**Beyond Policy and Language Choice** Dennis M. Mbuyi 1987 This study compares the English and Swahili language texts used in the primary grades in Kenya and Tanzania in order to ascertain the role of language in determining the content of instruction and to relate the content of these texts to significant characteristics of governmental educational policy and the values underlying them. The introductory section is a general discussion of the political implications of language policies in multilingual nations and the problems resulting from attempts to institute instruction in the mother tongue. The design of the ensuing study is based on two major assumptions: (1) that educational policy and school texts are good indicators of societal "core" values and future orientations; and (2) that salient policy features and values will likely be translated into school texts. Content analysis is used to examine data from four sets of instructional contexts: Kenya/English, Kenya/Swahili, Tanzania/English, and Tanzania/Swahili. The findings are organized around the following broad categories: daily life, Africanization, bases for legitimating knowledge, self-help, egalitarianism, value of education, work emphasis, national integration, rural development, African traditions, and cooperative

behavior. The subsequent discussion focuses on cross-national contexts (that is, English medium and Swahili medium perspectives irrespective of national boundaries) and within-nation contexts (relating to salient policy features in each country. Six statistical tables are appended, along with footnotes and a list of government and party official documents and school texts from each country. (TE)

**An Ambulance on Safari** Melissa Diane Armstrong 2020-10-22  
During the apartheid era, thousands of South African political activists, militants, and refugees fled arrest by crossing into neighbouring southern African countries. Although they had escaped political oppression, many required medical attention during their period of exile. An Ambulance on Safari describes the efforts of the African National Congress (ANC) to deliver emergency healthcare to South African exiles and, in the same stroke, to establish political legitimacy and foster anti-apartheid sentiment on an international stage. Banned in South Africa from 1960 to 1990, the

ANC continued its operations underground in anticipation of eventual political victory, styling itself as a "government in waiting." In 1977 it created its own Health Department, which it presented as an alternative medical service and the nucleus of a post-apartheid healthcare system. By publicizing its own democratic policies as well as the racist practices of healthcare delivery in South Africa, the Health Department won international attention for its cause and provoked widespread condemnation of the apartheid state. While the global campaign was unfolding successfully, the department's provision of healthcare on the ground was intermittent as patients confronted a fledgling medical system experiencing various growing pains. Still, the legacy of the department would be long, as many medical professionals who joined the post-apartheid Department of Health in South Africa had been trained in exile during the liberation struggle. With careful attention to both the international publicity campaign and on-the-ground medical efforts, *An Ambulance on Safari* reveals the intricate and significant political role of the ANC's Health Department and its influence on the anti-apartheid movement.
