Planting Native to Attract Birds to Your Yard Sharon Sorenson 2018-08-01 Welcoming birds to your yard isn't about choosing the right feeders and bird food. If you want to attract the widest range of birds to your home, you need to plant a diversity of native plants. Why go green? Native plants live longer; they are drought resistant, take less water and fertilizer, they cost less, are less work and easier to maintain. And a big plus—they are good for the environment. In 2007, Douglas Tallamy published the groundbreaking book, *Bringing Nature Home*, on going native to protect wildlife. Since then Cornell Laboratory of Ornithology, the National Wildlife Federation, and National Audubon have all endorsed and encouraged gardening with native plants. *Planting Native to Attract Birds to Your Yard* is the first book to cover planting native to specifically attract birds. The book recommends plants for all types of backyards, no matter how large or small—from large plots to container gardens. Sorenson gives state-specific recommendations for 31 Eastern U.S. states for native plants that support birds during the four seasons. The book covers the full gamut of native plants—76 species of trees, shrubs, bushes, vines, grasses, perennials, and annuals—and gives details on why specific plants are bird friendly and how to choose plants that work successfully in attractive home landscapes. Includes 66 bird species, all shown in dramatic color photos. Birders, gardeners, and landscapers—all who love birds and beautiful gardens—will find this book a must.

Safety Kim Thornton 2013-01-15 Dog owners have a responsibility to be informed, and keeping their dogs safe requires getting the right information. This Simple Solutions guide, *Safety* begins with guidance for the new owner about puppy-proofing the home and yard, making it safe for the curious puppy's nose, mouth, and paws! The chapter titled "Common Household Risks" lists the dozens of possible dangers lurking in everyone's homes, from dangling electric wires and socks to stuff that any puppy will retrieve from wastepaper baskets or the kitchen garbage pail. "Dining Dangers" considers the many human foods that can cause toxic reactions in dogs; beyond chocolate, there are shelves of food items that can make dogs very sick. Toxic plants flourish on the inside and outside of many dog owners' homes, and these include some of the most commonly seen house plants and shrubs. Owners must protect their dogs from garden beds, planters, and flowerpots! The final chapter of this book, "Seasonal Safety" is an all-year safety primer, from spring through winter, plus a special section on the holidays, giving owners sensible advice about precautions to take both indoors and out.

How to Survive a Garden Gnome Attack Chuck Sambuchino 2010-09-07 Move over zombies and adolescent vampires. There's a new threat in town—and it's only twelve inches tall. *How to Survive a Garden Gnome Attack* is the only comprehensive survival guide that will help you prevent, prepare for, and ward off an imminent home invasion by the common garden gnome. Once thought of as harmless yard decorations, evidence is mounting that these smiling lawn statues are poised and ready to wreck havoc. The danger is real. And it's here. Class 1 gnome-slayer and gnome defense expert Chuck Sambuchino has developed a proven system—Assess, Protect, Defend, Apply—for safeguarding property, possessions, and loved ones. Strategies include step-by-step instructions for gnome-proofing the average dwelling, recognizing and interpreting the signs of a gathering hoard, and—in the event that a secured perimeter is breached—confronting and combating the attackers at close range.

The 7 Best Things Smart Teens Do John Friel 2011-04-01 In , therapists John and Linda Friel gave parents an easy-to-understand guide to overcome the seven worst mistakes even good parents make while raising children. Now they've written a book for teens based on the same formula: it includes the seven worst things even smart—and outwardly successful—teens do, and shows teens how they can change these behaviors and assure their success in life as they grow towards adulthood. This book was written expressly for teenagers as a unique roadmap into adulthood. It was designed to stimulate the brain as well as the heart because teenagers who listen to both can eventually negotiate adolescence successfully. It will appeal to teenagers who like to think, wonder, question and challenge, as well as to teenagers who feel that they haven't quite figured out this "life" thing. The Friels show teens the seven things they need to do in order to overcome common roadblocks they face or will face. These are: Become competent—don't expect to have self-esteem without becoming competent Master your feelings—don't let your feelings run the show Break the silence—don't silently scream instead of making yourself known Get healthy power—don't avoid learning about power Face the serious stuff—don't hide the really important things you're experiencing Find an identity—don't avoid the struggle to find yourself Learn to stake out the extremes—don't live only in the extremes. Written in clear, straightforward language and including many interesting and colorful story interludes, this book is an easy-to-use, powerful tool for all teens.

The Humane Gardener Nancy Lawson 2017-04-18 In this eloquent plea for compassion and respect for all species, journalist and gardener Nancy Lawson describes why and how to welcome wildlife to our backyards. Through engaging anecdotes and inspired advice, profiles of home gardeners throughout the country, and interviews with scientists and horticulturalists, Lawson applies the broader lessons of ecology to our own outdoor spaces. Detailed chapters address planting for wildlife by choosing native species; providing habitats that shelter baby animals, as well as birds, bees, and butterflies; creating safe zones in the garden; cohabiting with creatures often regarded as pests; letting nature be your garden designer; and encouraging natural processes and evolution in the garden. The Humane Gardener fills a unique niche in describing simple principles for both attracting wildlife and peacefully resolving conflicts with all the creatures that share our world.
