## Routledge Revivals: Ideology and Cultural Production (1979)

Michele Barrett 2018-06-13

Originally published in 1979, *Ideology and Cultural Production* examines the contribution to the debate surrounding 'culture', 'ideology', and 'representation', in this collection of essays. Originally presented as papers at the 1978 British Sociological

Conference on the theme of culture, the collection is tied together under the argument for a definition, which emphasizes the material and ideological conditions of cultural production. The volume discusses key issues, such as the break with 'super-structural theory', the question of economism, and the argument between culturalism and structuralism, as well as the central debates of

determinism and autonomy.

Cultural Psychology Robyn M. Holmes 2020-01-30 Cultural Psychology draws upon major psychological topics, theories, and principles to illustrate the importance of culture in psychological inquiry. Exploring how culture broadly connects to psychological processing across diverse cultural communities and settings, it highlights the applied nature of cultural psychology to everyday life events and situations, presenting culture as a complex layer in which individuals acquire skills, values, and abilities. Two central positions guide this textbook: one, that culture is a mental and physical construct

that individuals live, experience, share, perform, and learn; and the second, that culture shapes growth and development. Culture-specific and cross-cultural examples highlight connections between culture and psychological phenomena. The text is multidisciplinary, highlighting different perspectives that also study how culture shapes human phenomena. Topics include an introduction to cultural psychology, the history of cultural psychology, cultural evolution and cultural ecology, methods, language and nonverbal communication, cognition, and perception. Through coverage of social behaviour, the book challenges students to explore the self, identity, and personality; social relationships, social attitudes, and intergroup contact in a global world; and social influence, aggression, violence, and war. Sections addressing growth and development include human development and its processes, transitions, and rituals across the lifespan, and socializing agents,

socialization practices, and child activities. Additionally, the book features discussions of emotion and motivation, mental health and psychopathology, and future directions for cultural psychology. Chapters contain teaching and learning tools including case studies, multidisciplinary contributions, thought-provoking questions, class and experiential activities, chapter summaries, and additional print and media resources.

### **Poverty, Inequality and**

### **Social Work** Ian Cummins

2018-01-17 This book offers a critical, sociological analysis of the domino effect of neoliberalism and austerity politics on the role of social work and wider welfare provision. It argues that social work should move away from the resultant emphasis on risk management and bureaucracy, and return to a focus on relational and community approaches as the cornerstone of practice. Applying theoretical frameworks to practice, including those of

Bourdieu and the recent work of Wacquant, the book examines the development of neoliberal ideas and their impact on social welfare. It explores the implications of this across a range of areas of social work practice, including work with children and families, working with asylum seekers and refugees and mental health social work.

### **Dark Sides of the Startup**

### **Nation** Sibylle Heilbrunn

2022-11-29 Israeli national neoliberalism has promoted innovation policies leading to an ostensible paradox: At the center is a startup nation with a vibrant and successful high-tech entrepreneurial ecosystem, accumulating resources and enabling constant growth. At the geographical and social periphery, there has emerged a parallel society with often-marginalized groups not able to keep up. In one of the most unequal countries with a high rate of poverty, entrepreneurial heroes are celebrated at the center, promoting a myth that all could be self-made

successes. At the periphery, entrepreneurs are struggling to survive, often pushed into precarious working and living conditions. Applying critical theory discourse, this book illustrates how neoliberalism and entrepreneurship are intertwined and how the startup nation has evolved in Israel. It explores how national neoliberal state policies have targeted technological innovation as a tool to obtain a competitive advantage in the international arena rather than aiming at increasing economic achievements and well-being for all. It will demonstrate that the Israeli entrepreneurship scene exemplifies the existence of parallel entrepreneurial societal spaces, analyze the positionality of entrepreneurs belonging to a variety of groups that characterize Israeli society, and uncover structural disadvantages and related levels of precarity as well as existing links between entrepreneurial advantages and disadvantages, mobility and varying degrees of social marginality. Dark Sides of the

Startup Nation sheds light onto the problematic and sometimes contradictory myth that entrepreneurship is meritocratic and that neoliberal capitalism provides everyone with equal opportunities to succeed. The book will be of interest to researchers, academics, policy makers and students in the fields of entrepreneurship and small business management, responsibility and business ethics, and technology and innovation.

Object-Oriented and Prototyping in Software Engineering is an exciting new text that is essential reading for anybody who needs to design, develop and implement software systems. The methods and tools for rationalising production and improving the quality of software are comprehensively examined. Prototyping and object-oriented software construction, and their relationship to the software development process, are presented in great detail. The fundamentals of object-

oriented programming are investigated so thoroughly that readers can quickly begin to apply the concepts and develop software for themselves.

2017-04-13 Sociologist  
Anthony Blasi analyzes early Christianity using multiple social scientific theories, including those of Max Weber, Georg Simmel, Karl Marx, Antonio Gramsci, Max Scheler, Alfred Schutz, and contemporary theorists. He investigates the canonical New Testament books as representative of early Christianity, a sample based on usage, and he takes the books in the chronological order in which they were written. The result is a series of "stills" that depict the movement at different stages in its development. His approaches, often neglected in New Testament studies, include such sociological subfields as sect theory, the routinization of charisma, conflict, stratification theory, stigma, the sociology of knowledge, new religions, the sociology of secrecy, marginality, liminality, syncretism, the social role of intellectuals, the poor person as a type, the sick role, degradation ceremonies,

populism, the sociology of migration, the sociology of time, mergers, the sociology of law, and the sociology of written communication. Needing to treat the New Testament text as social data, Blasi uses his background in biblical studies and a review of a vast literature to establish the chronology of the compositions of the New Testament books and to present the "data" in a new translation that is accessible to non-specialists.

**Age-Dissimilar Couples and Romantic Relationships L.**

McKenzie 2015-03-23 There has been a widespread fascination with age-dissimilar couples in recent years. This book examines how the romantic relationships of these couples are understood. Based on qualitative research, McKenzie investigates notions of autonomy, relatedness, contradiction, and change in age-dissimilar relationships and romantic love.

**Hip Hop Versus Rap** Patrick Turner 2017-05-25 'What is the real hip hop?' 'To whom does

hip hop belong?' 'For what constructive purposes can hip hop be put to use?' These are three key questions posed by hip hop activists in *Hip Hop Versus Rap*, which explores the politics of cultural authenticity, ownership, and uplift in London's post-hip hop scene. The book is an ethnographic study of the identity, role, formation, and practices of the organic intellectuals that populate and propagate this 'conscious' hip hop milieu. Turner provides an insightful examination of the work of artists and practitioners who use hip hop 'off-street' in the spheres of youth work, education, and theatre to raise consciousness and to develop artistic and personal skills. *Hip Hop Versus Rap* seeks to portray how cultural activism, which styles itself grassroots and mature, is framed around a discursive opposition between what is authentic and ethical in hip hop culture and what is counterfeit and corrupt. Turner identifies that this play of difference, framed as an ethical schism, also presents hip hop's

organic intellectuals with a narrative that enables them to align their insurgent values with those of policy and to thereby receive institutional support. This enlightening volume will be of interest to post-graduates and scholars interested in hip hop studies; youth work; critical pedagogy; young people and crime/justice; the politics of race/racism; the politics of youth/education; urban governance; social movement studies; street culture studies; and vernacular studies.

Looking Forward, Looking Back: Drawing on the Past to Shape the Future of Marketing

Colin Campbell 2015-12-01  
This volume includes the full proceedings from the 2013 World Marketing Congress held in Melbourne, Australia with the theme Looking Forward, Looking Back: Drawing on the Past to Shape the Future of Marketing. The focus of the conference and the enclosed papers is on marketing thought and practices throughout the world. This volume resents papers on

various topics including marketing management, marketing strategy, and consumer behavior. Founded in 1971, the Academy of Marketing Science is an international organization dedicated to promoting timely explorations of phenomena related to the science of marketing in theory, research, and practice. Among its services to members and the community at large, the Academy offers conferences, congresses and symposia that attract delegates from around the world. Presentations from these events are published in this Proceedings series, which offers a comprehensive archive of volumes reflecting the evolution of the field. Volumes deliver cutting-edge research and insights, complimenting the Academy's flagship journals, the Journal of the Academy of Marketing Science (JAMS) and AMS Review. Volumes are edited by leading scholars and practitioners across a wide range of subject areas in marketing science.

**Youth Homelessness and Survival Sex** Juliet Watson 2017-10-10 Survival sex, commonly understood to be the exchange of sex for material support, is a practice that is associated with young homeless women. However, such a narrow definition of survival sex fails to recognise the multiple, complex, and coexisting motivations of young homeless women for engaging in intimate relationships in post-industrial capitalist society. In *Youth Homelessness and Survival Sex*, Watson's insightful analysis of personal

narratives reveals how young homeless women are exposed to situations in which survival can be impeded or assisted by playing out specific gender roles. Indeed, in identifying and contesting the dominant social discourses that young homeless women draw upon to frame their experiences of intimate affairs, Watson challenges the reader to understand how gendered subjectivities are produced and performed through heteronormative relationships. This enlightening book is vital in showing that homelessness is not a gender-neutral phenomenon and that there are gender-specific processes and practices involved in the navigation of poverty, violence, and social exclusion. *Youth Homelessness and Survival Sex* will appeal to undergraduate and postgraduate students, as well as postdoctoral researchers, interested in fields such as Homelessness, Youth Studies, Social Work, and Gender Studies.

2021-09-17 Primarily on the basis of ethnographic case-studies from around the world, this volume links investigations of work to questions of personal and professional identity and social relations. In the era of digitalized neoliberalism, particular attention is paid to notions of freedom, both collective (in social relations) and individual (in subjective experiences). These cannot be investigated separately. Rather than juxtapose economy with ethics (or the profitable with the good), the authors uncover complex entanglements between the drudgery experienced by most people in the course of making a living and ideals of emancipated personhood.

Progress in Education, Volume 15 Roberta V. Nata 2007 This series presents substantial results from around the globe in selected areas of educational research. The field of education is consistently on the top of priority lists of every country in the world, yet few educators are aware of the progress

elsewhere. Many techniques, programs and methods are directly applicable across borders. This series attempts to shed light on successes wherever they may occur in the hope that many wheels need not be reinvented again and again.

**Labelling Identity** Rosila Bee Mohd Hussain 2021-06-07

Over the last decade, Malay ethnic identity has taken on new life compared to religious identity in and outside Malaysia. This book explores key emblematic features of ethnic and religious identity and the idea of “Malayness” in Australia at a time when Islamic identity has gained prominence on the global stage. The author explores topics such as:

- Religion as a powerful basis of personal and collective identification for Malay-Muslim postgraduate students in Western Australia;
- Experiences of Malay-Muslim postgraduate students and their relation to Islamic values;
- Islamic revivalism and the middle class;
- Ethnic and religious factors related to

interpersonal communication. Other studies on Malays in Australia tend to focus on the past instead of the problems that new Malays possibly going to face when they reach the continent. This book overcomes that limitation and makes headway in addressing cultural differences related to identity, ethnicity, and religion.

**Becoming Intercultural**

Young Yun Kim 2001 This book looks at the movements of immigrants and refugees and the challenges they face as they cross cultural boundaries and strive to build a new life in an unfamiliar place. It focuses on the psychological dynamic

underpinning of their adaptation process, how their internal conditions change over time, the role of their ethnic and personal backgrounds, and of the conditions of the host environment affecting the process. Addressing these and related issues, the author presents a comprehensive theory, or a "big picture," of the cross-cultural adaptation phenomenon.

**The Culture Cult** Roger

Sandall 2018-02-19 The Culture Cult is an acerbic critique of that longing widespread in society today to ?retreat from civilization.?

From Rousseau and the Noble Savage to modern defenders of ethnicity such as Isaiah Berlin and Karl Polanyi, a prominent intellectual tradition has overromanticized the virtues of tribal life. In contrast, another tradition, represented by Karl Popper, Michael Polanyi, and Ernest Gellner, defends modern values and civil society. The Culture Cult discusses both sides of this divide between "culture" and "civilization," and between

"closed" and "open" societies. The romantic insistence on the superiority of the primitive is increasingly grounded in a fictionalized picture of the past—a picture often created with the aid of well-meaning but misguided anthropologists. Such idealizations work to the detriment of the very people they are meant to help, for they isolate minorities from such undeniable benefits of modern society as literacy and health care, and discourage them from participating in modern life. Few will find comfort in *The Culture Cult*, but many will recognize a valuable criticism of currently popular social politics.

Home Ownership in a Risk Society Ford, Janet 2001-07-25 This book argues that the emergence of unsustainable owner-occupation is emblematic of broader changes in contemporary society associated with the emergence of what commentators such as Beck and Giddens have characterised as a "risk society."

Korean Adoptees and

Transnational Adoption Jessica Walton 2019-03-28 This book investigates the experiences of South Koreans adopted into Western families and the complexity of what it means to "feel identity" beyond what is written in official adoption files. *Korean Adoptees and Transnational Adoption* is based on ethnographic fieldwork in South Korea and interviews with adult Korean adoptees from the United States, Australia, Canada, Switzerland and Sweden. It seeks to probe beneath the surface of what is "known" and examines identity as an embodied process of making that which is "unknown" into something that can be meaningfully grasped and felt. Furthermore, drawing on the author's own experiences as a transnational, transracial Korean adoptee, this book analyses the racial and cultural negotiations of "whiteness" and "Korean-ness" in the lives of adoptees and the blurriness which results in-between. Highlighting the role of memory and the body in the

formation of identities, this book will be useful to students and scholars of Korean Studies, Ethnicity Studies and Anthropology as well as Asian culture and society more generally.

*Race, Class and Education (RLE Edu L)* Len Barton

2012-05-04 One problem which continues to absorb social scientists is the way in which so much social deprivation stems from racial or class status. The discussion in this book is developed in two ways: firstly, careful attention is given to an examination of the way minority groups create and maintain collective identities and action. Secondly, the relationship between this movement and such topics as racism in schools, schooling, unemployment and West Indian involvement in sporting rather than academic activities is analysed, together with the nature of the educational experience of different class and gender groups.

**Making Respectable Women**

Mary Evans 2020-12-16 This book studies the ways in which

the assessment of being or not being 'respectable' has been applied to women in the UK in the past one hundred and fifty years. Mary Evans shows how the term 'respectable' has changed and how, most importantly, the basis of the ways in which the respectability of women has been judged has shifted from a location in women's personal, domestic and sexual behaviour to that of how women engage in contemporary forms of citizenship, not the least of which is paid work. This shift has important social and political implications that have seldom been explored: amongst these are the growing marginalisation of the validation of the traditional care work of women, the assumption that paid work is implicitly and inevitably empowering and the complex ways in which respectability and conformity to highly sexualised conventions about female appearance have been normalised. Making Respectable Women makes use of archive material to show

how the changing definition of a moral and social concept can have an impact on both the behaviour and the choices of individuals and the operations of institutional power. It will be of interest to students and scholars across the humanities and social sciences.

Regional Cultures and

**Transnationalizing**

**Inequalities in Europe** Anna Amelina 2016-09-13 Unequal life-chances became a key feature of cross-border migration to, and within, the enlarged Europe. Combining transnational, intersectional and cultural-sociological perspectives, this book develops a conceptual tool to analyse patterns, contexts and mechanisms of these cross-border inequalities. This book synthesizes the theories of social boundaries and of

intersectionality, approaching cross-border relations as socially generated and as an inherent element of contemporary social inequalities. It analyses the mechanisms of cross-border inequalities as 'regimes of intersection' relating spatialized cross-border inequalities to other types of unequal social relations (in terms of gender, ethnicity/race, class etc.). The conceptual arguments are supported by empirical research on cross-border migration in Europe: migration of scientists and care workers between Ukraine and Germany. This book integrates the analysis of space - including cross-border categories of global and transnational - into intersectionally-informed studies of social inequalities. Broadly, it will appeal to scholars and students in the areas of sociology, political sciences, social anthropology and social geography. In particular, it will interest researchers concerned with transnational and global social

inequalities, the interplay of the categories 'gender', 'ethnicity' and 'class' on the one hand and global and transnational relations on the other, theories of space and society, and migration and mobility in Europe.

**Participation in Health and Welfare Services** Arne H.

Eide 2017-02-17 Today, healthy ageing and active, meaningful lives are core values and aims for international and national health policies. Health services are challenged to ensure that the recipients of their services are active participants in their own care and beyond.

Participation allows patients to become less dependent on healthcare providers, increasing their control over their own treatment and health. Increasingly, the idea of 'participation' is shifting, from participation in services to participation in mainstream society. This book examines the concept of participation, as well as the different meanings it takes on in the context of health and welfare services. It asks how services can enable

and stimulate participation outside of those services. The contributions in this volume particularly focus on participation as engagement in daily life and 'everyday life' in order to develop the field of participation beyond the sphere of health and social care services. This book will appeal to researchers in the fields of health and social care, social services, occupational therapy and the sociology of health and illness. It will be of interest to practitioners of health and welfare services. **Handbook of Advances in Culture and Psychology**

Michele J. Gelfand 2015-04-08  
With applications throughout the social sciences, culture and psychology is a rapidly growing field that has experienced a surge in publications over the last decade. From this proliferation of books, chapters, and journal articles, exciting developments have emerged in the relationship of culture to cognitive processes, human development, psychopathology, social behavior, organizational behavior, neuroscience, language, marketing, and other topics. In recognition of this exponential growth, Advances in Culture and Psychology is

the first annual series to offer state-of-the-art reviews of scholarly research in the growing field of culture and psychology. The Advances in Culture and Psychology series is:

- \* Developing an intellectual home for culture and psychology research programs
- \* Fostering bridges and connections among cultural scholars from across the discipline
- \* Creating a premier outlet for culture and psychology research
- \* Publishing articles that reflect the theoretical, methodological, and epistemological diversity in the study of culture and psychology
- \* Enhancing the collective identity of the culture and psychology field

Comprising chapters from internationally renowned culture scholars and representing diversity in the theory and study of culture within psychology, Advances in Culture and Psychology is an ideal resource for research programs and academics throughout the psychology community.

**Manners** Michèle Lamont  
1994-10-03 Drawing on remarkably frank, in-depth interviews with 160 successful men in the United States and France, Michèle Lamont provides a rare and revealing collective portrait of the upper-middle class—the managers, professionals, entrepreneurs, and experts at the center of power in society. Her book is a subtle, textured description of how these men define the values and attitudes they consider essential in separating themselves—and their class—from everyone else. *Money, Morals, and Manners* is an ambitious and sophisticated attempt to illuminate the nature of social class in modern society. For all those who downplay the importance of unequal social groups, it will be a revelation. "A powerful, cogent study that will provide an elevated basis for debates in the sociology of culture for years to come."—David Gartman, *American Journal of Sociology* "A major accomplishment! Combining cultural analysis and

comparative approach with a splendid literary style, this book significantly broadens the understanding of stratification and inequality. . . . This book will provoke debate, inspire research, and serve as a model for many years to come."—R. Granfield, *Choice* "This is an exceptionally fine piece of work, a splendid example of the sociologist's craft."—Lewis Coser, *Boston College*

*Class, Self, Culture* Beverley Skeggs 2004 *Class, Self, Culture* puts class back on the map in a novel way by taking a new look at how class is made and given value through culture. It shows how different classes become attributed with value, enabling culture to be deployed as a resource and as a form of property, which has both use-value to the person and exchange-value in systems

of symbolic and economic exchange. The book shows how class has not disappeared, but is known and spoken in a myriad of different ways, always working through other categorisations of nation, race, gender and sexuality and across different sites: through popular culture, political rhetoric and academic theory. In particular attention is given to how new forms of personhood are being generated through mechanisms of giving value to culture, and how what we come to know and assume to be a 'self' is always a classed formation. Analysing four processes: of inscription, institutionalisation, perspective-taking and exchange relationships, it challenges recent debates on reflexivity, risk, rational-action theory, individualisation and mobility, by showing how these are all reliant on fixing some people in place so that others can move.

Self-Referentiality of Cognition and (De)Formation of Ethnic Boundaries Oleg Pakhomov

2017-07-21 This book develops

a new approach towards the formation of the ethnic boundary as a complex interrelation between cognitive operations and ethnic/national boundaries formation process. Korean diaspora in China, Russia, the United States, and Japan illustrate how this process correlates with the nationalism of the host societies, highlighting the differences and similarities. It covers a wide range of topics, from politics and economics to arts, mass culture and psychology, from comparative and interdisciplinary perspectives, at the same time avoiding eclectic combinations of different spheres of knowledge. This book challenges interactionist and post-modernist paradigms that dominate today's social science and facilitates dialogue between social and natural scientists, especially cognitive studies to promote more complex and still systematic approach towards society. It combines in-depth research, comparative perspectives and theoretical thoroughness. It

**State Schooling and the Reproduction of Social Inequalities**

Sharon Jones 2022-12-30 This book critically explores the role of state schooling in the reproduction of social class inequalities in the United Kingdom. By uniquely combining critical ethnographic methods with participatory and visual research, it foregrounds the experiences and recollections of working-class adults in relation to their past schooling. Drawing upon her own lived experiences, Jones theorises the experiences of her participants using an analysis of Marxist, Bordieuan, and

Freirean frameworks to uncover relations of power and illustrate how schooling has reduced individual agency and sustained lived inequalities. By creating space for a Visual Intervention within Critical Ethnography (VICE) alongside her analysis of class and society, Jones successfully illuminates that working class struggles are not permanent, and that agency can be activated. The book also addresses an important need by centering research from the lived educational experiences of the working-class, and in particular, working-class adults. Making a unique theoretical and methodological contribution using an innovative combined methodology approach, the text ultimately highlights the potential of empowering disadvantaged individuals by raising critical consciousness. Though it is focused on the experiences of adults, this book has important understandings for all sectors of education and will be of interest to academics, researchers, and

students interested in the sociology of education, research methods in education, social inequality, social class, and education politics.

*Status Inequality* George A. De Vos 1990-11 With his co-author, De Vos - a major figure in psychological anthropology - explores anthropological, sociological and psychoanalytical insights into human behaviour. Their unified theory synthesizes social structure and personality structure, concepts previously seen as diametrically opposed. The authors point to the symbolic nature of groups, the experience of ethnicity and of inequality, and the impact of internal and external variables on the sense of self. Separating the effects of status inequality from other social and psychological determinants of behaviour, this intriguing work discusses the developmental experience of the self.
