An Immense World Ed Yong 2022-06-21 NEW YORK TIMES BESTSELLER • A “thrilling” (The New York Times), “dazzling” (The Wall Street Journal) tour of the radically different ways that animals perceive the world that will fill you with wonder and forever alter your perspective, by Pulitzer Prize-winning science journalist Ed Yong “One of this year’s finest works of narrative nonfiction.”—Oprah Daily ONE OF THE TEN BEST BOOKS OF THE YEAR: The Wall Street Journal, The New York Times, Time, People, The Philadelphia Inquirer, Slate, Reader’s Digest, Chicago Public Library, Outside, Publishers Weekly, BookPage ONE OF THE BEST BOOKS OF THE YEAR: Oprah Daily, The New Yorker, The Washington Post, The Guardian, The Economist, Smithsonian Magazine, Prospect (UK), Globe & Mail, Esquire, Mental Floss, Marginalian, She Reads, Kirkus Reviews, Library Journal The Earth teems with sights and textures, sounds and vibrations, smells and tastes, electric and magnetic fields. But every kind of animal, including humans, is enclosed within its own unique sensory bubble, perceiving but a tiny sliver of our immense world. In *An Immense World*, Ed Yong coaxes us beyond the confines of our own senses, allowing us to perceive the skeins of scent, waves of electromagnetism, and pulses of pressure that surround us. We encounter beetles that are drawn to fires, turtles that can track the Earth’s magnetic fields, fish that fill rivers with electrical messages, and even humans who wield sonar like bats. We discover that a crocodile’s scaly face is as sensitive as a lover’s fingertips, that the eyes of a giant squid evolved to see sparkling whales, that plants thrum with the inaudible songs of courting bugs, and that even simple scallops have complex vision. We learn what bees see in flowers, what songbirds hear in their tunes, and what dogs smell on the street. We listen to stories of pivotal discoveries in the field, while looking ahead at the many mysteries that remain unsolved. Funny, rigorous, and suffused with the joy of discovery, *An Immense World* takes us on what Marcel Proust called “the only true voyage . . . not to visit strange lands, but to possess other eyes.” WINNER OF THE ANDREW CARNEGIE MEDAL • FINALIST FOR THE KIRKUS PRIZE • FINALIST FOR THE NATIONAL BOOK CRITICS CIRCLE AWARD • LONGLISTED FOR THE PEN/E.O. WILSON AWARD *Flavor: The Science of Our Most Neglected Sense* Bob Holmes 2017-04-25 A journey into the surprising science behind our flavor senses. Can you describe how the flavor of halibut differs from that of red snapper? How the taste of a Fuji apple differs from a Spartan? For most of us, this is a difficult task: flavor remains a vague, undeveloped concept that we don’t know enough about to describe—or appreciate—fully. In this delightful and compelling exploration of our most neglected sense, veteran science reporter Bob Holmes shows us just how much we’re missing. Considering every angle of flavor from our neurobiology to

the science and practice of modern food production, Holmes takes readers on a journey to uncover the broad range of factors that can affect our appreciation of a fine meal or an exceptional glass of wine. He peers over the shoulders of some of the most fascinating food professionals working today, from cutting-edge chefs to food engineers to mathematicians investigating the perfect combination of pizza toppings. He talks with flavor and olfactory scientists, who describe why two people can experience remarkably different sensations from the same morsel of food, and how something as seemingly unrelated as cultural heritage can actually impact our sense of smell. Along the way, even more surprising facts are revealed: that cake tastes sweetest on white plates; that wine experts' eyes can fool their noses; and even that language can affect our sense of taste. Flavor expands our curiosity and understanding of one of our most intimate sensations, while ultimately revealing how we can all sharpen our senses and our enjoyment of the things we taste. Certain to fascinate everyone from gourmands and scientists to home cooks and their guests, Flavor will open your mind—and palette—to a vast, exciting sensory world.

Fragrant Mandy Aftel 2014-10-16 Winner of the 2016 Perfumed Plume Award The "Alice Waters of American natural perfume" (indieperfume.com) and author of the Art of Flavor celebrates our most potent sense, through five rock stars of the fragrant world Mandy Aftel is widely acclaimed as a trailblazer in natural perfumery. Over two decades of sourcing the finest aromatic ingredients from all over the world and creating artisanal fragrances, she has been an evangelist for the transformative power of scent. In *Fragrant*, through five major players in the epic of aroma, she explores the profound connection between our sense of smell and the appetites that move us, give us pleasure, make us fully alive. Cinnamon, queen of the Spice Route, touches our hunger for the unknown, the exotic, the luxurious. Mint, homegrown the world over, speaks to our affinity for the familiar, the native, the authentic. Frankincense, an ancient incense ingredient, taps into our longing for transcendence, while ambergris embodies our unquenchable curiosity. And exquisite jasmine exemplifies our yearning for beauty, both evanescent and enduring. In addition to providing a riveting initiation into the history, natural history, and philosophy of scent, *Fragrant* imparts the essentials of scent literacy and includes recipes for easy-to-make fragrances and edible, drinkable, and useful concoctions that reveal the imaginative possibilities of creating with—and reveling in—aroma. Vintage line drawings make for a volume that will be a treasured gift as well as a great read.

Sensing the World David Le Breton 2020-05-31 *Sensing the World: An Anthropology of the Senses* is a highly original and comprehensive overview of the anthropology and sociology of the body and the senses. Discussing each sense in turn - seeing, hearing, touch, smell, and taste - Le Breton has written a truly monumental work, vast in scope and deeply engaging in style. Among other pioneering moves, he gives equal attention to light and darkness, sound and silence, and his disputation of taste explores aspects of disgust and revulsion. Part phenomenological, part historical, this is above all a cultural account of perception, which returns the body and the senses to the center of social life. Le Breton is the leading authority on the anthropology of the body and the senses in French academia. With a reputation comparable to the late Pierre Bourdieu, his 30+ books have been translated into numerous languages. This is the first of his works to be made available in English. This sensuously nuanced translation of *La Saveur du monde* is accompanied by a spicy preface from series editor David Howes, who introduces Le Breton's work to an English-speaking audience and highlights its implications for the disciplines of anthropology, sociology, and the cross-disciplinary field of sensory studies.

Scented Visions Christina Bradstreet 2022-06-29 Smell loomed large in cultural discourse in the late nineteenth century, thanks to the midcentury fear of miasma, the drive for sanitation reform, and the rise in artificial perfumery. Meanwhile, the science of olfaction remained largely mysterious, prompting an impulse to “see smell” and inspiring some artists to picture scent in order to better know and control it. This book recovers the substantive role of the olfactory in Pre-Raphaelite art and Aestheticism. Christina Bradstreet examines the iconography and symbolism of scent in nineteenth-century art and visual culture. Fragrant imagery in the work of John Everett Millais, Dante Gabriel Rossetti, Simeon Solomon, George Frederic Watts, Edward Burne-Jones, and others set the trend for the preoccupation with scent that informed swaths of British, European, and American art and design. Bradstreet’s rich analyses of paintings, perfume posters, and other works of visual culture demonstrate how artworks mirrored the “period nose” and intersected with the most clamorous debates of the day, including evolution, civilization, race, urban morality, mental health, faith, and the “woman question.” Beautifully illustrated and grounded in current practices in sensory history, *Scented Visions* presents both fresh readings of major works of art and a deeper understanding of the cultural history of nineteenth-century scent.

Dog Sense John Bradshaw 2012-05-08 Dogs have been mankind's faithful companions for tens of thousands of years, yet today they are regularly treated as either pack-following wolves or furry humans. The truth is, dogs are neither—and our misunderstanding has put them in serious crisis. What dogs really need is a spokesperson, someone who will assert their specific needs. Renowned anthrozoologist Dr. John Bradshaw has made a career of studying human-animal interactions, and in *Dog Sense* he uses the latest scientific research to show how humans can live in harmony with—not just dominion over—their four-legged friends. From explaining why positive reinforcement is a more effective (and less damaging) way to control dogs' behavior than punishment to demonstrating the importance of weighing a dog's unique personality against stereotypes about its breed, Bradshaw offers extraordinary insight into the question of how we really ought to treat our dogs.

Theoretical Perspectives on Smell Andreas Keller 2022-12-30 *Theoretical Perspective on Smell* is the first collection of scholarly articles to be devoted exclusively to philosophical research on olfaction. The essays, published here for the first time, bring together leading theorists working on smell in a format that allows for deep engagement with the emerging field, while also providing those new to the philosophy of smell with a resource to begin their journey. The volume’s 14 chapters are organized into four parts: I. The Importance and Beauty of Smell II. Smell in Time and Space III. What We Perceive through Smell IV. Smell and Other Senses The collection solidifies the area as an important emerging branch of perceptual philosophy by presenting the cutting edge research being done by innovative early career researchers, as well as by those more senior and established within the field.

This volume offers information about beauty practices from the past to the present in alphabetical entries that address terms and topics such as "beards," "dreadlocks," "Geisha," "moko tattoos," and "progressive muscularity." Readers will better comprehend how beauty shapes many social interactions in profound ways worldwide, and that the unspoken social agreements that shape ideals of attractiveness and desirability within any given culture can matter very much. The Gene Keys Richard Rudd 2013-05-09 The book begins by introducing the reader to a fantastic possibility - that humanity may be on the verge of a major shift in consciousness rooted in a new understanding of how our DNA operates - namely that it is programmed directly by the way we think and feel. This is a highly ambitious and sophisticated system for shaping one's destiny. Based around 64 archetypes, it resembles the I Ching in its vast scope and profound importance, and in the resonant character of its symbolism. The author shows how there are two ways to approach the Gene Keys - the analogue (holistic) way and the digital (detailed) way. It is the combining of both analogue and digital that results in contemplation - the primary pathway into the Gene Keys. Since our beliefs shape our genes, when we change our beliefs, we change the chemistry of our body. The Gene Keys are an inner language whose central purpose is to transform our core beliefs about ourselves, thus raising our lives onto a new level of awareness. The book works alongside state-of-the-art online profiling software. This software will provide instantaneous free profiles known as 'Hologenetic Profiles', which uses astrological data (time, date and place of birth) to generate a unique sequence of Gene Keys that relate to many aspects of your life, including the underlying genetic patterns governing your relationships, your finances, your health and your life purpose. As the reader contemplates the 64 Gene Keys over time and applies their insights in his or her own life, so one's belief system will begin to change and our DNA will actually start to transform the way we think and feel.
