux 2015-11-17 One of the world's leading social critics and educational theorists, Henry A. Giroux has contributed significantly to critical pedagogy, cultural studies, youth studies, social theory, and cultural politics. This new book offers a carefully selected cross-section of Giroux's many scholarly and popular writings, which bridge the theoretical and practical, integrate multiple academic disciplines, and fuse scholarly rigor with social relevance. The essays underscore the continuities and transformations in Giroux's thought, just as they offer invaluable approaches to understanding a range of social problems. Giroux's work suggests that a more humane and democratic world is possible and provides critical tools that can assist concerned citizens in bringing it into being.

Youth Culture and Sport Michael D. Giardina 2012-08-06 Youth Culture and Sport critically interrogates and challenges contemporary articulations of race, class, gender, and sexual relations circulating throughout popular iterations of youth sporting culture in late-capitalism. Written against the backdrop of important changes in social, cultural, political, and economic dynamics taking place in corporate culture's war on kids, this exciting new volume marks the first anthology to critically examine the intersection of youth culture and sport in an age of global uncertainty. Bringing together leading scholars from cultural studies, gender studies, sociology, sport studies, and related fields, chapters range in scope from 'action' sport subcultures and community redevelopment programs to the cultural politics of white masculinity and Nike advertising. It is a must read for anyone interested in gaining a better understanding of the role sport plays in the construction of experiences, identities, practices, and social differences of contemporary youth culture.

Old School Still Matters Brian L. Fife 2013-08-12 Can public schools in America be saved? This book considers theory, current practice, and the common school ideal through a historical lens to arrive at practical suggestions for reforming contemporary public education. Despite dramatic, sweeping changes in recent decades, a strong case can be

made for guiding the reformation of contemporary public education in the United States on common school ideology of the nineteenth century. The author argues that the common school remains a public institution capable of preparing America's youth to contribute to the community in a positive manner, and that education must be treated at a public good where all children—regardless of social class—have a right to a quality education. The work includes a thorough overview of Horace Mann's writings on K-12 public education that support the common school ideal—concepts that are over 150 years old, yet still highly relevant today.

Consuming Innocence Karen Brooks 2008 "This is an academic look at the contribution of popular culture to the loss of innocence in today's children."--Publisher.

Raising Your Kids Right Michelle Ann Abate 2010-07-14 Dr. Seuss's classic character the Lorax has delighted children for decades while passing along a powerful message about environmental responsibility. The book's young readers, and their parents, would likely be surprised by the emergence of a new character, Truax, a kindly logger created by a longtime employee of the wood products industry, who, not surprisingly, has a far different viewpoint to share. Yet the Truax character, and the book of the same name, is just one example of a growing genre of conservative-themed narratives for young readers spawned by the continuing strength of the American political right. Highlighting the works of William Bennett, Lynne Cheney, Bill O'Reilly, and others, Michelle Ann Abate brings together such diverse fields as cultural studies, literary criticism, political science, childhood studies, brand marketing, and the cult of celebrity. *Raising Your Kids Right* dispels lingering societal attitudes that narratives for young readers are unworthy of serious political study by examining a variety of texts that offer information, ideology, and even instructions on how to raise kids right, not just figuratively but politically.

9/11 in American Culture Yvonna S. Lincoln 2003-02-04 In response to the events following September 11, a number of leading cultural studies and interpretive qualitative researchers write from their own experiences and hearts. From the poetic to the personal, the theoretical to the historical, their essays by noted scholars Kellner, Fine, McLaren, Richardson, Denzin, Giroux, and others are collected in this volume, and were written in crisis within days and weeks of September 11. The immediacy of their writing is refreshing, and reflects the varied emotional and critical responses that bring meaning to this cataclysmal event.

Cracking Facebook Maria Leena Korpijaakko 2015-10-30 This book presents a Facebook study on members of the Cusp Generation, or those born before the "great digital divide" of 1995. This delineation allows for a discussion on the possible socio-cultural implications of Facebook use for people of all ages. Members of the Cusp Generation are in a unique position as "part digital natives" to easily acquire and use new media technologies, while being more critically aware of the personal, social, and cultural effects that may arise from them thanks to having some memory of the pre-digital era. Drawing on identity theories rooted in critical theory and cultural studies, the author shows that there are potential constrictions on people's agency in their Facebook use caused by consumer discourse, Facebook's hyperreal nature and structure, psychological predispositions, and the potential for avatar attachment. In raising concerns over the impacts of technology-based communication, this book explores how the medium of Facebook extends and exacerbates processes of offline social reproduction and discusses how the positive social and political aspects of Facebook can be enhanced. The findings contribute to academic discussions in the fields of cultural studies and Education and can be applied to the development of critical media literacy for curriculum and pedagogy.

Qualitative Research in the Post-Modern Era Karyn Cooper 2011-11-17 Qualitative Research is changing as a result of postmodern influences which have changed the way research is interpreted and understood. This has prompted questions which have been knocking at the door of qualitative research for some time now: Who is the researcher in this research account? How does the researcher relate to his/her research? How can the researcher who reads qualitative research relate to and understand the nuances and complexities in qualitative research? How can this volume help us to, not only describe, effect and manage change, but help us to understand, imagine and affect policies, practices and procedures related to research? What can we learn from researchers at the top of their stride who have struggled in order to develop qualitative research? The book includes illustrative interviews with world famous scholars. William Pinar, Norman Denzin, Henry Giroux, Zygmunt

Bauman and Maxine Greene invite the student to engage reflectively and to figure out the rudiments and connections of research methodology and methods for theses. The developed so called "The Five Contexts" serves as a theoretical framework for conducting, understanding and interpreting qualitative research in a variety of disciplines in this post-modern era.

Schools, Corporations, and the War on Childhood Obesity Darren Powell 2019-11-26 Challenging the idea that the corporate 'war' against childhood obesity is normal, necessary, or harmless, this book exposes healthy lifestyles education as a form of mis-education that shapes how students learn about health, corporations, and consumption. Drawing on ethnographic research and studies from across the globe, this book explores how corporations fund, devise, and implement various programmes in schools as 'part of the solution' to childhood obesity. Including perspectives from children, teachers, school leaders, and both public and private external providers on how children's health and 'healthy consumption' is understood and experienced, this book is divided into eight accessible chapters which include: Schooling the childhood obesity 'crisis'; The corporate 'gift' of healthy lifestyles; 'Coming together' to solve obesity; Learning about health, fatness, and 'good' choices; and Shaping the (un)healthy child-consumer. *Schools, Corporations, and the War on Childhood Obesity* is the perfect resource for postgraduate students and academics working in the public health or education field, or those taking courses on the sociology of education, health and physical education, curriculum, pedagogy, ethnography, or critical theory, who are looking to gain an insight into the current situation surrounding obesity and health in corporations and schools.

Lost and Othered Children in Contemporary Cinema Debbie C. Olson 2012 Children have been a part of the cinematic landscape since the silent film era, yet children are rarely a part of the theoretical landscape of film analysis. *Lost and Othered Children in Contemporary Cinema*, edited by Debbie C. Olson and Andrew Scahill, seeks to remedy that oversight. Throughout the over one-hundred year history of cinema, the image of the child has been inextricably bound to filmic storytelling and has been equally bound to notions of romantic innocence and purity. This collection reveals, however, that there is a body of work that provides a counter note of darkness to the traditional portraits of sweetness and light. Particularly since the mid-twentieth century, there are a growing number of cinematic works that depict childhood as a site of knowingness, despair, sexuality, death, and madness. *Lost and Othered Children in Contemporary Cinema* challenges notions of the innocent child through an exploration of the dark side of childhood in contemporary cinema. The contributors to this multidisciplinary study offer a global perspective that explores the multiple conditions of marginalized childhood as cinematically imagined within political, geographical, sociological, and cultural contexts.

The Abandoned Generation H. Giroux 2003-05-12 Henry Giroux continues his critique of American culture and the way it impinges on the lives of our children. This time, Henry goes further, looking at the 'Bush Restoration' years, the attacks of September 11th and the way the world has been transformed for our children and young adults.
