*Aristotle's Art of Rhetoric* Aristotle 2019-03-29 A "singularly accurate, readable, and elegant translation [of] this much-neglected foundational text of political philosophy" (Peter Ahrensdorf, Davidson College). For more than two thousand years, Aristotle's "Art of Rhetoric" has shaped thought on the theory and practice of persuasive speech. In three sections, Aristotle defines three kinds of rhetoric (deliberative, judicial, and epideictic); discusses three rhetorical modes of persuasion; and describes the diction, style, and necessary parts of a successful speech. Throughout, Aristotle defends rhetoric as an art and a crucial tool for deliberative politics while also recognizing its capacity to be misused by unscrupulous politicians to mislead or illegitimately persuade others. Here Robert C. Bartlett offers an authoritative yet accessible new translation of Aristotle's "Art of Rhetoric," one that takes into account important alternatives in the manuscript and is fully annotated to explain historical, literary, and other allusions. Bartlett's translation is also accompanied by an outline of the argument of each book; copious indexes, including subjects, proper names, and literary citations; a glossary of key terms; and a substantial interpretive essay.

**Perspectives on Written Argument** Deborah Berrill 1996 An introduction to ways of understanding argument. This text voices the different ways of understanding argument and questions the traditional assumptions of what written arguments must be. Many of the topics are discussed in relation to Western philosophy, rhetoric and composition theory.

*The History and Theory of Rhetoric* James A. Herrick 2015-08-07 The History and Theory of Rhetoric offers discussion of the history of rhetorical studies in the Western tradition, from ancient Greece to contemporary American and European theorists that is easily accessible to students. By tracing the historical progression of rhetoric from the Greek Sophists of the 5th Century B.C. all the way to contemporary studies—such as the rhetoric of science and feminist rhetoric—this comprehensive text helps students understand how persuasive public discourse performs essential social functions and shapes our daily worlds. Students gain conceptual framework for evaluating and practicing persuasive writing and speaking in a wide range of settings and in both written and visual media. Known for its clear writing style and contemporary examples throughout, The History and Theory of Rhetoric emphasizes the relevance of rhetoric to today's students.

*Discursive Ideologies* C. H. Knoblauch 2014-05-15 In *Discursive Ideologies*, C. H. Knoblauch argues that European rhetorical theory comprises several distinct and fundamentally opposed traditions of discourse. Writing accessibly for the upper division student, Knoblauch resists the conventional narrative of a unified Western rhetorical tradition. He identifies deep ideological and epistemological differences that exist among strands of Western thought and that are based in divergent "grounds of meaningfulness." These conflicts underlie and influence current discourse about vital public issues. Knoblauch considers six "stories" about the meaning of meaning in an attempt to answer the question, what encourages us to believe that language acts are meaningful? Six distinctive ideologies of Western rhetoric emerge: magical rhetoric, ontological rhetoric, objectivist rhetoric, expressivist rhetoric, sociological rhetoric, and deconstructive rhetoric. He explores the nature of language and the important role these rhetorics play in the discourses that matter most to people, such as religion, education, public policy, science, law, and history.

*James A. Berlin and Social-Epistemic Rhetorics* Victor J. Vitanza

2021-01-16 The field of rhetoric and composition has, at last, received a long-lost message delivered in the form of Victor J. Vitanza's seminar on James A. Berlin. In this book that is an untext on Berlin's work and its impact on the field, Vitanza acquaints us with Berlin by virtue of many Berlins, in multiplicity, and via the figure of an "excluded third" that wants to deliver to us a new message that was undelivered from Berlin to us, and from Vitanza to Berlin, after Berlin's untimely death in 1994. A seminar on a seminar on the teaching of writing . . . it is teaching all the way down. They met at the historical NEH seminar at Carnegie Mellon in 1978. Their friendship and rhetorical dialogues spanned only sixteen years, but Vitanza continues the conversation through the seminar, through this book (rife with reflections and, yes, homework for his readers), and through our reception of it. It is up to us now to carry it forward. As Vitanza writes, "I would prefer not to not think that what remains unsaid stays undelivered."

**Contemporary Perspectives on Rhetoric** Sonja K. Foss 2014-04-04

The anniversary edition marks thirty years of offering an indispensable review and analysis of thinkers who have exerted a profound influence on contemporary rhetorical theory: I. A. Richards, Ernesto Grassi, Chaim Perelman and Lucie Olbrechts-Tyteca, Stephen Toulmin, Richard Weaver, Kenneth Burke, Jürgen Habermas, bell hooks, Jean Baudrillard, and Michel Foucault. The brief biographical sketches locate the theorists in time and place, showing how life experiences influenced perspectives on rhetorical thought. The concise explanations of complex concepts are clear, engaging, insightful, and highly accessible, serving as an excellent primer for reading the major works of these scholars. The critical commentary is carefully chosen to highlight implications and to place the theories within a broader rhetorical context. Each chapter ends with a complete bibliography of works by the theorists.

**Post-9/11 American Presidential Rhetoric** Colleen E. Kelley 2007  
 Post-9/11 American Presidential Rhetoric examines the communication offensive orchestrated by George W. Bush and the members of his administration between the initial terrorism crisis of September 11, 2001, and the March 20, 2003, invasion of Iraq. Colleen Elizabeth Kelley argues that the president relied on a set of particular strategies that coalesced into protofascist talk in order to discursively manage the post-9/11 situation and justify its 2003 war against Iraq. This book suggests a framework for analyzing emergent fascist public discourse and its potential for producing additional substantial antidemocratic speech and action. Kelley further reviews the role of the media in conveying President Bush's rhetorical doctrine to the American public. The rhetoric of democratic discourse is presented as a firewall to guarantee that such speech-based behaviors, which are endorsed by willing publics and developed within democracies, fail to thrive and do not destroy the very systems that enabled them in the first place. Post-9/11 American Presidential Rhetoric is a stimulating text that will strike up discussion among scholars of political communication and those interested in cultural studies.

**Rhetoric and Irony** C. Jan Swearingen 1991 This pathbreaking study integrates the histories of rhetoric, literacy, and literary aesthetics up to the time of Augustine, focusing on Western concepts of rhetoric as dissembling and of language as deceptive that Swearingen argues have received curiously prominent emphasis in Western aesthetics and language theory. Swearingen reverses the traditional focus on rhetoric as an oral agonistic genre and examines it instead as a paradigm for literate discourse. She proposes that rhetoric and literacy have in the West disseminated the interrelated notions that through learning rhetoric individuals can learn to manipulate language and others; that language is an unreliable, manipulable, and contingent vehicle of thought, meaning, and communication; and that literature is a body of pretty lies and beguiling fictions. In a bold concluding chapter Swearingen aligns her thesis concerning early Western literacy and rhetoric with contemporary critical and rhetorical theory; with feminist studies in language, psychology, and culture; and with studies of literacy in multi- and cross-cultural settings.

*Workbook for the Study of Rhetoric in Western Thought* Susan Fillippelli 1997-04-01

*The Rhetoric of Empire* David Spurr 1993 The white man's burden, darkest Africa, the seduction of the primitive: such phrases were widespread in the language Western empires used to talk about their colonial enterprises. How this language itself served imperial purposes--and how it survives today in writing about the Third World--are the subject of David Spurr's book, a revealing account of the rhetorical strategies that have defined Western thinking about the non-Western world. Despite historical differences among British, French, and American versions of colonialism, their rhetoric had much in common. The Rhetoric of Empire identifies these shared features--images, figures of speech, and characteristic lines of argument--and explores them in a wide variety of sources. A former correspondent for the United Press International, the author is equally at home with journalism or critical theory, travel writing or official documents, and his discussion is remarkably comprehensive. Ranging from T. E. Lawrence and Isak Dineson to Hemingway and Naipaul, from Time and the New Yorker to the National Geographic and Le Monde, from journalists such as Didion and Sontag to colonial administrators such as Frederick Lugard and Albert Sarraut, this analysis suggests the degree to which certain rhetorical tactics penetrate the popular as well as official colonial and postcolonial discourse. Finally, Spurr considers the question: Can the language itself--and with it, Western forms of interpretation--be freed of the exercise of colonial power? This ambitious book is an answer of sorts. By exposing the rhetoric of empire, Spurr begins to loosen its hold over discourse about--and between--different cultures.

**Reason and Rhetoric in the Philosophy of Hobbes** Quentin Skinner 1996-02-22 An outstanding new interpretation of Hobbes, one of the most difficult and challenging of political philosophers.

**Electric Animal** Akira Mizuta Lippit 2000 Differentiation from animals helped to establish the notion of a human being, but the disappearance of animals now threatens that identity. This is the argument underlying *Electric Animal*, a probing exploration of the figure of the animal in modern culture. Akira Mizuta Lippit shows us the animal as a crucial figure in the definition of modernity -- essential to developments in the natural sciences and technology, radical transformations in modern philosophy and literature, and the advent of psychoanalysis and the cinema. Moving beyond the dialectical framework that has traditionally

bound animal and human being, *Electric Animal* raises a series of questions regarding the idea of animality in Western thought. Can animals communicate? Do they have consciousness? Are they aware of death? By tracing questions such as these through a wide range of texts by writers ranging from Friedrich Nietzsche to Jacques Derrida, Sigmund Freud to Vicki Heame, Lewis Carroll to Franz Kafka, and Sergei Eisenstein to Gilles Deleuze, Lippit arrives at a remarkable thesis, revealing an extraordinary logical consensus in Western thought: animals do not have language and hence cannot die. The animal has, accordingly, haunted thought as a form of spectral and undead being. Lippit demonstrates how, in the late nineteenth century; this phantasmic concept of animal being reached the proportions of an epistemological crisis, engendering the disciplines and media of psychoanalysis, modern literature, and cinema, among others. Against the prohibitive logic of Western philosophy, these fields opened a space for rethinking animality. Technology, usually thought of in opposition to nature, came to serve as therepository for an unmournable animality -- a kind of vast wildlife museum. A highly original work that charts new territory in current debates over language and mortality, subjectivity and technology, *Electric Animal* brings to light fundamental questions about the status of representation -- of the animal and of ourselves -- in the age of biomechanical reproduction.

**The Rhetoric of Western Thought** James L. Golden 2003

*Essays on Classical Rhetoric and Modern Discourse* Robert J. Connors 1984 Eighteen essays by leading scholars in English, speech communication, education, and philosophy explore the vitality of the classical rhetorical tradition and its influence on both contemporary discourse studies and the teaching of writing. Some of the essays investigate theoretical and historical issues. Others show the bearing of classical rhetoric on contemporary problems in composition, thus blending theory and practice. Common to the varied approaches and viewpoints expressed in this volume is one central theme: the 20th-century revival of rhetoric entails a recovery of the classical tradition, with its marriage of a rich and fully articulated theory with an equally efficacious practice. A preface demonstrates the contribution of Edward P. J. Corbett to the 20th-century revival, and a last chapter includes a bibliography of his works.

*Landmark Essays on Contemporary Rhetoric* Thomas B. Farrell 2020-10-28 This work brings together the pivotal, scholarly essays responsible for the present resurgence in rhetorical studies. Assembled by one of the most respected senior scholars in the field of rhetoric, the essays chart a course from tradition-based theory of civic rhetoric to ongoing issues of figuration, power, and gender. Together with a lucid introductory essay, these studies help to integrate the still-volatile questions at the core of humanities scholarship in rhetoric. The introductory student as well as the seasoned scholar will gain familiarity and footing in this oldest--and still new--liberal art.

**Rhetoric at the Non-Substantialistic Turn** Therese Boos Dykeman 2018-05-04 This book formulates a theory of global rhetoric encompassing Eastern and Western approaches. Based on the Field-Being philosophy, this book delves into the ontological foundations of both kinds of rhetoric and argues that both understandings are necessary for global communication.

*Rhetoric and Philosophy* Richard A. Cherwitz 2014-06-03 This important volume explores alternative ways in which those involved in the field of speech communication have attempted to find a philosophical grounding for rhetoric. Recognizing that rhetoric can be supported in a wide variety of ways, this text examines eight different philosophies of rhetoric: realism, relativism, rationalism, idealism, materialism, existentialism,

deconstructionism, and pragmatism. The value of this book lies in its pluralistic and comparative approach to rhetorical theory. Although rhetoric may be the more difficult road to philosophy, the fact that it is being traversed by a group of authors largely from speech communication demonstrates important growth in this field. Ultimately, there is recognition that if different thinkers can have solid reasons to adhere to disparate philosophies, serious communication problems can be eliminated. Rhetoric and Philosophy will assist scholars in choosing from among the many philosophical starting places for rhetoric.

**Eastern-Western Thought and Rhetoric** Suad Ali Raja 1975

**The Rhetoric of Western Thought** Goodwin Fautleroy Berquist 2010-05-27 Building upon a rich legacy, the new edition of *The Rhetoric of Western Thought* provides readers with a comprehensive understanding of rhetoric from its inception in the ancient world, to its present day expression in contemporary practice and scholarship. As with previous editions, *The Rhetoric of Western Thought*, has been revised to enhance its traditional strengths by expanding coverage, by refining pedagogy, by updating treatment, and by improving organization, clarity and readability. Changes to the 10th edition include A greatly augmented Chapter 10: American Experimentations with Rhetoric, 1785-1930. Where previously the chapter centered on John Quincy Adams, now it focuses on all the approaches to rhetoric that emerged in the U.S. during the 19th century. An answer to the persistent question, what 19th-century social and theoretical trends produced present-day courses in composition, public speaking, and rhetorical theory? New contributing essays by Sandra Sarkela on Mercy Otis Warren's Contribution to the Rhetorical Tradition and Theresa Donfrio's essay on the rhetorical controversies surrounding the memorial planned for the site of the 9/11 terrorist attack. **Rhetoric** Aristotle 2012-03-06 In this seminal work of Western philosophy, Aristotle focuses on the use of language in persuasive argument. He identifies practical and aesthetic elements and their proper combination in an effective presentation.

**The Art of Rhetoric** Aristotle 2020-10-16 'Moral character, so to say, constitutes the most effective means of proof.' In ancient Greece, rhetoric was at the centre of public life. Many writers attempted to provide manuals to help improve debating skills, but it was not until Aristotle produced *The Art of Rhetoric* in the 4th century bc that the subject had a true masterpiece. As he considered the role of emotion, reason, and morality in speech, Aristotle created essential guidelines for argument and prose style that would influence writers for more than two millennia. Brilliantly explained and carefully reasoned, *The Art of Rhetoric* remains as relevant today as it was in the assemblies of ancient Athens.

**Rhetoric of the Chinese Cultural Revolution** Xing Lu 2020-08-05 A startling look at revolutionary rhetoric and its effects Now known to the Chinese as the "ten years of chaos," the Chinese Cultural Revolution (1966-76) brought death to thousands of Chinese and persecution to millions. In *Rhetoric of the Chinese Cultural Revolution* Xing Lu identifies the rhetorical practices and persuasive effects of the polarizing political language and symbolic practices used by Communist Party leaders to legitimize their use of power and violence to dehumanize people identified as class enemies. Lu provides close readings of the movement's primary texts—political slogans, official propaganda, wall posters, and the lyrics of mass songs and model operas. She also scrutinizes such ritualistic practices as the loyalty dance, denunciation rallies, political study sessions, and criticism and self-criticism meetings. Lu enriches her rhetorical analyses of these texts with her own story and that of her family, as well as with interviews conducted in China and the United States with individuals who experienced the Cultural Revolution during their teenage years. In her new preface, Lu expresses deep concern about recent nationalism, xenophobia, divisiveness, and violence instigated by the rhetoric of hatred and fear in the United States and across the globe. She hopes that by illuminating the way language shapes perception, thought, and behavior, this book will serve as a reminder of past mistakes so that we may avoid repeating them in the future.

**Rhetorical Studies Honoring James L. Golden** Lawrence W. Hugenberg 1986

**The Passions of Rhetoric: Lessing's Theory of Argument and the German Enlightenment** E.K. Moore 2012-12-06 The goal of this book is to ascertain Lessing's views on argumentation and rhetoric. I intend to establish that these views constitute a systematic and coherent theory and to argue that for Lessing rhetoric in argument can yield philosophical truth. Analysis of Lessing's views also sheds light on the general significance of rhetoric in the 18th century. The denial that rhetoric has claims to truth is a long-standing prejudice of Western thought. This position is evident in Kant's rejection of rhetoric in philosophical discourse. But in my view, the situation in the 18th century in Germany was somewhat more complex. Rhetoric did not die a quiet death but was very much alive in polemical tracts, and Lessing was a pivotal figure in a culture dominated by argument and disputation. I asked myself why and how this polemical age came to an end and how does the rejection of polemics by the 19th century affect our understanding of the 18th century? In the Introduction, I address some of these questions and establish a historical framework for the development of polemics in the 18th century. Another reason this polemical age has traditionally been seen as problematic for the scholars of the period is because argument, disputation and debate cannot be submitted to the same easy analysis as the systematic treatises produced at the end of the century.

**Instructor's Manual to Accompany the Rhetoric of Western Thought** Golden 1996-04-01

**Rhetorical Agendas** Patricia Bizzell 2006-04-21 This edited collection offers a broad consideration of contemporary rhetorical scholarship, tied to political, ethical, and spiritual themes. Originating from the 2004 conference of the Rhetoric Society of America, the contents of this volume reflect the conference themes of rhetorical agendas in current theory and research. The volume starts off with transcripts of the talks presented by the conference's featured speakers. The essays that follow are organized around five key topics: history, theory, pedagogy, publics, and gender. These chapters address subjects ranging from religious identity to civil rights; from weapons of mass destruction to literacy testing and electronic texts, reflecting the wide array of areas under study across the rhetoric discipline. With contributions from well-known scholars as well as newcomers, the breadth and diversity of this collection make a significant contribution to rhetorical scholarship, and will stimulate additional work. As such, the volume will be of interest to scholars and students in rhetoric studies in speech communication, English, and related disciplines.
