The Spiritual Technology of Ancient Egypt Edward F. Malkowski 2007-10-03 How

ancient Egyptians understood quantum theory • Investigates the history of how modern religion and the Age of Science were inspired by the sacred science of the ancients • Examines how quantum theory explains that the cosmos arises from consciousness • Reveals the unanimity between Schwaller de Lubicz's "sacred science" and the science of a

cosmos governed by quantum mechanics Since the dawn of the Age of Science humankind has been engaged in a methodical quest to understand the cosmos. With the development of quantum mechanics, the notion that everything is solid matter is being replaced with the idea that information or “thought” may be the true source of physical reality. Such scientific inquiry has led to a growing interest in the brain’s unique and mysterious ability to create perception, possibly through quantum interactions. Consciousness is now being considered as much a fundamental part of reality as the three dimensions we are so familiar with. Although this direction in scientific thought is seen as a new approach, the secret wisdom of the ancients presented just such a view thousands of years ago. Building on René A. Schwaller de Lubicz’s systematic study of Luxor’s Temple of Amun-Mut-Khonsu during the 1940s and ’50s, Edward Malkowski shows that the ancient Egyptians’

worldview was not based on superstition or the invention of myth but was the result of direct observation using critical faculties attuned to the quantum manifestation of the universe. This understanding of reality as a product of human consciousness provided the inspiration for the sacred science of the ancients--precisely the philosophy modern science is embracing today. In the philosophical tradition of Schwaller de Lubicz, *The Spiritual Technology of Ancient Egypt* investigates the technical and religious legacy of ancient Egypt to reveal its congruence with today’s “New Science.”

The Temples of Light

Danielle Rama Hoffman
2009-10-21 A guide to the open-heart wisdom and secret rites of passage of thirteen sacred temples in Egypt • Provides information on how to thrive as we move from the Piscean to the Aquarian age • Offers guided meditations and rituals that connect to the ancient power of the Flower of Life, the Djed Pillar, the Ka, the energy body, and more The Temples of Light guides the reader, as the initiate, on a

spiritual journey through thirteen of Egypt's sacred temples--a journey into the sanctuary of the open heart. Each sacred site is a portal to ancient wisdom that can assist the modern-day pilgrim with everyday life issues and struggles--love, purpose, money, and health--and the deeper questions of enlightenment and our divine origin. Danielle Rama Hoffman opens up sacred rites of passage that historically have been kept secret to forge a relationship with the temples of Egypt as allies and spirit guides. For example, the temple of Sakkara is associated with abundance; the temple of Abydos with remembering. The initiations in this book awaken intuition and the Sahu--the fully realized self--allowing connections to the power, magic, and wisdom of such sacred symbols as the Flower of Life, the Djed Pillar (the backbone of Osiris), the Ka, and the energy body. Hoffman's guided meditations, rituals, and exercises also raise the reader's vibration level, as

Pyramid of Giza and of many other ancient Egyptian monuments. However, there is no doubt as to the interest of their builders in the celestial cycles: the "cosmic order" was indeed the true basis of the pharaoh's power. This book takes the reader on a chronological journey through ancient Egypt to explore the relationship between astronomy, landscape, and power during the most flourishing periods of ancient Egyptian civilization. Using the lens of archaeoastronomy, Giulio Magli reexamines the key monuments and turning points of Egyptian architecture and history, such as the solar deification of King Khufu, builder of the Great Pyramid, the Hatshepsut reign, and the Amarna revolution.

The Ancient Language of Sacred Sound David

Elkington 2021-04-06 • Details how sacred sites resonate at the same frequencies as both the Earth and the alpha waves of the human brain • Shows how human writing in its original hieroglyphic form was a direct response to the divine sound patterns of sacred sites • Explains how ancient hero myths from around the world relate to divine acoustic science and formed the source of religion The Earth resonates at an extremely low frequency. Known as “the Schumann Resonance,” this natural rhythm of the Earth precisely corresponds with the human brain’s alpha wave frequencies--the frequency at which we enter into and come out of sleep as well as the frequency of deep meditation, inspiration, and problem solving. Sound experiments reveal that sacred sites and structures like stupas, pyramids, and cathedrals also resonate at these special

frequencies when activated by chanting and singing. Did our ancestors build their sacred sites according to the rhythms of the Earth? Exploring the acoustic connections between the Earth, the human brain, and sacred spaces, David Elkington shows how humanity maintained a direct line of communication with Mother Earth and the Divine through the construction of sacred sites, such as Stonehenge, Newgrange, Machu Picchu, Chartres Cathedral, and the pyramids of both Egypt and Mexico. He reveals how human writing in its original hieroglyphic form was a direct response to the divine sound patterns of sacred sites, showing how, for example, recognizable hieroglyphs appear in sand patterns when the sacred frequencies of the Great Pyramid are activated. Looking at ancient hero legends--those about the bringers of important knowledge or language--Elkington explains how these myths form the source of ancient religion and have a

unique mythological resonance, as do the sites associated with them. The author then reveals how religion, including Christianity, is an ancient language of acoustic science given expression by the world's sacred sites and shows that power places played a profound role in the development of human civilization.

The Royal Tombs of Ancient Egypt

Charles River Charles River Editors 2018-04-09
*Includes pictures *Includes ancient accounts *Includes online resources and a bibliography for further reading Africa may have given rise to the first human beings, and Egypt probably gave rise to the first great civilizations, which continue to fascinate modern societies across the globe nearly 5,000 years later. From the Library and Lighthouse of Alexandria to the Great Pyramid at Giza, the Ancient Egyptians produced several wonders of the world, revolutionized architecture and construction, created some of the world's first systems of

mathematics and medicine, and established language and art that spread across the known world. With world-famous leaders like King Tut and Cleopatra, it's no wonder that today's world has so many Egyptologists. Given the abundance of funerary artifacts that have been found within the sands of Egypt, it sometimes seems as though the Ancient Egyptians were more concerned with the matters of the afterlife than they were with matters of the life they experienced from day to day. This is underscored most prominently by the pyramids, which have captured the world's imagination for centuries. The pyramids of Egypt are such recognizable symbols of antiquity that for millennia, people have made assumptions about what they are and why they exist, without full consideration of the various meanings these ancient symbolic structures have had over the centuries. Generations have viewed them as symbols of a lost past, which in turn is often portrayed as a world full

of romance and mystery. This verbal meaning has become associated with the structures through the tourism industry, where intrigue obviously boosts ticket sales. In fact, the Egyptian pyramids are so old that they were also drawing tourists even in ancient times. In antiquity, the Great Pyramid of Giza was listed as one of Seven Ancient Wonders of the World, and it is the only one still surviving today. While the image that usually comes to mind is of the magnificent pyramids of Giza, there are many other pyramid fields in Egypt, and the one at Saqqara is the oldest and largest. It was the site for pyramids built by at least 11 pharaohs, along with subsidiary pyramids for their queens. In addition to having the most pyramids of any pyramid field in Egypt, Saqqara contains hundreds if not thousands of smaller tombs. Saqqara is located less than 10 miles south of Cairo on the west bank of the River Nile and runs about 3.75 miles on its north-south axis. The site is generally broken down into the

region of North Saqqara and South Saqqara, since there are clusters of monuments on each end, but there are some interesting features in the middle portion as well. While the Step Pyramid of Djoser is by far the most famous monument at the site, Saqqara is a rich network of pyramids, temples, and tombs dating from the first dynasty of Egypt all the way to Greco-Roman times, an impressive span of more than 2,500 years. Indeed, Egyptologists have only uncovered a small fraction of the remains. When the pharaohs weren't busy with the pyramids at Saqqara and elsewhere, one of their most used sites is the Valley of the Kings, a royal necropolis located on the west bank of the Nile at Thebes. Here, pharaohs of the New Kingdom Period were buried in elaborate, treasure-filled tombs that were cut deep into the cliffs that walled the Nile Valley. In many of the royal tombs in the Valley of the Kings, intricate reliefs were painted on the walls that depicted the sun god and the

dead king on their nightly journey through the underworld, which was known in Egyptian as the Duat (Wilkinson 2003, 82). These scenes, which vary slightly from tomb to tomb, are known collectively by modern scholars as The Book of Gates because they depict the sun god's journey through 12 gates or pylons, one for each hour of the night. This book analyzes the amazing history of Ancient Egyptian burials over the course of nearly 3,000 years.

Esoteric Egypt J. S. Gordon
2015-01-30 A study of the 100,000-year-old spiritual science of ancient Egypt • Examines the metaphysical structure of our universe as seen by the ancient Egyptians, Greeks, and Celts, showing that each is based on the same central concepts from time immemorial • Reveals that the ancient Egyptians believed in reincarnation and a spiritual evolutionary process • Explains the connections between the movements of Orion and Sirius and the story of Osiris and Isis, the importance of the Pleiades

and circumpolar stars to the Egyptians, and the fundamental unity of the Egyptian pantheon • Investigates the people who colonized greater Egypt 100,000 years ago, descendants of the Atlanteans In Esoteric Egypt, J. S. Gordon reveals how the sacred science and wisdom tradition of ancient Egypt--the Land of Khem--stems from an advanced prehistoric worldwide civilization. Examining the metaphysical structure of our universe as seen by the ancient Egyptians, Greeks, and Celts, he shows that each tradition is merely a variation on the central concepts of the precession of the equinoxes and the obliquity of the ecliptic pole. He explores the connections between the cyclical movements of Orion and Sirius and the story of Osiris and Isis, the importance of the Pleiades and the circumpolar stars, and the ancient tradition of man as a divine being "born from the substance of the stars." He investigates the people who

colonized greater Egypt 100,000 years ago, the progenitors of ancient Egyptian civilization descended from the 4th- and 5th-Root Race Atlanteans. Gordon explores the magical and esoteric meanings behind Egyptian sacred ritual and temple art, drawing parallels to the Mystery School process of initiation. Explaining the fundamental unity of the Egyptian pantheon and the structure of the after-death state, he shows that the Egyptians clearly believed in reincarnation and a spiritual evolutionary process. Revealing the ancient sacred science of the Land of Khem, teachings passed down from the earliest times, he examines the psychospiritual nature of the human being and the function of our spiritual identity and our souls.

Invoking the Scribes of Ancient Egypt Normandi Ellis

2011-10-28 Tools to powerfully write about and manifest your life using the power found in the sacred sites of ancient Egypt • Reveals how to create meaning from one's life experiences and manifest new destinies through spiritual writing • Contains meditations and creative writing exercises exploring sacred themes in the Egyptian Book of the Dead and other hieroglyphic texts of ancient Egypt • Shares transformative and inspiring pieces written by those who've attended the authors' Egyptian sacred tours Within each of us is a story, a sacred story that needs to be told, of our heroic efforts and of our losses. The scribes of ancient Egypt devoted their lives to the writing of sacred stories. These technicians of the sacred were masters of hieroglyphic thinking, or heka--the proper words, in the proper sequence, with the proper intonation and the proper intent. Learning heka provided scribes with the

power to invoke and create worlds through their words and thoughts. To the writer, heka is a magical way to create meaning from experience. Through heka we manifest new visions and new relationships to ourselves and to others. We can make new art filled with beauty and light. Revealing the spiritually transformative power of writing, the authors take us on a journey of self-discovery through the sacred sites of Egypt, from the Temple of Isis to the Great Pyramid of Giza. Through meditations and creative writing exercises exploring the powerful themes found in the hieroglyphic texts of ancient Egypt and the Egyptian Book of the Dead, they show how, through writing, we can live beyond the ordinary, give our dreams form, and discover who we really are and what our lives really mean. Sharing transformative and inspiring pieces written by those who've attended their Egyptian sacred tours, the authors reveal how writing your spiritual biography allows you to

ANCIENT EGYPT, JERUSALEM AND THE STARS
ARCHAEOASTRONOMICAL EVIDENCE OF A SECRET SACRED ASTRONOMY
GIACOMO ALBANO
2023-02-25 Examining the astronomical alignments of the main Egyptian monuments, the author shows that almost none of them is oriented to the rise or set of Sirius or Orion at the time of construction. How is it possible? The reader will discover that in reality all are oriented in some way to the rising points of the stars of Orion or Sirius when they were in the extreme phases of their cycle. Since there is not only one of the most important Egyptian monuments that escapes this rule of orientation, it is evident that it was the true "secret" technique behind these choices. Being a specialist in stellar astrology, in the last part of the book the

author shows how these "stellar mechanisms" have worked well beyond the field of Archaeoastronomy. He illustrates the most important encadrement by declination - active for thousands of years and still active - involving some of the brightest stars in the firmament. We will see how and why Giza and Jerusalem been the places where it has most strongly manifested the greatest effects in the field of sacred and religions, albeit in different ways and for different reasons. The truth is that the Sacred Astronomy practiced by the Egyptians is completely unknown to contemporary scholars. Moreover it was not a simple belief or superstition of that people. It is the Supreme Science that describes how the cosmos really works, and not only for the events of sacred history. The Egyptian priests and initiates probably derived this knowledge from a tradition dating back to the dawn of time. Since these stellar configurations regulate not only the most important events of sacred and prophane history,

but also the places the events that occur, their knowledge may open new scenarios for human knowledge, far superior and far more "radical" of the much acclaimed scientific discoveries that are not able to identify the primary and occult causes of events, nor to reveal the Mystery that surrounds our existence.

Temples of Ancient Egypt

Dieter Arnold 1997 Five distinguished scholars here summarize the state of current knowledge about ancient Egyptian temples and the rituals associated with their use. The first volume in English to survey the major types of Egyptian temples from the Old Kingdom to the Roman period, it offers a unique perspective on ritual and its cultural significance. The authors perceive temples as loci for the creative interplay of sacred space and sacred time. They regard as unacceptable the traditional division of the temples into the categories of "mortuary" and "divine",

believing that their functions and symbolic representations were, at once, too varied and too intertwined. Both informative to scholars and accessible to students, the book combines descriptions of specific temples with new insights into their development and purposes.

Architecture, Astronomy and Sacred Landscape in Ancient Egypt Giulio Magli
2013-07-22 This book examines the interplay between astronomy and dynastic power in the course of ancient Egyptian history, focusing on the fundamental role of astronomy in the creation of the pyramids and the monumental temple and burial complexes. Bringing to bear the analytical tools of

archaeoastronomy, a set of techniques and methods that enable modern scholars to better understand the thought, religion and science of early civilizations, Giulio Magli provides in-depth analyses of the pyramid complexes at Giza, Abusir, Saqqara and Dahshur, as well as of the Early Dynastic necropolis at Abydos and the magnificent new Kingdom Theban temples. Using a variety of data retrieved from study of the sky and measurements of the buildings, he reconstructs the visual, symbolic and spiritual world of the ancient Egyptians and thereby establishes an intimate relationship among celestial cycles, topography and architecture. He also shows how they were deployed in the ideology of the pharaoh's power in the course of Egyptian history.

Unwrapping Ancient Egypt

Christina Riggs 2014-04-10

First runner-up for the British-Kuwait Friendship Society Book Prize in Middle Eastern Studies 2015. Yet in the modern world, attention has focused instead on unwrapping all the careful arrangements of linen textiles the Egyptians had put

in place. This book breaks new ground by looking at the significance of textile wrappings in ancient Egypt, and at how their unwrapping has shaped the way we think about the Egyptian past. Wrapping mummified bodies and divine statues in linen reflected the cultural values attached to this textile, with implications for understanding gender, materiality and hierarchy in Egyptian society. Unwrapping mummies and statues similarly reflects the values attached to Egyptian antiquities in the West, where the colonial legacies of archaeology, Egyptology and racial science still influence how Egypt appears in museums and the press. From the tomb of Tutankhamun to the Arab Spring, *Unwrapping Ancient Egypt* raises critical questions about the deep-seated fascination with this culture - and what that fascination says about our own.

Normandi Ellis 2015-11-17 An initiatic guide to temple construction on the spiritual and physical planes • Details the initiations for consecrating yourself as a divine vessel • Guides you in building a sacred inner temple for connecting with the gods of Egypt • Delivers shamanic journeys and initiations on ascension, shamanic death and renewal, soul retrieval and healing, multidimensional realities, and more Deep within each of us lives a primal memory of a time when the natural world was recognized as divine and our temples were built from sacred materials enlivened through magic. Temples were not

places you visited once a week; they were centers of community, divine work, healing, and wisdom, places where Heaven and Earth meet. This union of Heaven and Earth--the sacred temple--is also a union of Thoth and Isis: the Egyptian god of wisdom and the creative cosmic force and the Egyptian goddess of civilizing knowledge. Their relationship established the celestial teachings on Earth, for Thoth taught Isis all the mysteries and magic she knows and Isis acted as Thoth's instrument to deliver the teachings in a form humanity could use. In this initiatic guide to temple building on the spiritual and physical planes, Normandi Ellis and Nicki Scully explain how to create a communal spiritual structure for connecting with the ancient Egyptian pantheon as well as how to consecrate yourself and become a vessel suitable for divine wisdom and a home for your personal gods. The authors detail the construction, shamanic visioning, and ritual consecration of a Moon Temple

dedicated to Thoth. They explore teachings that help you develop relationships with the Egyptian neteru and realize your place within the family of the Egyptian pantheon. They guide you as you create your inner heart temple, the adytum, a safe place in which to receive guidance and access your higher spiritual bodies and oracular gifts. They provide shamanic journeys and initiations on ascension, shamanic death and renewal, soul retrieval and healing, multidimensional realities, and more. By creating a sacred temple within and without, we each can take part in the union of Isis and Thoth and restore the magic of the Egyptian mysteries to our time.
