Fifty Years at the US Environmental Protection Agency A. James Barnes 2021-02-15 In conjunction with the 50th anniversary of the creation of the Environmental Protection Agency, this book brings together leading scholars and EPA veterans to provide a comprehensive assessment of the agency's key decisions and actions in the various areas of its responsibility. Themes across all chapters include the role of rulemaking, negotiation/compromise, partisan polarization, judicial impacts, relations with the White House and Congress, public opinion, interest group pressures, environmental enforcement, environmental justice, risk assessment, and interagency conflict. As no other book on the market currently discusses EPA with this focus or scope, the authors have set out to provide a comprehensive analysis of the agency's rich 50-year history for academics, students, professional, and the environmental community.

Protecting the Environment During Armed Conflict Elizabeth Mrema 2009 This report inventories and analyses the range of international laws that protect the environment during armed conflict. With a view to identifying the current gaps and weaknesses in this system, the authors examine the relevant provisions within four bodies of international law - environmental humanitarian (IHL), international criminal law (ICL), international environmental law (IEL), and international human rights law (HRL). The report concludes with twelve concrete recommendations on ways to

strengthen this legal framework and its enforcement. The Environment and Natural Resources are crucial for building and consolidating peace, it is urgent that their protection in times of armed conflict be strengthened. There can be no durable peace if the natural resources that sustain livelihoods are damaged or destroyed. This report provides a basis upon which Member States can draw upon to clarify, expand and enforce international law on environmental protection in times of war.

Safeguarding and Child Protection in the Early Years Catherine Rushforth 2012-01-01 Safeguarding in the Early Years is an accessible guide that explains how to best protect and safeguard young children in a straightforward way. Based on a tested, practice-based model developed by the author Catherine Rushforth, over her many years spent improving safeguarding practice in early years settings, this title includes recommendations from key governmental reviews from 2011, such as the Munro, Tickell, Field and Plymouth case reviews. Safeguarding in the Early Years is designed to inform all those working with young children on the best ways to reduce risk in child protection and provide a safe environment for young children. This title covers: -Understanding and acting on what you see, including potential abuse within the setting, to ensure effective early intervention -Designing and implementing a professional code for behaviour and conduct - Carrying out a risk analysis

Manual for the implementation of environmental, health, and safety standards

for the control of locusts Menoum, S.O.E., Everts, J.W. 2022-09-15 The Environmental, Health and Safety (EHS) Standard Operation Procedures (SOP) for the control of the Desert Locust define the procedures that should be followed in a Desert Locust control campaign to minimize the impact of the use of insecticides on human health and the environment. This Manual for the implementation of SOPs for EHS has been developed to support the person responsible for the implementation of EHS at the National Locust Control Unit (NLCU). The Manual should facilitate the programming of activities to be carried out, structure the documentation of the state of implementation, and allow relatively easy monitoring of the extent to which the EHS has been achieved by the managers of the NLCU or by third parties. The Manual presents a "model approach" for the implementation of the EHS. However, this approach is flexible and should not be applied too rigorously but adapted to the national situation and the specific organization of NLCU. The objectives of the Manual are to: ?clarify responsibilities for the implementation of each Standard Operation Procedure (SOP); ?plan the activities to be carried out; ?allow the internal monitoring of the implementation process; ?ensure complete documentation of the implementation process; ?facilitate the external audit; and ?allow an easy adaptation to the national situation

2017 Press Conference Records of Ministry of Environmental Protection, the People's Republic of China Min. of Environmental Protection of RPC 2019-05-29 This book introduces readers to the press release work carried out by China's Ministry of Environmental Protection in 2017. The routine press release work in 2017 was first launched by the Ministry of Environmental Protection (MEP). In 2017, 12 directors of the MEP and three directors of the Environmental Protection Department of the Beijing-Tianjin-Hebei Tribune came together to answer citizens' questions on key social issues such as Environmental Quality Monitoring, Prevention of Air Pollution, Ecosystem Protection, Water Pollution Prevention, Environmental Supervision, Legal Enforcement etc. This book will provide readers with an overview of China's environmental protection

policy initiatives, help raise public awareness of the environment, and lay the foundation for all citizens to participate in environmental governance.

Safeguarding the Environment in Mining Development Projects Eugene Shannon

2020-11-09 SAFEGUARDING THE ENVIRONMENT IN MINING DEVELOPMENT PROJECTS Safeguarding the Environment in Mining Development gives a description of the role the extractive industry plays in the economic sector of most developing countries. It also describes the activities of Transnational Corporations (TNCs) in this sector. Topics explored include the impacts on the economy, employment generation, technology transfer and environmental damages as a result of poor mitigation measures to address externalities as a result of improper effluent disposal. This Manual (Book) further indicates that TNCs must come to realize that environmental regulations should not only become a payment part of the business climate of industrialized countries, but must also be a part of the developing countries and that in the long run cooperation is more productive than opposition. The Author, a Professor of Geological and Environmental Sciences, also emphasizes that cooperative or bilateral efforts by both TNCs and governments of developing countries are absolutely necessary for the effectiveness of safeguarding the environment. Introduction to Environmental Management
Brian Waters 2020-04-16 This book is directly
aligned to the NEBOSH Certificate in
Environmental Management, which is a
qualification aimed primarily at those in
business who influence the environmental
performance of their organisation by the
decisions that they make as managers or the
actions that they take as operators. This book
aims to provide an introduction to the main
areas of concern and how the challenges can be
addressed. This new edition takes account of
recent changes in international guidance and
legislation and the recent update of the

International Standard in Environmental
Management ISO 14001. The contents are
important for businesses that wish to stay within
the law and avoid adverse publicity. It explains
how the concept of sustainability can be
achieved in practice and what benefits –
especially financial – that can accrue. Recent
developments in the definitions of sustainability
and the growing interest in the circular economy
are introduced. It pays to be ahead of the game
because decisions made now need to reflect an
awareness of the coming pressures and there
are opportunities available that can bring other
benefits. This book is intended for candidates for
the NEBOSH qualification, but it will also be
useful to anyone who wishes to understand the
problems and how they can be tackled within
their own organisations, be they industry, public
service, voluntary bodies, or even as individuals.

**International Law and the Protection of
Humanity** Pia Acconci 2016-12-15 This
challenging volume contains articles by a wide
variety of well-known scholars and practitioners,
and deals with human rights, international
humanitarian law, international criminal law and
humanitarian assistance, as well as other areas
of international law relating to the protection of
humanity. These are topics to which Flavia
Lattanzi, in whose honour the volume is being
published, has made an outstanding contribution
and to which she has given her determined and
unrelenting professional and personal
commitment. As a former Professor at the
Universities of Pisa, Sassari, Teramo and Roma
Tre and as Judge ad litem at the International
Tribunal for Rwanda and the International
Tribunal for the Former Yugoslavia, she has
adhered constantly to a number of important
principles, as reflected in the research contained
in this volume. They include the firm conviction
that respect for human rights is an indispensable
precondition for durable peace; the notion that
grave breaches of human rights, including the
refusal to provide assistance to populations in
distress, can imply a threat to international
peace and security; and that guarantees against
human rights violations include the question of
the punishment of core crimes under
International Law.

*Dictionary & Thesaurus of Environment, Health
& Safety* US Dept of Energy 2023-09-15

Dictionary & Thesaurus of Environment, Health & Safety is the first and only dictionary/thesaurus to focus on the usage and structure of environment, health, and safety terminology. Containing nearly 600 pages, this book features thousands of terms that may be hard to find in any other reference source. Thesaurus terms are presented under broad subject categories, and all acronyms found in the thesaurus are listed with their reciprocal phrases. A separate section features a mini-thesaurus for Department of Energy vocabulary. ANSI standards were used to construct the thesaurus, and definitions are included for most terms, with acronyms indicating the source(s) of the definitions. Dictionary & Thesaurus of Environment, Health & Safety provides a semantic structure for environment, health, and safety terminology and will prove invaluable for anyone involved in the management of programs and information systems that use these terms.

Safeguarding Adults Online Bond, Emma 2022-07-01 This much-needed volume fills an overlooked gap in adult safeguarding - the digital arena - in providing a comprehensive overview of policy and practice in supporting vulnerable adults online. Providing an essential analysis illustrated by recent court rulings and case studies, the authors advocate for the effective support of adults with learning disabilities and/or mental capacity issues in their digital lives without compromising their privacy and participation rights. The text balances a theoretical exploration of the tensions between participation and protection, legislation, human rights, professional biases and social wrongs. It encourages a critical approach in adopting both a practical and realistic understanding for policy makers, professionals and students in social work, law and adult social care.

This book is a collection of research papers contributed by

ASEAN and China scholars who attended NACT Working Group Meeting on Regional Cooperation for Sustainable Energy Development on April 16, 2019 and NACT Working Group Meeting on Environmental Protection in ASEAN and China on May 17, 2019. The contributing scholars give their ingenious and insightful thoughts on ASEAN-China energy and environmental protection cooperation from either a national or a regional perspective. Two NACT Working Group Reports are also incorporated in the appendices of this book, including innovative and practical policy recommendations on strengthening ASEAN-China sustainable energy and environmental protection cooperation in existing priority areas and identifying new ones.

Safeguarding the Environment Sean Connolly 2007 Sean Connolly explains how rights that we have in today's society were won, often against fierce opposition. The clear text includes many first-hand accounts and quotes. He also includes coverage of issues that are current and on-going.

Safeguarding Children Living with Trauma and Family Violence Stephen Pizzey 2009-04-15 Offering a systematic approach to evidence-based assessment and planning for children living with trauma and family violence, this practical book shows how to assess and analyse the needs of the child, make specialist assessments where there are continuing safeguarding concerns (using the Assessment Framework) and plan effective child-centred and outcome-focused interventions. The authors analyse the impact of exposure to a climate of trauma and family violence on a child's bioneurological development and on their capacity to form attachments and to develop and reflect on relationships through childhood and adolescence into adulthood. They bring together the assessment of children in need with the evaluation of significant harm and risk, and potential for rehabilitation, and also explore the application of evidence-based approaches to intervention. This book is an essential tool for all front-line practitioners working with child

protection, including social workers, child and adolescent mental health practitioners, police officers, probation workers and domestic violence organizations. It is also suitable for undergraduate, postgraduate and post-qualifying students.

Good Practice in Safeguarding Children

Hilary Owen 2009-01-15 Good Practice in Safeguarding Children considers how front-line professionals can keep the best interests of the child at the heart of their work when statutory guidance, the way agencies are integrated and the delivery of services are changing. Liz Hughes and Hilary Owen have drawn together contributors' experiences of working with safeguarding children on a broad range of issues, including neglect, trafficked children, parents with learning difficulties and child protection supervision. The contributors discuss current dilemmas in safeguarding children work and provide models of good practice, including case scenarios and exercises. This book explores how changes in the system offer an opportunity to enhance the quality of service provision, to achieve better outcomes for children and their families. This book is a must-read book for all front-line practitioners involved in safeguarding children, including social workers, child and adolescent mental health practitioners, police officers, healthcare professionals, probation workers and teachers. It is also suitable for undergraduate, post-graduate and post-qualifying students.

Planetary Health Andy Haines 2021-07-22 We live in unprecedented times - the Anthropocene - defined by far-reaching human impacts on the natural systems that underpin civilisation. Planetary Health explores the many environmental changes that threaten to undermine progress in human health, and explains how these changes affect health

outcomes, from pandemics to infectious diseases to mental health, from chronic diseases to injuries. It shows how people can adapt to those changes that are now unavoidable, through actions that both improve health and safeguard the environment. But humanity must do more than just adapt: we need transformative changes across many sectors - energy, housing, transport, food, and health care. The book discusses specific policies, technologies, and interventions to achieve the change required, and explains how these can be implemented. It presents the evidence, builds hope in our common future, and aims to motivate action by everyone, from the general public to policymakers to health practitioners.

The Use of Nuclear Weapons and the Protection of the Environment during International Armed Conflict

Erik V Koppe 2008-04-25 In 1996, the International Court of Justice delivered an Advisory Opinion on the legality of the use of nuclear weapons in which the Court stated that "while the existing international law relating to the protection and safeguarding of the environment does not specifically prohibit the use of nuclear weapons it indicates important environmental factors that are properly to be taken into account in the context of the implementation of the principles and rules of the law applicable in armed conflict." The present work analyses this conclusion, focusing on the question whether or not the use of nuclear weapons during international armed conflict would violate existing norms of public international law relating to the protection and safeguarding of the environment. Although the use of weaponry during armed conflict is usually related to the protection of individuals, the rapidly emerging appreciation of, and the worldwide realization of the intrinsic value of, the natural environment as an indispensable asset for the continuation of life, including human life, on this planet, both for present and future generations, warrants a thorough and extensive examination of the

question of the (il)legality of the employment of nuclear weapons from the point of view of international environmental protection law. The book consists of two parts. Part I discusses the historical development and the effects of nuclear weapons; Part II discusses the protection of the environment during international armed conflict under *ius in bello*, *ius ad bellum* and *ius pacis*. Only then is it possible to assess the legality of the use of nuclear weapons under this particular set of rules.

Chemistry for Protection of the Environment 1985 G. Alaerts 1986-01-01 The main theme of this symposium was the application of chemical methods for water and wastewater treatment and their effect on the environment. The participants represented many countries and many disciplines and, taken together, their papers provide a very interesting overview of the way in which chemical processes are used in different parts of the world. The contributions from the USA are mainly devoted to methods for reducing the environmental hazard of alternative energy sources such as oil shales and tar sands. A fresh interest in coal and lignite is also apparent in the papers from Canada and from western and eastern Europe. Many papers and discussions deal with the related technology of desulphurisation of coal and oil during combustion or in exhaust gases, much of the research in this area being inspired by the problems of acid rain and the damage to forests in the northern hemisphere.

Environmental Crime and Biodiversity. A Maltese Context Kimberley Bartolo 2020-12-03 Essay from the year 2019 in the subject Politics - Environmental Policy, grade: 80.00, University of Malta (Faculty for Social Wellbeing), course: B.A. (Hons) Social Wellbeing Studies, language: English, abstract: This paper deals with the topic of environmental crime and biodiversity crime. After a short introduction the interplay between environmental law and policy is analyzed. Furthermore, the current regulatory framework and its effectiveness in safeguarding and enhancing the environment is examined. Lastly, the framework and its effectiveness in ensuring

the sustainable development of Malta's urban, rural, coastal and marine area is inspected. Safeguarding the environment should be a major concern for every human being. This is because if it is not protected, future generations will not be able to enjoy such a planet as it is known today. There are various laws and policies which regulate and enforce the protection of the environment, with the help of several legal tools. Both people and organizations, as well as the government, should focus upon safeguarding the environment in the best ways possible. In fact, Chapter 549 of the Laws of Malta states that, "it shall be the duty of every person to protect the environment" and, "it shall be the duty of the Government to protect the environment for the benefit of the present and future generations." Environmental crime is a type of crime in which the offender endangers the physical safety or health of a person, as well as the environment, thus is subject to criminal prosecution since the person breached the law. Such crimes are often portrayed as being victimless, however they are not. There are different forms of Environmental crime, which include in illegal development, illegal dumping, overfishing, illegal hunting and hunting for protected species

Greening the Civil Codes: Comparative Private Law and Environmental Protection

Sabrina Lanni 2023-05-12 This book examines the greening of civil codes from a comparative perspective. It takes into account the increasing requirements of supranational rules, which favour measures to reduce global warming and its negative environmental impacts; it discusses

the necessity to expand distributive justice given the current ecological emergency; and it reflects on which private law legal tools potentially may be employed to defend nature's interests. The work fills a gap in the growing literature on developing rights of nature and ecosystem in transnational law. While the focus is on the environmental issues pertaining to the new civil codes and new projects of civil codes, the book promotes interdisciplinary research applicable to a range of environmental and natural resources-focused courses across the social sciences, especially those related to comparative law systems, legal anthropology, legal traditions in the world, political science and international relations.

When the going gets rough, the rough . . . start raising their own food. In the first full-color guide of its kind, author and small farm owner Laura Childs reveals exactly what it takes to start raising your own animals, including chickens, geese, goats, sheep, pigs, and cows. Childs discusses what you can expect to harvest from your animals—from eggs to milk to meat to wool—based on her own real-life experiences. Whether you want to raise a few chickens for eggs alone, try your hand at a few goats with the aim to make your own cheese, or are looking to sustain your family and make some extra money from raising and selling beef, this is the book for you. Childs offers general information for each breed and animal, from how to get started to what to feed and where to house the animals. This invaluable guide is the perfect first book for anyone interested in starting a backyard barnyard or a small farm—or simply dreaming

about the idea.

The Common-Sense Guide to Improving the Safeguarding of Children Terry McCarthy 2015-02-21 Aiming to provide purpose and direction in a complex field of work, this book offers direct and straightforward guidance on how to improve child protection on the frontline. Terry McCarthy draws directly from his own extensive practice experience to outline three steps to achieve improved outcomes. First, he explains how to establish an effective culture which develops learning on relationships and styles of authority. Second, he identifies how to support social workers to create a stable, skilled and confident workforce, equipped to deal with emotional challenges. Third, he outlines strategies to enable families to change, with useful techniques for working alongside families to make sure the needs of the child are being met. This approach aims to help children to live safely and well within their own families. This practical guide serves as a guiding compass through the dilemmas and conflicts of child protection practice, and will be valued by frontline social work managers and practitioners alike.

Environmental Rights Steve Vanderheiden 2017-07-05 The essays selected for this volume present critical viewpoints from the debate about the need to establish rights on behalf of greater environmental protection. Three main areas for developing environmental rights are surveyed, including: extensionist theories that link existing rights (for example to subsistence or territory) to threats of harm from exacerbated

resource scarcity, pollution or rapid environmental change; proposals for rights to specified environmental goods or services, such as rights to a safe environment and the capacity to assimilate greenhouse gas emissions; and rights that protect the interests of parties not currently recognized as having rights, including nonhuman subjects, natural objects and future generations. This volume captures the potential for and primary challenges to the development of rights as instruments for safeguarding the planet's life-support capacities and features proposals and analyses which argue the need to create an avenue of recourse against ecological degradation, whether on behalf of human or nonhuman right holders.

International Trade and the Protection of the Environment Simon Baughen 2023-03-31 Analyzing globalization and the increasing tension it has caused between the goals of free trade and environmental protection, International Trade and the Protection of the Environment provides a comprehensive and detailed legal analysis, both at the national and international level of what looks set to become the new legal order of the twenty-first century. This book asks the questions does the treatment of 'measures tantamount to expropriation' have the capacity to lead to a 'regulatory chill' on environmental protection and what are the possibilities for claims before the UK courts that are based on alleged violations of international law? To answer them the author offers: an informed and critical commentary on the continuing controversy on GMO products, in particular on the recent WTO award in the EC-Biotech dispute a comparison of the treatment of the expropriation under NAFTA and bilateral investment treaties with position under article one of the first protocol of the European convention on human rights an analysis of the human rights dimension to claims for

environmental damage against multi-national corporations, focusing particularly on claims in the US under the Alien Tort Claims Act 1789. Incisive and current, this text is a valuable tool for postgraduate law students studying international and commercial law.
