Pop Goes the Weasel Albert Jack 2009-09-29

From the international bestselling author of *Red Herrings and White Elephants*—a curious guide to the hidden histories of classic nursery rhymes. Who was Mary Quite Contrary, or Georgie Porgie? How could Hey Diddle Diddle offer an essential astronomy lesson? Do Jack and Jill actually represent the execution of Louis XVI and Marie Antoinette? And if Ring Around the Rosie isn't about the plague, then what is it really about? This book is a quirky, curious, and sometimes sordid look at the truth behind popular nursery rhymes that uncovers the strange tales that inspired them—from Viking raids to political insurrection to smuggling slaves to freedom. Read Albert Jack's posts on the Penguin Blog.

Stone Age Sailors Alan H Simmons 2016-06-16 Over the past decade, evidence has been mounting that our ancestors developed skills to sail across large bodies of water early in prehistory. In this fascinating volume, Alan Simmons summarizes and synthesizes the evidence for prehistoric seafaring and island habitation worldwide, then focuses on the Mediterranean. Recent work in Melos, Crete, and elsewhere-- as well as Simmons' own work in Cyprus-- demonstrate that long-distance sailing is a common Paleolithic phenomenon. His comprehensive presentation of the key evidence and findings will be of interest to both those interested in prehistory and those interested in ancient seafaring.

Yankee Weather Proverbs Peter Miller 2004 Yankee Weather Proverbs is a collection of some of the best and most reliable weather predictors there are. Common sense, awareness of the landscape, and memorable rhymes are all you need to predict the weather the same way generations of Yankees have done it. Couple that with gorgeous depictions of the Yankee landscape, and youve got a classic book of

timeless resources and pleasures. More than 125 proverbs and 35 color illustrations by Vermont artist Daryl V. Storrs are contained in this pocket-sized compendium. Its a great gift, a trustworthy travel companion, and an indispensable book for Yankees and non-Yankees alike.

Never Eat Shredded Wheat James M. Russell 2018-10-18 Our memories are mysterious things. One moment we might remember a lengthy poem or the exact street address of a restaurant from our childhood. But the next moment we can struggle to recall where we've put our keys down or the name of the person we have just been introduced to. The human mind is not terribly good at remembering abstract data - but we can do it much more successfully if we create associations with more relatable bits of information, such as familiar people, places, colours, poems or jokes. The mnemonics that many of us learned as children are simply a shortcut to help locate information within your memory. For instance, rather than remember that the clockwise order of the points of the compass is North, East, South, West, we remember the mnemonic 'Never Eat Shredded Wheat', and the combination of humour and a visual reference provides an instant cue for our brains. This book is a cornucopia of mnemonics. Amusing as well as informative, it includes well-known examples that you might remember from school, some of which have been in use for centuries, as well as more recent ones and alternatives to the traditional versions. Ranging across history, science, language, numbers,

business, art and much, much more, the mnemonics included here provide quick easy access to a vast amount of fascinating and useful information. In addition, there are sections on working out your own methods and systems to augment the existing mnemonics with your own aides-mémoire, which can help you with everyday tasks such as avoiding common misspellings, or remembering names, faces and numbers.

Storms Annalisa McMorro 1998 Children become meteorologists as they study weather maps, follow the forecast, identify cloud formations, count thunder, and explore storms in space.

Red Sky at Night Elly Mackay 2018-05-01 A memorable collection of weather sayings, beautifully arranged in story form and illustrated by renowned paper artist Elly MacKay. Red sky at night, sailor's delight. And, the next morning, when the dew is on the grass, no rain will come to pass. These are the perfect conditions for a grandfather to take his grandchildren out on a fishing trip. Especially since, as the saying goes, when the wind is from the West, then the fishes bite the best. The family takes a boat out on the lake, fishing and swimming and eventually camping out on a nearby island, taking full advantage of the gorgeous weather. But the next day . . . red sky in the morning, sailors take warning! The family ventures back home just in time to avoid a rainstorm. But not to worry -- the more rain, the more rest. Fair weather's not always best. Acclaimed paper artist Elly MacKay illustrates a lovely family narrative through the use of weather aphorisms, creating a beautiful and informational story which will appeal to children's timeless fascination with the natural world.

[A Camper's Guide to Weather Signs - A Collection of Historical Camping Guides on How to Predict the Weather](#) Various Authors 2016-08-26 Many of the earliest books, particularly those dating back to the 1900's and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

Socio-Ecological Systems and Decoloniality

Deepa Pullanikkatil 2023-01-01 This contributed volume provides case studies from around the world that feature a convergence of indigenous and western knowledge in an attempt to understand complex socio-ecological systems. The book provides an understanding of socio-ecological systems in an ethical space using a 'Decoloniality' approach (i.e. untangling the production of knowledge from a primarily Eurocentric episteme). The work presented here integrates and merges indigenous knowledge with western science, thereby building on the strengths of each in service of understanding these systems. The editors of this volume approach indigenous communities and scientists as equal knowledge-holders and, in doing so, contributes towards improved understanding of socio-ecological systems and interactions in cross-cultural contexts. This volume will be of interest to scientists, instructors, students and policy makers across disciplines such as environmental sciences, social sciences, interdisciplinary studies, cultural studies, ethnobotany, anthropology and plant genetic resources.

Published in 1893, this is the second edition of an entertaining and fascinating collection of proverbs, rhymes and sayings about the weather.

Where the Wind Blows Peter J. Bowyer 1995
"Topography (physical shape of the land) and bathymetry (physical shape of the sea bed) have a profound influence on both the general climate and the local weather along Atlantic Canada's coastlines. The combination of rugged landscape and generally cold seas can produce some of the harshest marine weather conditions imaginable--sometimes with tragic consequences"--

The Natural Navigator Tristan Gooley 2012-06-05
From the New York Times bestselling author of *The Secret World of Weather* and *The Lost Art of Reading Nature's Signs*, learn to tap into nature and notice the hidden clues all around you Before GPS, before the compass, and even before cartography, humankind was navigating. Now this singular guide helps us rediscover what our ancestors long understood—that a windswept tree, the depth of a puddle, or a trill of birdsong can help

us find our way, if we know what to look and listen for. Adventurer and navigation expert Tristan Gooley unlocks the directional clues hidden in the sun, moon, stars, clouds, weather patterns, lengthening shadows, changing tides, plant growth, and the habits of wildlife. Rich with navigational anecdotes collected across ages, continents, and cultures, *The Natural Navigator* will help keep you on course and open your eyes to the wonders, large and small, of the natural world.

Ethnozoology Romulo Romeu Nobrega Alves 2017-10-31
Ethnozoology: Animals In Our Lives represents the first book about this discipline, providing a discussion on key themes on human-animal interactions and their implications, along with recent major advances in research. Humans share the world with a bewildering variety of other animals, and have interacted with them in different ways. This variety of interactions (both past and present) is investigated through ethnozoology, which is a hybrid discipline structured with elements from both the natural and social sciences, as it seeks to understand how humans have perceived and interacted with faunal resources throughout history. In a broader context, ethnozoology, and its companion discipline, ethnobotany, form part of the larger body of the science of ethnobiology. In recent years, the importance of ethnozoological/ethnobiological studies has increasingly been recognized, unsurprisingly given the strong human influence on biodiversity. From the perspective of ethnozoology, the book addresses all aspects of human connection, animals and health, from its use in traditional medicine, to bioprospecting derivatives of fauna for pharmaceuticals, with expert contributions from leading researchers in the field. Draws on editors' and contributors' extensive research, experience and studies covering ethnozoology and ethnobiology Covers all aspects of human-animal interaction through the lens of this emerging discipline, with coverage of both domestic and wild animal topics Presents topics of great interest to a variety of researchers including those in wildlife/conservation (biologists, ecologists, conservationists) and domestic-related disciplines (psychologists, sociologists)
