Blood of the Earth Kevin A. Young 2017-02-14 Conflicts over subterranean resources, particularly tin, oil, and natural gas, have driven Bolivian politics for nearly a century. "Resource nationalism"—the conviction that resource wealth should be used for the benefit of the "nation"—has often united otherwise disparate groups, including mineworkers, urban workers, students, war veterans, and middle-class professionals, and propelled an indigenous union leader, Evo Morales, into the presidency in 2006. *Blood of the Earth* reexamines the Bolivian mobilization around resource nationalism that began in the 1920s, crystallized with the 1952 revolution, and continues into the twenty-first century. Drawing on a wide array of Bolivian and US sources, Kevin A. Young reveals that Bolivia became a key site in a global battle among economic models, with grassroots coalitions demanding nationalist and egalitarian alternatives to market capitalism. While US-supported moderates within the revolutionary regime were able to defeat more radical forces, Young shows how the political culture of resource nationalism, though often comprising contradictory elements, constrained government actions and galvanized mobilizations against neoliberalism in later decades. His transnational and multilevel approach to the 1952 revolution illuminates the struggles among Bolivian popular sectors, government officials, and foreign powers, as well as the competing currents and visions within Bolivia's popular political cultures. Offering a fresh appraisal of the Bolivian Revolution, resource nationalism, and the Cold War in Latin America, *Blood of the Earth* is an ideal case study for understanding the challenges shared by countries across the Global South.

Nation, State and the Economy in History Alice Teichova 2003-05-08 Originally published in 2003, this book addresses the rarely explored subject of the reciprocal relationships between nationalism, nation and state-building, and economic change. Analysis of the economic element in the building of nations and states cannot be confined to Europe, and therefore these diverse yet interlinked case-studies cover all continents. Authors come to contrasting conclusions, some regarding the economic factor as central, while others show that nation-states came into being before the constitution of a national market. The essays leave no doubt that the nation-state is an historical phenomenon and as such is liable to 'expiry' both through the process of globalisation and through the development of a 'cyber-society' which evades state control. By contrast, developments in southeastern Europe, the former USSR, and parts of Africa and the Far East show that building the nation-state has not run its course.

An Economic History of Twentieth-Century Latin America E. Cardenas 2000-11-09 This book explores the impact on Latin America of the extraordinary transformation of the international economy that took place in the half century or so that preceded the world depression of the 1930s. The authors show how the response varied in terms of both growth and distribution, shaped by varying preconditions, and by natural resources and geography. The interplay of economic developments with political and social structures had profound and varied effects on policy-making and on institutions that were of great significance for later decades.

Bureaucracy and Politics in Mexico Eduardo Torres Espinosa 2018-12-12 First published in 1999, the main theme of this book is the relationship between bureaucracy and politics in Mexico. This examined through a study of the Secretariat of Programming and Budget, which came into existence in 1976 and was abolished in 1992. The book charts the rise and fall of the Secretariat over three presidential terms and gives an explanation of the chain of events that led to its disappearance. In doing so it underlines the significant impact that institutional and bureaucratic factors have on group politics in contemporary Mexico.

Welfare, Poverty and Development in Latin America Christopher Abel 2015-12-30 The book analyzes the social consequences of recent development strategies in Latin America. The volume introduces readers to official strategies, private initiatives and individual responses to issues of welfare and poverty during the twentieth century. A substantial introduction is followed by a wide range of case-studies, including Pinochet's Chile, the Haiti of the Duvaliers and Nicaragua under the somocistas and sandinistas, as well as Brazil, Mexico, the Argentine, Cuba and Colombia.

Populism in Twentieth Century Mexico Amelia M. Kiddle 2022-07-12 Mexican presidents Lázaro Cárdenas (1934–1940) and Luis Echeverría (1970–1976) used populist politics in an effort to obtain broad-based popular support for their presidential goals. In spite of differences in administrative plans, both aimed to close political divisions within society, extend government programs to those on the margins of national life, and prevent foreign ideologies and practices from disrupting domestic politics. As different as they were in political style, both relied on appealing to the public through mass media, clothing styles, and music. This volume brings together twelve original essays that explore the concept of populism in twentieth century Mexico. Contributors analyze the presidencies of two of the century's most clearly populist figures, evaluating them against each other and in light of other Latin American and Mexican populist leaders. In order to examine both positive and negative effects of populist political styles, contributors also show how groups as diverse as wild yam pickers in 1970s Oaxaca and intellectuals in 1930s Mexico City had access to and affected government projects. The chapters on the Echeverría presidency are written by contributors at the forefront of emerging scholarship on this topic and demonstrate new approaches to this critical period in Mexican history. Through comparisons to Echeverría, contributors also shed new light on the Cárdenas presidency, suggesting fresh areas of investigation into the work of Mexico's quintessentially populist leader. Ranging in approach from environmental history to labor history, the essays in this volume present a complex picture of twentieth century populism in Mexico.

Undocumented Mexicans in the USA David M. Heer 1990-11-30 When this volume was published in

1990, undocumented Mexican immigrants had become an important component of the US population. In this book the author analyzes the results of a unique survey conducted in Los Angeles County, where an estimated 44 percent of the undocumented Mexican population lived. The survey allows the author to make comparisons among the groups of undocumented and legal Mexican immigrants and to study the effects of legal status on their living conditions. The author also examines the findings of a number of other social scientists, providing a comprehensive summary of the data on undocumented Mexicans in the US. In his conclusion, he turns to an evaluation of policy options for incorporating this group into the US population and for immigrants. The book will be useful to sociologists and other social scientists as well as to lawyers and policy experts studying the problem of illegal immigrants.

The Economic Development of Latin America in the Twentieth Century André A. Hofman 2000 Hofman, a researcher with the Chile-based Economic Commission for Latin America and the Caribbean, uses growth accounting methods and previously unavailable long-term series data to assess the economic performance of the region during the century from a comparative and historical perspective. In particular he compares Latin American economies to those of advanced capitalist economies, to newly industrialized economies, and to Spain and Portugal because of the historical ties. He looks at the reasons for the poor or negative growth during the 1980s and the apparent recovery in the 1990s and at such problems as debt, income inequality, high inflation, cyclical instability, and political and policy instability. Crisis In Central America Nora Hamilton 2019-04-11 In the early years of the recent Central American crisis, analysts often predicted a rapid, dramatic resolution—whether by revolutionary victory or through military intervention by the United States. The 1980s, however, have witnessed an intensification of conflicts with increasing U.S. involvement. Rather than standing at the brink of a sharp turning point, Central America is at an interim point in an evolving historical process. This text provides an assessment of this process and of its immediate and long-term implications for the region and for U.S.-Latin American relations. It focuses on the complex and contradictory effects of the Reagan administration's efforts to influence the Central American debate within the United States and to reestablish U.S. hegemony in the region itself. The first part of the book examines the development of various aspects of U.S. policy toward Central America. In particular, contributors discuss the interaction between the executive and legislative branches in shaping U.S. strategy, the implications for constitutional democracy of presidential control over foreign policymaking, the treatment of Central American refugees, the counterinsurgency strategy of "low intensity warfare," and the effects of U.S. policy on regional peace initiatives put forward by Mexico and other Latin American countries. In the second part, contributors analyze external pressures on Central American countries and regional dynamics. They begin with a discussion of the economic crisis—aggravated by conflicts in the region—and regional integration. Other topics include the ambiguous

position of the Catholic church, Guatemala's "hidden war," "demonstration elections," the changing balance of forces in El Salvador, and the obstacles Nicaragua faces in constructing a new economic development model. Nora Hamilton is associate professor of political science and Linda Fuller is assistant professor of sociology at the University of Southern California. Jeffrey A. Frie

The Urban Caribbean Alejandro Portes 1997-06-03 A study of urbanization in five countries—Costa Rica, Haiti, Guatemala, the Dominican Republic, and Jamaica—during the 1980s and 1990s when the region's economy shifted from one heavily dependent on imports to one directed more to producing exports. The Urban Caribbean studies urbanization in five countries—Costa Rica, Haiti, Guatemala, the Dominican Republic, and Jamaica—during the 1980s and 1990s when the region's economy shifted from one heavily dependent on imports to one directed more to producing exports. This shift caused producers and entrepreneurs to rely more on microenterprises, thus challenging the informal economy networks of the central cities. Sociologist Alejandro Portes and the other contributors use rich, in-depth data to examine both qualitative and quantitative changes in these five countries. Their research method allows them to make generalizations applicable to all five economies while retaining the concreteness of the similarities and differences that make each country unique. "This volume is an incentive to other collaborative efforts to chart the paths taken by the countries of Latin America and the Caribbean as they seek to accommodate to the new global political and economic context . . . The message of the volume is a convincing one. Because of similarities in the trends affecting countries of the region and policy debates, each country can benefit from the experiences of the others. However, the differences in political structure and in the nature of citizenship mean that social and economic policy debates must take into account the national context."—from the Foreword, by Bryan Roberts, University of Texas-Austin

Migration, Urbanization, and Development Richard E. Bilsborrow 1998 Internal migration and urbanization are key dimensions of the process of socioeconomic development. The unprecedented movement of peoples within the borders of their own countries is one of the greatest transformations witnessed in the 20th century. Policy analysts, especially those from developing countries where internal migration can be felt at first hand, view migration as one of the most important factors affecting the course of development. It is within this context that UNFPA convened the Symposium on Internal Migration and Urbanization in Developing Countries in January 1996 in preparation for the United Nations World Conference on Human Settlements in Istanbul in June 1996. The final results of the symposium are found in this book. This volume provides a better understanding, at global level, of internal migration issues of concern to policy analysts.
