**eBook** FPMT 2021-12-13 Lama Zopa Rinpoche explained: "It is especially good to recite this mantra before going to see important people or participating in important meetings where you want the people present at the meeting to listen to you and do what you say. This mantra also can help for success in business and it brings wealth. This mantra is much more valuable than the sky filled with diamonds, gold, and wish-fulfilling jewels. This mantra has benefits like the sky to remove obstacles and to bring success. It is good to frame this mantra and put it in your home in a place where it can be seen. Just seeing this mantra directs your mind irreversibly to enlightenment. Reciting this mantra purifies the ten nonvirtuous actions and the five heavy negative karmas without break. It prevents you from being reborn in the three lower realms. Hearing, touching, and keeping the mantra has the same benefits. Just remembering the mantra becomes an offering to all the buddhas. This mantra is Buddha's skillful means to guide sentient beings to enlightenment and to solve their problems. The ultimate benefit is that it reveals the entire path to enlightenment. 2021.

**Success Mantra** Ósinàkàchì Àkùmà Kálù 2020-05-20 The book, *The Success Mantra (Decoding Philosophy to a Purposeful Life)*, by Osinakachi Akuma Kalu is a discourse on how to make our lives simpler fuller and more purposeful than they already are. Some minds are more enlightened than others and they see more potential, more promise, and more purpose in every life that breathes on this earth. Osinakachi is one such philosopher who has a vision for mankind and he makes every effort to let other minds realize their own worth in the big beautiful word which has much to offer to those who can grab by the might of their wits. It is not selfish grabbing, which we humans have been guilty of since time immemorial, that he hints at but the kind which gives in the process of taking, which creates in the process of destroying that which is obsolete to the growth and development of humanity. The book is divided into twenty-three chapters all fused with the light of philosophy, encouragement, and motivation. The first chapter titled 'You Are Not Worthless' creates the tempo to the success mantra that the pages have in store. One cannot but be motivated towards a purposeful and meaningful life after going through the simplified philosophy that Kalu helps the readers decode through his words. Between the first chapter and the last one titled 'Fear as Propaedeutic to Poor Self Esteem,' he covers all the ills that have besotted the society for too long to be conceited and incautious about. He doesn't just underline the ills that are rampant around us but also serves the remedies almost on a platter. He even takes up seemingly unimportant and negligible issues like Facebook and Whatsapp friend connections and delineates a fine sermon on how the limitless capacities and potentiality of social media can be tapped in the right direction and made to work for our own good. He reiterates that a little astuteness and alertness in the handling of social media can also be a source of creating better life opportunities. Social media is not just a means of time pass and gossip but rather it is a powerful medium, a medium which has almost replaced the pen in its power in expressing ideas and feelings. Like a true philosopher, Kalu coins some new words and expressions wherever he feels that the hackneyed and beaten ones fail to render his ideas exactly and precisely. The book abounds in interesting new coinages like, 'tuism, singulate, wallification and dewallification' which help the author in expounding his philosophy in as specific a manner as possible. Kalu freely and judiciously quotes from other philosophers also in order to enhance his point or reference his theory with other minds and knowledge areas too. Some of the great minds that he quotes from are Edward Said, Myles Monroe, Sirpeter Aloh, Austin Kleon, Michael Fisher among others. The book may be relatively small in terms of quantity, but when has the actual merit of a book been judged by its sheer volume. The pages that you encounter here are full of vibrant and meaningful discourse that has the power in them to steer you in the right direction and take you closer to your desired goal. We are poised to make the transformative set of leaps in the history of humankind. Deciding on how and when these moves will be made is still in the air. Properly harnessing the immense power of new technologies will require forethought, foresight, and the human touch. Kalu, as a philosopher, knows science and engineering, now more than ever must walk hand-in-hand with the humanities. Young people around the world need to prepare themselves for the changes and challenges that lie ahead. The Success Mantra is not an ordinary self-help book. It contains a message that is more than timely. It should be heard again and again by people around the world to promote peace, unity, and brotherhood: the future is bright, but only if we are willing to work for it. We need to begin now. Tomorrow will not wait.

**Body Language** Jamey Sanders 2014-11-29 Body language refers to various forms of nonverbal communication, wherein a person may reveal clues as to some unspoken intention or feeling through their physical behavior. These behaviors include (but are not limited to) facial expressions, body posture, gestures, eye movement, touch and the use of space. Body language exists in both animals and humans, but this article focuses on interpretations of human body language. It is also known as

kinesics. Body language must not be confused with sign language, as sign languages are full languages like spoken languages and have their own complex grammar systems, as well as being able to exhibit the fundamental properties that exist in all languages. Body language, on the other hand, does not have a grammar and must be interpreted broadly, instead of having an absolute meaning corresponding with a certain movement, so it is not a language like sign language, and is simply termed as a "language" due to popular culture. In a community, there are agreed-upon interpretations of particular behavior. Interpretations may vary from country to country, or culture to culture. On this note, there is controversy on whether body language is universal. Body language, a subset of nonverbal communication, complements verbal communication in social interaction. In fact some researchers conclude that nonverbal communication accounts for the majority of information transmitted during interpersonal interactions. It helps to establish the relationship between two people and regulates interaction, but can be ambiguous. Hence, it is crucial to accurately read body language to avoid misunderstanding in social interactions.

**The Big Leap** Gay Hendricks 2009-04-21 Most of us believe that we will finally feel satisfied and content with our lives when we get the good news we have been waiting for, find a healthy relationship, or achieve one of our personal goals. However, this rarely happens. Good fortune is often followed by negative emotions that overtake us and result in destructive behaviors. "I don't deserve this," "this is too good to be true," or any number of harmful thought patterns prevent us from experiencing the joy and satisfaction we have earned. Sound familiar? This is what New York Times bestselling author Gay Hendricks calls the Upper Limit Problem, a negative emotional reaction that occurs when anything positive enters our lives. The Upper Limit Problem not only prevents happiness, but it actually stops us from achieving our goals. It is the ultimate life roadblock. In *The Big Leap*, Hendricks reveals a simple yet comprehensive program for overcoming this barrier to happiness and fulfillment, presented in a way that engages both the mind and heart. Working closely with more than one thousand extraordinary achievers in business and the arts—from rock stars to Fortune 500 executives—whose stories are featured in these pages, the book describes the four hidden fears that are at the root of the Upper Limit Problem. *The Big Leap* delivers a proven method for first identifying which of these four fears prevents us from reaching our personal upper limit, and then breaking through that limitation to achieve what Hendricks refers to as our Zone of Genius. Hendricks provides a clear path for achieving our true potential and attaining not only financial success but also success in love and life.

**Success 2020** Kantamneni Radhakrishnamurthy 2013-03-23 ""The difference between a successful person and others is not a lack of strength, not a lack of knowledge, but rather in a lack of will,"" said the famous American football coach, Vincent T. Lombardi. The book, *Success 2020* exclusively talks about this will power and the various other ways and methods by which one can develop the will power, self-love, self-esteem, self-confidence, and other such traits that are absolutely essential or rather indispensable for achieving success in one's life. We all are aware of the fact that Success does not come within a day and Success doesn't come easy or fast. We have to strive hard for it with patience, perseverance and sincerity. This book is different and unique in itself from other Personality Development books in several aspects. Some of them are: It stresses on building and developing a strong character. It lays emphasis on good conduct, being positive in life, hard work, diligence, sincerity, honesty, etc. The book explains exhaustively the significance of enhancing one's self-esteem, self-confidence, self-discipline, improving self-image, etc. It also stresses on being calm and patient, while facing failures as they are the pillars of success. The book teaches us some valuable concepts through which we can achieve our

goals successfully, i.e., even success requires a proper management through goal setting, positive motivation, decision making, self-discipline, etc. This book is a treasure trove for the young generation, particularly the student class who are aspiring to build successful careers for themselves and also for all those enthusiastic readers and entrepreneurs who wish to achieve success and make it big in their lives."

**Multiplier 19** Flt. Lt. Sridhar Mulakaluri 2017-10-04 Ram wants to start his own business. But he has no idea how to go about it. Robert is halfway through building his awesome website and is eager to launch. But he has not figured out who would buy his services and how to market to them. Rahim wants some seed funding to test market and prove that his idea works. But he does not know how to reach investors. If you are like one of them, this book is for you. One of the most often quoted statistics about startups is that 95% of them fail. This need not be true. This book brings out the possibility of changing this reality and flipping this statistic over its head, by showing how the startup success factor can be increased by 19 times, to 95%. A very tiny percent of the world population even think of starting own business, which is the most significant economic activity which ensures that the rest of the people can get a job. Even lesser number of people actually takes the plunge and starts a business. It is very important to help, nurture and protect these dare devils who are willing to take huge risks to transform the way we live. This book is a small step to achieve that objective. The book focuses on the impact of a right mentor in the early stages of a startup and how mentoring can tremendously increase the chances of success. Through multiple case studies and real life examples it will be demonstrated that a good mentor can change the direction and the fate of a startup in a very positive way. Most of the startups fail in the idea stage itself, while still on paper. This is due to lack of research and also a lot of assumptions about what the customers want. While there is nothing wrong about improving an existing product or service, there has to be something more interesting for the customers to buy from us. Another challenge comes in the form of a business model. Most startups don't understand what this is. And most of them just assume that one revenue stream is good enough. Figuring this out is a major task in itself. Next step is building a minimum viable product and testing it in the target market. This is another major confusion, particularly for the technical startups. They strongly believe that they have to fully build their product before they can talk to the customers. Marketing is a black box for most of the entrepreneurs. While the market has been highly segmented, most of the startups want to sell to the entire world. In this process they forget that they have to start small, test the business model and then quickly scale up. This book addresses all these issues and much more, with the intent to help startups and entrepreneurs.

*Inspired Life* B. S. Ahluwalia 2013-09 Why are some people rich and successful? How did they achieve success? Did they have an external influence, or did they succeed through their own hard work? We all have desires and aspirations for money, power, and fame. At the back of it is the need for financial security and achievement. Although these things are common across people, there is a huge variation as to what different people achieve in life. What are the reasons for this anomaly? The reasons lie within us. Although there is no restriction in having dreams and wishes, we set very low targets and goals for ourselves. The hard fact is that you may achieve 70 percent or 90 percent of your target, but you will never achieve more than your target. By setting lower targets and by having lower aspirations, you are only stunting your growth. To start with, all of us have same the potential, but most of us are not even aware of the powers of our mind and our body. Professor Ahluwalia highlights all these aspects and lays down the road map for you to realize your power and potential and how to succeed in life, achieving the success you richly deserve.
