Mongers in Heaven Jacobo Schifter 2007 Mongers in

Heaven is an exploration of "Monger Culture." Mongers, as defined by the author in relation to sexual tourism to Costa Rica, are tourists and expatriates who have developed a unique culture of simulation, lying, marriages, gender games, and sexual liberation. Schifter-Sikora analyzes the relatively new phenomenon of American senior citizens mass-traveling to Central America in search of sex and love from prostitutes. The social and economic impact of their travel, as well as the increase in new HIV infections in the U.S. and the Central American countries, is at the core of Schifter-Sikora's analysis. The author also makes a unique psychological analysis that includes both the sex worker and her American client and their mutual aspirations and disappointments. The study features unique quantitative data on this population of sex workers and clients and the group's reasons for and expectations of sexual tourism. Also under analysis by Schifter-

Sikora, is Jean Baudrillard's theory of simulation and simulacra, here in relation to the disappearance of the "real" in sexual tourism. American sex tourists are creating a sexual culture where truth is no longer relevant or desired. Costa Rican sex workers, for their part, hope for the traditional "real" that the Americans are escaping from. Both groups are turning a former Banana Republic into a sexualized fantasy land where women who charge are lovers and prospective wives, and those who do not are seen as the real prostitutes.

**Sex Secrets** Neil M. Orr 2005 'Secrets' is a guide to sexuality for Southern African teenagers that is quite unlike anything published before. It was developed from specific questions raised during AIDS Action roadshows conducted by the authors, which drew in a million and a half kids around the region.

**Youth, AIDS and Sexually Transmitted Diseases** Anne Mitchell 2020-03-25 What has been the impact of AIDS and

sexually transmitted diseases on the lives of young people? **Youth, AIDS and Sexually Transmitted Diseases** provides a comprehensive overview of research and policy in this increasingly important area. The book describes the worldwide incidence and prevalence of sexually transmitted diseases among adolescents and examines how their sexual behaviour has changed as a result of the threat of AIDS. It also looks at young people's knowledge and attitudes about their own sexual health, as well as the usefulness of models in predicting those at risk. The authors also discuss the effectiveness of institutional policies in educating young people and in preventing sexually transmitted diseases. **Youth, AIDS and Sexually Transmitted Diseases** will be of considerable benefit to health care providers, sex educators and all those who work with and study adolescents. **AIDS & HIV** Daniel Jussim 1997 No one is safe against the deadly threat of HIV infection and AIDS, it affects people of

all races, religions, and ancestries. Daniel Jussim discusses the history of the disease, its transmission, and the effect it has on young people today. A very frank discussion for mature teens. Includes chapter notes, hotlines or names of helpful organizations, further reading list, and index.

**Choices** Jeffrey S. Nevid 1995  
You probably know that HIV, the AIDS virus, is a killer, but how familiar are you with the risks associated with other sexually transmitted diseases (STDs)? Chlamydia, one of the most prevalent, can go undetected for years and cause internal damage leading to infertility in women. The virus that causes genital warts has been linked to genital cancers in men and women. About one in every six people in the United States is infected with an STD and nearly one half of those infected are under 25. AIDS is only part of the story of the STD epidemic. In this highly readable question and answer book, you'll find the information you need to

understand and guard against the transmission of AIDS and other STDs. This concise book answers questions you may have hesitated to ask even your doctor, including how each STD is diagnosed and treated. The book is forthright, direct, non-judgmental, and informative in its approach.

*Mountains Beyond Mountains*

Tracy Kidder 2009-08-25 NEW YORK TIMES BESTSELLER •

"[A] masterpiece . . . an astonishing book that will leave you questioning your own life and political views."—USA Today "If any one person can be given credit for transforming the medical establishment's thinking about health care for the destitute, it is Paul Farmer. . . . [Mountains Beyond Mountains] inspires, discomferts, and provokes."—The New York Times (Best Books of the Year)  
In medical school, Paul Farmer found his life's calling: to cure infectious diseases and to bring the lifesaving tools of modern medicine to those who need them most. Tracy Kidder's magnificent account shows

how one person can make a difference in solving global health problems through a clear-eyed understanding of the interaction of politics, wealth, social systems, and disease. Profound and powerful, Mountains Beyond Mountains takes us from Harvard to Haiti, Peru, Cuba, and Russia as Farmer changes people's minds through his dedication to the philosophy that "the only real nation is humanity." HIV/AIDS in South Africa S. S. Abdool Karim 2010-06-17 This second edition of the book provides up-to-date information on new drugs, new proven HIV prevention interventions, a new chapter on positive prevention, and current HIV epidemiology. This definitive text covers all aspects of HIV/AIDS in South Africa, from basic science to

medicine, sociology, economics and politics. It has been written by a highly respected team of South African HIV/AIDS experts and provides a thoroughly researched account of the epidemic in the region. Power Parents Kopo Doran 2012-05-18 Times have changed rapidly and drastically. The 21st century is not the Botswana of even 15 years ago. Raising children in the age of HIV, AIDS and other Sexually Transmitted Illnesses (STIs) is tremendously challenging. More than ever it is crucially important for parents and parents-to-be to be fully aware of the needs of children and teens when considering issues of sexual health, illnesses and behavior. WE CANNOT WAIT. Our children and teens need us NOW! Today's parents cannot rely on the old ways of parental behavior. The Botswana cultural practice of parents not talking directly with their children, talking in metaphors, and avoiding issues of sexuality is no longer safe--the stakes are too high. It is too dangerous for our children to

face the challenges of making smart sexual decisions without accurate information, sound guidance and strong moral principles. Each of us must become a Power Parent to our children. Students, you can help your parents now by reading and discussing this book with them. Also, many of you will become parents yourselves. You can prepare yourselves to be parents who give your children the best opportunity for health and success by understanding the dialogues suggested in this book. A Power Parent utilizes the best of what is already known about raising children, while learning new ideas, approaches and techniques. Besides being a guide book, this is the story of Kefentse and Tsiamo. Their story provides a roadmap for parents in helping children grow into adults who are healthy, happy and confident in their roles as men and women. Kefentse and Tsiamo have the same challenges that all parents and couples face. It took courage on their part to become Power Parents, and the

road was difficult. But let's begin their story.....

Factors Associated with Safe-sex Behavioral Intention in People Living with HIV/AIDS

Robertson Nash 2016

**Men Who Sell Sex** Peter Aggleton 2006-12-05 Men Who Sell Sex is the first

comprehensive international account of male prostitution and AIDS. While much is known about female prostitution and sex work, relatively little is known about men who sell sex - either to women or other men. This book brings together an authoritative collection of essays from different countries and examines sexual behaviour, the reasons men sell sex, the meanings involved, and implications for HIV prevention. The authors are all experts in their fields and individual chapters offer a compelling description of the reasons men sell sex and the pleasures and risks involved.

**What Do Gay Men Want?**

David Halperin 2010-04-20 "Compelling, timely, and provocative. The writing is

sleek and exhilarating. It doesn't waste time telling us what it will do or what it has just done— it just does it.” — Don Kulick, Professor of Anthropology, New York University

How we can talk about sex and risk in the age of barebacking— or condomless sex— without invoking the usual bogus and punitive clichés about gay men's alleged low self-esteem, lack of self-control, and other psychological “deficits”? Are there queer alternatives to psychology for thinking about the inner life of homosexuality? What Do Gay Men Want? explores some of the possibilities. Unlike most writers on the topic of gay men and risky sex, David Halperin liberates gay male subjectivity from psychology, demonstrating the insidious ways in which psychology's defining opposition between the normal and the pathological subjects homosexuality to medical reasoning and revives a whole set of unexamined moral assumptions about “good” sex and “bad” sex. In particular,

Halperin champions neglected traditions of queer thought, including both literary and popular discourses, by drawing on the work of well-known figures like Jean Genet and neglected ones like Marcel Jouhandeau. He shows how the long history of of gay men's uses of “abjection” can offer an alternative, nonmoralistic model for thinking about gay male subjectivity, something which is urgently needed in the age of barebacking. Anyone searching for nondisciplinary ways to slow the spread of HIV/AIDS among gay men— or interested in new modes of thinking about gay male subjectivity— should read this book. David M. Halperin is W. H. Auden Collegiate Professor of the History and Theory of Sexuality, Professor of English, Professor of Women's Studies, Professor of Comparative Literature, and Adjunct Professor of Classical Studies at the University of Michigan.

**Learning to Trust** Paul Sendziuk 2003 2003 marks the twentieth anniversary of the first case of HIV-AIDS in

Australia. Despite an initial climate of panic and stigmatisation, the country developed a pragmatic and innovative response to AIDS. Working from an extensive array of documents and interviews with key participants, Australia's response to the epidemic is examined to establish why it has been one of the most effective responses in the world.

*AIDS and Adolescents* Lorraine Sherr 1997 This text provides insight into a wide range of adolescent issues. A series of contributions examines facts and fictions associated with adolescent risk, challenging some of the basic current notions underpinning approaches to the subject.

*Risky Sex* Dwayne Curtis Turner 1997 *Risky Sex* critiques this reasoning through an exploration of the actual lifestyles and sexual behaviors of men in this age group. Using as its base a study of the gay community of West Hollywood, California, this book profiles seven gay

men who have engaged in risky sex, whether in a monogamous relationship or in other social contexts.

*Gay Men, Sex and HIV in New Zealand* Heather Worth 2003 The gay community has experienced the greatest impact of AIDS in New Zealand. Through the two decades since the HIV epidemic struck here, gay and bisexual men have had to come to terms with death: either their own or that of their friends and loved ones. They have had to reinvent sexual practice and learn to keep themselves and their partners safe. This book tells the story of that journey. It aims to give the reader an overview of gay men's lives in the era of AIDS, their sexual practices and the strategies they have used in dealing with the epidemic. It uses data, both qualitative and quantitative, gathered by the author and other researchers from a range of projects that investigate the hard facts about gay men's response to the virus as well as their personal stories.

*Disease Control Priorities, Third Edition (Volume 6)* King K. Holmes 2017-11-06

Infectious diseases are the leading cause of death globally, particularly among children and young adults. The spread of new pathogens and the threat of antimicrobial resistance pose particular challenges in combating these diseases. Major Infectious Diseases identifies feasible, cost-effective packages of interventions and strategies across delivery platforms to prevent and treat HIV/AIDS, other sexually transmitted infections, tuberculosis, malaria, adult febrile illness, viral hepatitis, and neglected tropical diseases. The volume emphasizes the need to effectively address emerging antimicrobial resistance, strengthen health systems, and increase access to care. The attainable goals are to reduce incidence, develop innovative approaches, and optimize existing tools in resource-constrained settings.

Consolidated Guideline on Sexual and Reproductive

Health and Rights of Women Living with HIV World Health Organization 2017-02-20

he starting point for this guideline is the point at which a woman has learnt that she is living with HIV and it therefore covers key issues for providing comprehensive sexual and reproductive health and rights-related services and support for women living with HIV. As women living with HIV face unique challenges and human rights violations related to their sexuality and reproduction within their families and communities as well as from the health-care institutions where they seek care particular emphasis is placed on the creation of an enabling environment to support more effective health interventions and better health outcomes. This guideline is meant to help countries to more effectively and efficiently plan develop and monitor programmes and services that promote gender equality and human rights and hence are more acceptable and appropriate for women living

with HIV taking into account the national and local epidemiological context. It discusses implementation issues that health interventions and service delivery must address to achieve gender equality and support human rights.

*Contemporary Research on Sex Work* Jeffrey T. Parsons  
2014-06-03 Gain important insight and a broader perspective on where, why, and how sex workers conduct their business For years, the focus of sex work research has been on street-based male and female sex workers and the HIV-related risks they pose to their clients. Contemporary Research on Sex Work moves beyond the basic association between sex work and unprotected sex to a fuller description of the varied facets of the industry while still pursuing a better understanding of HIV risk among those working the streets. The diverse approaches in this unique book include targeted sampling, qualitative and quantitative

interviews, ethnographic interviews with key informants, using sex workers as recruiters, and quasi-experimental intervention designs. Contemporary Research on Sex Work dispels the notion that all sex workers are prostitutes working the streets, highlighting instead various aspects of sex work in terms of gender, venue, and context. Social scientists from a variety of disciplines present research collected from across the United States, Cambodia, the Philippines, Argentina, and Canada that reflects the efforts to explore interventions and programs designed to improve the social and physical lives of male, female, and transgender sex workers—and their clients. The book examines how different circumstances determine different issues of power, control, health, social functioning, mental health, and HIV/STI risk each sex worker faces. Contemporary Research on Sex Work examines: condom use by transgender female sex workers the association between mental health issues

and unprotected sex the influence of structural intervention in reducing biologically sexually transmitted infections (STIs) the “hidden” population of women who solicit clients in private locations off the street stigma resistance among male sex workers in Canada the relationship between childhood sexual abuse and subsequent involvement in sex work health services among male sex workers in Argentina how the intersection between race/ethnicity affects female sex workers in Los Angeles how sex workers deal with the negativity that surrounds their profession job-related risk and safety for sex workers in Canada legal concerns and policy issues and much more! Contemporary Research on Sex Work is your guide to the next generation of sex work research, highlighting the need to understand sex work as work. The book is an essential resource for researchers in the fields of sex research, sex work, and HIV/AIDS prevention, and for clinicians

who work with those involved in the industry.

### **Families and Communities Responding to AIDS**

Peter Aggleton 2012-10-02 All over the world, families and communities are key providers of care and support. This is particularly true in relation to serious illnesses such as HIV and AIDS. Yet families and communities can also stigmatize their members, leaving people to die in the most appalling conditions. This book looks at the diversity of family and community responses to HIV and AIDS. By examining contexts as diverse as nuclear, extended and refugee family households, and gay community networks and structures, it offers important insight into the factors which lead to positive responses and those which trigger negative ones.

*Women and Sex Therapy* Ellen Cole 2014-03-18 Outstanding feminist scholars present seldom discussed women’s views of sexuality. In the past, there has been little feminist discussion among sexuality

professionals and between feminist therapists and sex therapists. The valuable ideas expressed by the contributors to this book are aimed at increasing the possibilities for all therapists and counselors to discuss with their clients the nature of sexuality, and in particular, what women feel about sex. Professionals provide remarkable perspectives on issues that concern all women--orgasm, the double standard, new reproductive options, intimacy, bisexuality, and more.

**Beyond the Down Low** Keith Boykin 2006-01-03 Keith Boykin, a former Clinton White House aide, syndicated columnist, and AIDS activist, breaks new ground by going beyond the hype with the first responsible, eye-opening look at the down low sensation. Unlike all previous accounts on the topic, *Beyond the Down Low* refreshingly presents the DL not merely as a problem of gay and bisexual men living in the shadows and endangering women, but more broadly as a telling example of the African-

American community's overall failure to engage in critical but uncomfortable conversations about sexuality. Boykin details how the virtual silence from black leaders on sex matters has helped to create an environment where gay and bisexual men feel compelled to lead double lives. Meanwhile, the dialogue that has occurred both inside and out of African-American circles encourages an unhealthy battle of the sexes, ignores the complexities of the closet, demonizes homosexuality and bisexuality, disempowers women from personal responsibility to protect themselves from STDs, and misdirects public resources and attention at vilifying down low men.

Love, Money, and HIV Sanyu A. Mojola 2014-05-10 How do modern women in developing countries experience sexuality and love? Drawing on a rich array of interview, ethnographic, and survey data from her native country of Kenya, Sanyu A. Mojola examines how young African women, who suffer

disproportionate rates of HIV infection compared to young African men, navigate their relationships, schooling, employment, and finances in the context of economic inequality and a devastating HIV epidemic. Writing from a unique outsider-insider perspective, Mojola argues that the entanglement of love, money, and the transformation of girls into Óconsuming womenÓ lies at the heart of womenÓs coming-of-age and health crises. At once engaging and compassionate, this text is an incisive analysis of gender, sexuality, and health in Africa.

**Unprotected** Miriam

Grossman 2007-08-28 Our campuses are steeped in political correctness—that's hardly news to anyone. But no one realizes that radical social agendas have also taken over campus health and counseling centers, with dire consequences. Psychiatrist Miriam Grossman knows this

better than anyone. She has treated more than 2,000 students at one of America's most prestigious universities, and she's seen how the anything-goes, women-are-just-like-men, "safer-sex" agenda is actually making our sons and daughters sick. Dr. Grossman takes issue with the experts who suggest that students problems can be solved with free condoms and Zolofit. What campus counselors and health providers must do, she argues, is tell uncomfortable, politically incorrect truths, especially to young patients in their most vulnerable and confused moments. Instead of platitudes and misinformation, it's time to offer them real protection.

### **Counselling for Maternal and Newborn Health Care**

World Health Organization 2010 The main aim of this practical Handbook is to strengthen counselling and communication skills of skilled attendants (SAs) and other health providers, helping them to effectively discuss with

women, families and communities the key issues surrounding pregnancy, childbirth, postpartum, postnatal and post-abortion care. Counselling for Maternal and Newborn Health Care is divided into three main sections. Part 1 is an introduction which describes the aims and objectives and the general layout of the Handbook. Part 2 describes the counselling process and outlines the six key steps to effective counselling. It explores the counselling context and factors that influence this context including the socio-economic, gender, and cultural environment. A series of guiding principles is introduced and specific counselling skills are outlined. Part 3 focuses on different maternal and newborn health topics, including general care in the home during pregnancy; birth and emergency planning; danger signs in pregnancy; post-abortion care; support during labor; postnatal care of the mother and newborn; family planning counselling;

breastfeeding; women with HIV/AIDS; death and bereavement; women and violence; linking with the community. Each Session contains specific aims and objectives, clearly outlining the skills that will be developed and corresponding learning outcomes. Practical activities have been designed to encourage reflection, provoke discussions, build skills and ensure the local relevance of information. There is a review at the end of each session to ensure the SAs have understood the key points before they progress to subsequent sessions.

Editors' Choice. Longlisted for the 2021 Brooklyn Public Library Literary Prize. One of NPR, New York, and The Guardian's Best Books of 2021, one of Buzzfeed's Best LGBTQ+ Books of 2021, one of Electric Literature's Favorite Nonfiction Books of 2021, one of NBC's 10 Most Notable LGBTQ Books of 2021, and one of Gay Times' Best LGBTQ Books of 2021. "This is not reverent, definitive history. This is a tactician's bible." -- Parul Sehgal, The New York Times Twenty years in the making, Sarah Schulman's *Let the Record Show* is the most comprehensive political history ever assembled of ACT UP and American AIDS activism In just six years, ACT UP, New York, a broad and unlikely coalition of activists from all races, genders, sexualities, and backgrounds, changed the world. Armed with rancor, desperation, intelligence, and creativity, it took on the AIDS crisis with an indefatigable, ingenious, and multifaceted attack on the corporations, institutions, governments, and

individuals who stood in the way of AIDS treatment for all. They stormed the FDA and NIH in Washington, DC, and started needle exchange programs in New York; they took over Grand Central Terminal and fought to change the legal definition of AIDS to include women; they transformed the American insurance industry, weaponized art and advertising to push their agenda, and battled—and beat—The New York Times, the Catholic Church, and the pharmaceutical industry. Their activism, in its complex and intersectional power, transformed the lives of people with AIDS and the bigoted society that had abandoned them. Based on more than two hundred interviews with ACT UP members and rich with lessons for today's activists, *Let the Record Show* is a revelatory exploration—and long-overdue reassessment—of the coalition's inner workings, conflicts, achievements, and ultimate fracture. Schulman, one of the most revered queer writers and thinkers of her

generation, explores the how and the why, examining, with her characteristic rigor and bite, how a group of desperate outcasts changed America forever, and in the process created a livable future for generations of people across the world.

**HIV and the Blood Supply**  
Committee to Study HIV Transmission Through Blood and Blood Products 1995-10-19  
During the early years of the AIDS epidemic, thousands of Americans became infected with HIV through the nation's blood supply. Because little reliable information existed at the time AIDS first began showing up in hemophiliacs and in others who had received transfusions, experts disagreed about whether blood and blood products could transmit the disease. During this period of great uncertainty, decisionmaking regarding the blood supply became increasingly difficult and fraught with risk. This volume provides a balanced inquiry into the blood safety controversy, which involves

private sexual practices, personal tragedy for the victims of HIV/AIDS, and public confidence in America's blood services system. The book focuses on critical decisions as information about the danger to the blood supply emerged. The committee draws conclusions about what was done--and recommends what should be done to produce better outcomes in the face of future threats to blood safety. The committee frames its analysis around four critical area Product treatment--Could effective methods for inactivating HIV in blood have been introduced sooner? Donor screening and referral--including a review of screening to exclude high-risk individuals. Regulations and recall of contaminated blood--analyzing decisions by federal agencies and the private sector. Risk communication--examining whether infections could have been averted by better communication of the risks.

**Safe Encounters** Beverly Whipple 1990-07 Argues that "safe sex" can still be fun, and

**Body Counts** Sean Strub 2014-01-14 The political activist and founder of "POZ" magazine recounts his experiences in New York during the height of the AIDS epidemic, his own transforming diagnosis with HIV, and his efforts as the executive director of the Sero Project. Putting Risk in Perspective Renée T. White 1999 Drawing on ethnographic study and interviews, Putting Risk in Perspective explores the many factors associated with HIV infection among young black women.

**Preventing and Mitigating AIDS in Sub-Saharan Africa** National Research Council 1996-03-28 The AIDS epidemic in Sub-Saharan Africa continues to affect all facets of life throughout the subcontinent. Deaths related to AIDS have driven down the life expectancy rate of residents in Zambia, Kenya, and Uganda

with far-reaching implications. This book details the current state of the AIDS epidemic in Africa and what is known about the behaviors that contribute to the transmission of the HIV infection. It lays out what research is needed and what is necessary to design more effective prevention programs.

Mortal Secrets Robert Klitzman 2005-04-13 In the era of the Internet and Oprah, in which formerly taboo information is readily available or freely confided, secrecy and privacy have in many ways given way to an onslaught of confession. Yet for those who are HIV positive, decisions about disclosure of their diagnosis force them to confront intimate, fundamental, and rarely discussed questions about truth, lies, sex, and trust. Drawing from interviews with over seventy gay men and women, intravenous drug users, sex workers, bisexual men, and heterosexual men and women, the authors provide a detailed portrait of moral, social, and psychological decision making.

The interviews convey the complex emotions of love, lust, longing, hope, despair, and fear that shape individual dilemmas about whether to disclose to, deceive, or trust others concerning this disease. Some of those interviewed revealed their diagnosis widely; others told no one. Some struggled and ultimately told their partners; others spoke in codes or half-truths. One woman discovered her husband's diagnosis in a diary; when confronted, he denied it. Each year in the United States, 40,000 new cases of HIV arise, yet approximately one-third of the 900,000 Americans who are infected do not know it. As treatments have improved, unsafe sexual behavior has increased and efforts at prevention have stalled. Many of those infected continue to fear and experience rejection and discrimination. Addressing broad debates about the nature of secrecy, morality, and silence, this book explores public policy questions in the light of the nuanced, private decisions that are shaping the

course of an epidemic and have broader indications for all.
