The Land Question 1920

A Philosophic View of the Land Question (Classic Reprint) Henry Fox 2015-07-14 Excerpt from A Philosophic View of the Land Question The Land Question is not a mere question of economics. It has a deeper significance than all questions of politics or of constitutional government or of any ordinary measure of reform. It is a question which lies at the very root of our civilisation, because it affects the fundamental principles of human life. Human life is governed by its necessities of existence, such as food, clothing, shelter and development. The sunshine and the rain, the heat and the cold of every climate affect the lives of men at every turn. Man has been adapted to his environment by the same Power that produced him as the inheritor of the earth. The Land Question in Urban Development Shashanka Bhide 2018

The Land Question Henry George 1884

The Land Question in China Shaohua Zhan 2019-01-15 This book interrogates the inevitability and practicability of full-scale, land-intensive capitalist agriculture in China, whilst analyzing the labor-intensive industrious revolution as an alternative rural development path. It presents a critical account of the recent rise of agrarian capitalism as a force that would undermine hundreds of millions of people's livelihoods in the populous country. The Land Question in China traces the roots of the industrious revolution in China back to the eighteenth century, drawing comparisons between contemporary rural development and economic prosperity in the mid-Qing dynasty. In the context of neoliberal restructuring, it argues that vigorous rural development with broad access to land offers a solution to mitigate precarious urban employment and population pressure, while the transfer of land from villagers to large producers and urban investors will exacerbate these problems. Comparisons with South Africa and the East Asian economies of Japan, South Korea, and Taiwan further illustrate this and help to develop a new interpretation of the industrious revolution and its contemporary relevance. Providing a critical examination of the "new land reform" in China from a world historical perspective, this book will be useful to students and scholars of sociology, economics, and development, as well as Chinese Studies.

Land, Politics and Nationalism Philip Bull 1996 This is a history of the Irish land question, surveying its evolution from the Famine to the eve of the Second World War. Arguably, the land question was even more urgent in the eyes of ordinary people than the national question, which indeed it came largely to subsume.

The Land Question in Palestine, 1917-1939 Kenneth W. Stein 1984 The control of land remains the crucial issue in the Arab-Israel conflict. Kenneth Stein investigates in detail and without polemics how and why Jews acquired land from Arabs in Palestine during the British Mandate, and he reaches conclusions that are challenging and surprising. Stein contends that Zionists were able to purchase the core of a national territory in Palestine during this period for three reasons: they had the single-mindedness of purpose, as well as the capital, to buy the land; the Arabs, economically impoverished, politically fragmented, and socially atomized, were willing to sell the land; and the British were largely ineffective in regulating land sales and protecting Arab tenants. Neither Arab opposition to land sales nor British attempts to regulate them actually limited land acquisition. There were always more Arab offers to sell land than there were Zionist funds. In fact, many sales were made by Arab politicians who publicly opposed Zionism and even led agitation against land acquisition by Jews. Zionists furthered their own ambitions by skillfully using their understanding of the bureaucracy to write laws and to influence key administrative appointments. Further, they knew how to take advantage of social and economic cleavages within Arab society. Based primarily on archival research, *The Land Question in Palestine, 1917-1939* offers an unusually balanced analysis of the social and political history of land sales in Palestine during this critical period. It provides exceptional and essential insight into one of the most troubling conflicts in today's world.

The Land Question in Neoliberal India Varsha Bhagat-Ganguly 2020-05-31 This book examines the land question in neoliberal India based on a cohesive framework focusing on socio-legal and judicial interactions in a point of departure from the political-economy approach to land issues. It sheds light on several complex aspects of land matters in India and evolves a critical and multi-dimensional discourse by mapping out exchanges between social and political actors, the State, elites, citizenry, and the legal battle or judicial interpretations on land as right to property. Based on the themes of socio-legal policy and perspective on 'land' on the one hand and jurisprudence on the land question on the other, the volume discusses topics such as conclusive land titling; urban land governance; governance of forest land; land-leasing practices, policies, and interventions from the perspective of women; land acquisition policies and laws; how land matters interface with environmental issues; and judicial debates on 'compensation' against land acquisitions. It covers a wide range of case studies from all over India by bringing together specialists from across backgrounds. Comprehensive and topical, this book will be useful to scholars and researchers of development studies, political studies, law, sociology, political economy, and public policy, as well as to professionals in NGOs, civil society organisations, think tanks, planning and public administration, lawyers, civil services and training institutes, and judicial and forest academies. Those working on rural and urban land issues in India, land management, land governance, environmental laws and governance, property rights, resource conflicts, social work, and rural development will find this book to be of special interest.

The Land Question in India Anthony P. D'Costa 2017-04-06 This volume takes a fresh look at the land question in India. Instead of re-engaging in the rich transition debate in which the transformation of agriculture is seen as a necessary historical step to usher in dynamic capitalist (or socialist) development, this collection critically examines the centrality of land in contemporary development discourse in India.

Consequently, the focus is on the role of the state in pushing a process of dispossession of peasants through direct expropriation for developmental purposes such as acquisition of land by (local) states for infrastructure development and to support accumulation strategies of private business through industrialization. Land in India is sought for non-agricultural purposes such as purchasing land to reduce risk and real estate development. Land is also central to tribal communities (adivasis), whose livelihoods depend on it and on a moral economy that is independent of any price-driven markets. Adivasis tend to hold on to such property, not as individual owners for profit, but for collective security and to protect a way of life. Thus land, notwithstanding its role in the accumulation process, has been, and continues to be, a turbulent arena in which classes, castes, and communities are in conflict with each other, with the state, and with capital, jockeying to determine the terms and conditions of land transactions or their prevention, through both market and non-market mechanisms. The volume goes beyond the traditional political economy of the agrarian transition question, and deals with, inter alia, distributional conflicts arising from acquisition of land by the state for capital accumulation on the one hand and its commodification on the other. It provides new analytical insights into the land acquisition processes, their legal-institutional and ethical implications, and the multifaceted regional diversity of acquisition experiences in India.

The Land Question in South Africa Lungisile Ntsebeza 2007 Publisher description

The Land Question Henry George, Jr. 2015-07-09 Excerpt from *The Land Question: Property in Land, the Condition of Labor* We propose to abolish all taxes save one single tax levied on the value of land, irrespective of the value of the improvements in or on it. What we propose is not a tax on real estate, for real estate includes improvements. Nor is it a tax on land, for we would not tax all land, but only land having a value irrespective of its improvements, and would tax that in proportion to that value. Our plan involves the imposition of no new tax, since we already tax land values in taxing real estate. To carry it out we have only to abolish all taxes save the tax on real estate, and to abolish all of that which now falls on buildings and improvements, leaving only that part of it which now falls on the value of the bare land, increasing that so as to take as nearly as may be the whole of economic rent, or what is sometimes styled the "unearned increment of land values." Ireland and the Land Question 1800-1922 Michael J. Winstanley 2012-10-12 This pamphlet makes use of the most recent revisionist literature to reassess the view, much propagated by nationalist sources, that Ireland was a land of impoverished peasants oppressed by English laws and absentee English landlords. The land question has always been closely linked to the development of Irish national consciousness, and greatly exercised the minds of English politicians in the latter part of the nineteenth century. The author examines the nature of English understanding of Irish problems, which was often limited or ignorant, and attributes to it much of the unsound and ineffective legislation passed. The book is concerned less with questions of English party politics than with the situation in Ireland itself and with the nature of the English response to it.

The Irish land question: past and present, 2 essays George Charles Brodrick (hon.) 1880

The Land Question in Britain, 1750-1950 M. Cragoe 2010-01-20 The 'Land Question' occupied a central place in political and cultural debates in Britain for nearly two centuries. From parliamentary enclosure in the mid-eighteenth century to the fierce Labour party debate concerning the nationalization of land after World War Two, the fate of the land held the power to galvanize the attention of the nation.

African Land Questions, Agrarian Transitions and the State Sam Moyo 2008-05-15 This empirically grounded study provides a critical reflection on the land question in Africa, research on which tends to be tangential, conceptually loose and generally inadequate. It argues that the most pressing research concern must be to understand the precise nature of the African land question, its land reforms and their effects on development. To unravel the roots of land conflicts in Africa requires thorough understanding of the complex social and political contradictions which have ensued from colonial and post-colonial land policies, as well as from Africa's 'development' and capital accumulation trajectories, especially with regard to the land rights of the continent's poor. The study thus questions the capacity of emerging neo-liberal economic and political regimes in Africa to deliver land reforms which address growing inequality and poverty. It equally questions the understanding of the nature of popular demands for land reforms by African states, and their ability to address these demands under the current global political and economic structures dictated by neo-liberalism and its narrow regime of ownership. The study invites scholars and policy makers to creatively draw on the specific historical trajectories and contemporary expression of the land and agrarian questions in Africa, to enrich both theory and practice on land in Africa.
