**The Architecture of Imperialism** Ellen Morris 2021-11-29 This volume utilizes both archaeological and textual data pertaining to Egyptian military bases to examine the evolution of Egypt's foreign policy in the New Kingdom. **The Oxford Handbook of Egyptology** Ian Shaw 2020-11-10 The Oxford Handbook of Egyptology offers a comprehensive survey of the entire study of ancient Egypt from prehistory through to the end of the Roman period. It seeks to place Egyptology within its theoretical, methodological, and historical contexts, indicating how the subject has

evolved and discussing its distinctive contemporary problems, issues, and potential. Transcending conventional boundaries between archaeological and ancient textual analysis, the volume brings together 63 chapters that range widely across archaeological, philological, and cultural sub-disciplines, highlighting the extent to which Egyptology as a subject has diversified and stressing the need for it to seek multidisciplinary methods and broader collaborations if it is to remain contemporary and relevant. Organized into ten parts, it offers a comprehensive synthesis of the various sub-topics and specializations that make up the field as a whole, from the historical and geographical perspectives that have influenced its development and current characteristics, to aspects of museology and conservation, and from materials and technology - as evidenced in domestic architecture and religious and funerary items - to textual and iconographic approaches to Egyptian culture. Authoritative yet accessible, it serves not only as an invaluable reference work for scholars and students working within the discipline, but also as a gateway into Egyptology for classicists, archaeologists, anthropologists, sociologists, and linguists.

Mario Liverani 2021-07-15 In this volume, Niels Peter Lemche and Emanuel Pfoh present an anthology of seminal studies by Mario Liverani, a foremost scholar of the Ancient Near East. This collection contains 18 essays, 11 of which have originally been published in Italian and are now published in English for the first time. It represents an important contribution to Ancient Near Eastern and Biblical Studies, exposing the innovative interpretations of Liverani on many historical and ideological aspects of ancient society. Topics range from the Amarna letters and the Ugaritic epic, to the 'origins' of Israel. *Historiography, Ideology and Politics in the Ancient Near East and Israel* will be an invaluable resource for Ancient Near Eastern and Biblical scholars, as well as graduate and post-graduate students.

**Egyptianization and Elite Emulation in Ramesside Palestine** C.R. Higginbotham 2022-02-28 This study of Ramesside Palestine challenges our understanding of the Egyptian Empire, suggesting that the Egyptianization of levantine material culture represents adoption of Egyptian culture by the local ruling class rather than a massive influx of pharaonic officials.

**The Oxford Handbook of Peace History** Charles Howlett 2023 "The Oxford Handbook of Peace History uniquely explores the distinctive dynamics of peacemaking across time and place, and analyzing how past and present societies have created diverse cultures of peace and applied strategies for peaceful change. The analysis draws upon the expertise of many well-respected and distinguished scholars from disciplines such as anthropology, economics, history, international relations, journalism, peace studies, sociology, and theology. This work is divided into six parts. The first three sections address the chronological sweep of peace history from the Ancient Egyptians to the present while the last three cover biographical profiles of peace advocates, key issues in peace history, and the future of peace history. A central theme throughout is

that the quest for peace is far more than the absence of war or the pursuit of social justice ideals. Students and scholars, alike, will appreciate that this work examines the field of peace history from an international perspective and expands analysis beyond traditional Eurocentric frameworks. This volume also goes far beyond previously published handbooks and anthologies in answering what are the strengths and limits of peace history as a discipline, and what can it offer for the future. It also has the unique features of a state-of-the-field introduction with a detailed treatment of peace history historiography and a chapter written by a noted archivist in the field that provides a comprehensive list of peace research resources. It is a work ably suited applicable for classrooms and scholarly bookshelves"--

*Ancient Egyptian Imperialism* Ellen Morris 2018-05-29 Offers a broad and unique look at Ancient Egypt during its long age of imperialism. Written for enthusiasts and scholars of pharaonic Egypt, as well as for those interested in comparative imperialism, this book provides a look at some of the most intriguing evidence for grand strategy, low-level insurgencies, back-room deals, and complex colonial dynamics that exists for the Bronze Age world. It explores the actions of a variety of Egypt's imperial governments from the dawn of the state until 1069 BCE as they endeavored to control fiercely independent mountain dwellers in Lebanon, urban populations in Canaan and Nubia, highly mobile Nilotic pastoralists, and predatory desert raiders. The book is especially valuable as it foregrounds the reactions of local populations and their active roles in shaping the trajectory of empire. With its emphasis on the

experimental nature of imperialism and its attention to cross-cultural comparison and social history, this book offers a fresh perspective on a fascinating subject. Organized around central imperial themes—which are explored in depth at particular places and times in Egypt's history—*Ancient Egyptian Imperialism* covers: Trade Before Empire—Empire Before the State (c. 3500-2686); Settler Colonialism (c. 2400-2160); Military Occupation (c. 2055-1775); Creolization, Collaboration, Colonization (c. 1775-1295); Motivation, Intimidation, Enticement (c. 1550-1295); Organization and Infrastructure (c. 1458-1295); Outwitting the State (c. 1362-1332); Conversions and Contractions in Egypt's Northern Empire (c. 1295-1136); and Conversions and Contractions in Egypt's Southern Empire (c. 1550-1069). Offers a wider focus of Egypt's experimentation with empire than is covered by general Egyptologists. Draws analogies to tactics employed by imperial governments and by dominated peoples in a variety of historically documented empires, both old world and new. Answers questions such as "how often and to what degree did imperial blueprints undergo revisions?" *Ancient Egyptian Imperialism* is an excellent text for students and scholars of history, comparative history, and ancient history, as well for those interested in political science, anthropology, and the Biblical World.

**Domination and Resistance** Michael G. *Syntactic and Lexico-semantic Aspects of the Legal Register in Ramesside Royal Decrees* Arlette David 2006 Analysis of the legal

register of a corpus of some fifty Ramesside royal decrees dating from 1300 to 1100 B.C. in the wider context of forensic discourse analysis of the legislative genre, in an attempt to establish constants in forensic linguistics that span time and space. The general character and formulation of these normative documents reveal a remarkable homogeneity and represent a specific linguistic register that has a common textemic, pragmatic, and narratologic structure, as well as a coherent syntactic and lexico-semantic usage, as modern legal dialects do today. Furthermore, the research tries to enrich the understanding of Egyptian legal terminology and legal categories by a systematic semantic analysis of the classifiers used in the legal lexicon (classifiers in the hieroglyphic system represent iconic elements that have no phonetic value, but assign words to semantic classes). The extremely interesting Egyptian graphic categorization set of classifiers present in these texts offers some invaluable insights into the Egyptian conceptual organization system.

Origins of the Just War Rory Cox 2023-10-31 A groundbreaking history of the ethics of war in the ancient Near East Origins of the Just War reveals the incredible richness and complexity of ethical thought about war in the three millennia preceding the Greco-Roman period, establishing the extent to which ancient just war thought prefigured much of what we now consider to be the building blocks of the Western just war tradition. In this incisive and elegantly written book, Rory Cox traces the earliest ideas concerning the complex relationship between war, ethics and justice. Excavating the ethical thought of three ancient Near Eastern cultures—Egyptian, Hittite and Israelite—he demonstrates that the history of the just war is considerably more ancient and geographically diffuse than previously assumed. Cox shows how the emergence of just war thought was grounded in a desire to rationalise, sacralise and ultimately to legitimise the violence of war. Rather than restraining or condemning warfare, the earliest ethical thought about war reflected an urge to justify state violence. Cox terms this presumption in favour of war *ius pro bello*—the “right for war”—characterizing it as a meeting point of both abstract and pragmatic concerns. Drawing on a diverse range of ancient sources, Origins of the Just War argues that the same imperative still underlies many of the assumptions of contemporary just war thought and highlights the risks of applying moral absolutism to the fraught ethical arena of war.

*International Relations in the Ancient Near East* M. Liverani 2001-10-25  
The ancient civilizations of the Near East - Egypt, Assyria, Babylonia, the Hittites and Canaanites - constituted the first formalized international relations system in world history. Holy wars, peace treaties, border regulations, trade relations and the extradition of refugees were problems for contemporary ambassadors and diplomats as they are today. Mario Liverani reconstructs the procedures of international relations in the period c.1600-1100BC using historical semiotics, communication theory and economic and political anthropology.

*The Invention of the Inspired Text* John C. Poirier 2021-01-28 John C. Poirier examines the “theopneustic” nature of the Scripture, as a response to the view that “inspiration” lies at the heart of most contemporary Christian theology. In contrast to the traditional rendering of the Greek word theopneustos as “God-inspired” in 2 Tim 3:16, Poirier argues that a close look at first- and second-century uses of theopneustos reveals that the traditional inspirationist understanding of the term did not arise until the time of Origen in the early third century CE, and that in every pre-Origen use of theopneustos the word instead means “life-giving.” Poirier thus conducts a detailed investigation of theopneustos as it appears in the fifth Sibylline Oracle, the Testament of Abraham, Vettius Valens, Pseudo-Plutarch (Placita Philosophorum), and Pseudo-Phocylides, all of whom understand the word to mean “life-giving.” He also studies the use of the cognate term theopnous in Numenius, the Corpus Hermeticum, on an inscription at the Great Sphinx of Giza, and on an inscription at a nymphaeum at Laodicea on the Lycus. Poirier argues that a rendering of “life-giving” also fits better within the context

of 2 Tim 3:16, and that this meaning survived late enough to figure in a fifth-century work by Nonnus of Panopolis. He further traces the pre-Origen use of theopneustos among the Church Fathers. Poirier concludes by addressing the implication of rethinking the traditional understanding of Scripture, stressing that the lack of “God-inspired” scripture ultimately does not affect the truth status of the gospel as preached by the apostles.

Tutankhamun's Footwear André J. Veldmeijer 2011 The discovery of Tutankhamun's tomb by Howard Carter in 1922 is one of the most significant archaeological discoveries of all time. It took Carter and his team 10 years to clear the contents of the tomb and among the objects found was a large collection of shoes and sandals. The footwear is analysed here in detail for the first time since the discovery using Carter's records and Harry Burton's excellent photographs along with the author's analyses of the objects, all of which are housed in the Egyptian Museum, Cairo and the Luxor Museum. Several specialists contributed to the volume discussing the different materials (gold, vegetable fibre, birch bark, glass and faience, leather, gemstones) that were used in the footwear. Tutankhamun's footwear is compared with other finds in order to be able to put it in a broader context. The footwear from the tomb of Yuya and Tjuiu, the King's great-grandparents, are, therefore, analysed as well. In addition to the analysis, footwear in texts and two- and three-dimensional art is considered.

**Foreigners in Ancient Egypt** Flora Brooke Anthony 2016-12-01 In ancient Egypt, one of the primary roles of the king was to maintain order and destroy chaos. Since the beginning of Egyptian history, images of

foreigners were used as symbols of chaos and thus shown as captives being bound and trampled under the king's feet. The early 18th dynasty (1550-1372 BCE) was the height of international trade, diplomacy and Egyptian imperial expansion. During this time new images of foreigners bearing tribute became popular in the tombs of the necropolis at Thebes, the burial place of the Egyptian elite. This volume analyses the new presentation of foreigners in these tombs. Far from being chaotic, they are shown in an orderly fashion, carrying tribute that underscores the wealth and prestige of the tomb owner. This orderliness reflects the ability of the Egyptian state to impose order on foreign lands, but also crucially symbolises the tomb owner's ability to overcome the chaos of death and achieve a successful afterlife. Illustrated with colour plates and black-and-white images, this new volume is an important and original study of the significance of these images for the tomb owner and the functioning of the funerary cult.

*Wretched Kush* Stuart Tyson Smith 2004-06-02 Professor Smith uses Nubia as a case study to explore the nature of ethnic identity. Recent research suggests that ethnic boundaries are permeable, and that ethnic identities are overlapping. This is particularly true when cultures come into direct contact, as with the Egyptian conquest of Nubia in the second millennium BC. By using the tools of anthropology, Smith examines the Ancient Egyptian construction of ethnic identities with its stark contrast between civilized Egyptians and barbaric foreigners - those who made up the 'Wretched Kush' of the title.

International Organisation in World Politics David Armstrong 2017-03-14 Since the end of the Cold War, international organisations have assumed a greater importance on the world stage. The United Nations has played a key role in all of the major security issues during this period - increasingly called upon to address other global problems such as poverty and international crime - while the European Union has created a single currency and moved towards the adoption of a constitution. The growing significance of the World Trade Organisation and other economic institutions has led some to talk of the emergence of a

structure of global governance; and international non-governmental organisations and social movements are now widely seen as forming a kind of global civil society that both challenges and participates in these developments. Building on the success of the previous edition (Versailles to Maastricht: International Organisation in the Twentieth Century), this book is a valuable introduction to the complex history of modern international organisation. David Armstrong, Lorna Lloyd and John Redmond: - Pay close attention to the League of Nations, the UN and the EU. - Offer chapters on the new regionalism, global governance and international regimes and global civil society. - Adopt a thematic and analytical approach to the subject. - Provide a concise factual account of the rise of the international organisation.

**Admonition and Curse** Noel Weeks 2004-10-01 The occurrence of treaties throughout the Ancient Near East has been investigated on a number of occasions, generally in order to resolve certain questions arising in the biblical field. As a result of that focus, the existence of a similar institution in a number of different cultures has not been treated as a problem in itself. Generally the existence of treaties throughout the area has been taken for granted, or a simple borrowing model has been used to explain how similar forms came to be used in different cultures. Why forms were similar across the area has not been probed. This work investigates treaty occurrences in different cultures and finds that the forms used correlate with ways of maintaining political control both internally and over vassals. Related concepts are projected in official accounts of history. Thus one can roughly distinguish threats based on power from persuasion based on benevolence and historical precedent, though various combinations of these two occur. There is a likely further connection of the means chosen to the degree of centralisation of power within the society. Underlying the local traditions is a common tradition which has to be dated to the pre-literate period. Biblical covenants fit within this pattern. The cultures treated are Mesopotamia, the Hittites, Egypt, Syrian centres and Israel.

**Circum Mare: Themes in Ancient Warfare** Jeremy Armstrong 2016-06-10 Circum Mare presents a thematic approach to current

directions in ancient military studies, bringing together studies on cultures from across the Mediterranean world, ranging from Pharaonic Egypt to Late Antique Europe and from Punic Spain to Persian Anatolia. **Ancient Conquest Accounts** K. Lawson Younger, Jr. 1990-05-01 Works on Old Testament historiography, the 'Conquest', and the origins of ancient Israel have burgeoned in recent days. But while others have been issuing new reconstructions this novel work presents a close reading of the biblical text. The focus is on the literary techniques that ancient writers employed in narrating stories of conquest, and the aim is to pinpoint their communicative intentions in their own contexts. This reading is enhanced by engagement with the important discipline of the philosophy of history. Ancient Conquest accounts, replete with extensive quotations from Assyrian, Hittite and Egyptian conquest accounts, is a learned and methodologically sensitive study of a wide range of ancient Near Eastern texts as well as of Joshua 9-12.

**The Great Karnak Inscription of Merneptah** Colleen Manassa 2004-12-31 The Great Karnak Inscription of Merneptah's 5th regnal year, the longest surviving continuous monumental text from Egypt, describes the combined Libyan and Sea People invasion of Egypt c.1208 BCE. This new study, the first complete commentary on this long but unfortunately damaged text, begins with a translation of the text, accompanied by detailed notes. The study considers specific military aspects of the inscription alongside its religious background. A grammatical analysis of the Great Karnak Inscription also sheds new light on the grammar of Ramesside monumental texts. Reviews for this volume: "...a very useful study of a highly important historical text, largely neglected hitherto." - K A Kitchen, Book List (2005) "...should be of interest to anyone studying issues relating to international relations of the period, aspects of military conflict in the later New Kingdom, or the monumental grammar of the Nineteenth and Twentieth Dynasties [...] The welcome inclusion of the complete hieroglyphic text should be of great use to anyone wishing to study the content and grammar of this inscription for themselves." - Joshua Roberson, Journal of the American Research Center in Egypt, Vol. XL (2005)

**The House of the Father As Fact and Symbol** J. David Schloen 2018-07-17 The first two volumes on patrimonialism in Ugarit and the ancient Near East, this book opens with a lengthy introduction on the interpretation of social action and households in the ancient world.
