Food Quality and Safety Systems Food and Agriculture Organization of the United Nations 2003-06-30 One important element of FAO's work is building the capacity of food control personnel, including government authorities and food industry personnel carrying out food quality and safety assurance programmes. Such programmes should include specific food risk control procedures such as the Hazard Analysis and Critical Control Point (HACCP) system. FAO has prepared this manual in an effort to harmonize the approach to training in the HACCP system based on the already harmonized texts and guidelines of the Codex Alimentarius Commission. The manual is structured to provide essential information in a standardized, logical and systematic manner while adhering to effective teaching and learning strategies. Also published in English, Russian and Spanish.

A Century of Restaurants Rick Browne 2013-10-15 From the public television host, a tour of the US's oldest and greatest dining spots—with "delightful tales, delicious recipes, and hundreds of photographs" (Ted Allen, host of Food Network's Chopped). Come along on a pilgrimage to some of the oldest, most historic restaurants in America. Each is special not only for its longevity but also for its historic significance, interesting stories, and, of course, wonderful food. The oldest Japanese restaurant in the country is profiled, along with stagecoach stops, elegant eateries, barbecue joints, hamburger shops, cafes, bars and grills, and two dueling restaurants that both claim to have invented the French dip sandwich. The

bestselling author and host/producer of *Barbecue America* shares the charm, history, and appeal that made these establishments, some as many as three hundred years old, successful. Each profile contains a famous recipe, the history of the restaurant, a look at the restaurant today, descriptions of some of its signature dishes, fun facts that make each place unique, and beautiful photos. It's all you need for an armchair tour of one hundred restaurants that have made America great. "Browne spent three years traveling more than 46,000 miles to profile the 100 restaurants, inns, taverns and public houses he selected as being the most historic, most interesting and most successful." —Orlando Sentinel "It is Browne's exploration of the history behind each place that I found most interesting...The White Horse Tavern gave him the Beef Wellington recipe. Peter Luger, the legendary Brooklyn Steakhouse, shared one for German Fried Potatoes and Katz's Delicatessen in New York City offered Katz's Noodle Kugel. And, Ferrara in Little Italy in New York City parted with its cannoli recipe." —Sioux City Journal "Ask any chef: It's not easy keeping a restaurant alive for a week, let alone a year or a decade. So what does it take to last a century? After five years of criss-crossing the country and gobbling up regional specialties from chowder to chili, Rick Browne reveals the answer to that question." —Ted Allen, host of Food Network's *Chopped*

Testing in the Professions Susan Davis-Becker 2017-03-16 Testing in the Professions focuses on current practices in credentialing testing as a guide for practitioners. With a broad focus on the key components, issues, and concerns surrounding the test development and validation process, this book brings together a wide range of research and theory—from design and analysis of tests to security, scoring, and reporting. Written by leading experts in the field of measurement and assessment, each chapter includes authentic examples as to how various practices are implemented or current issues observed in credentialing programs. The volume begins with an exploration of the various types of credentialing programs as well as key differences in the interpretation and evaluation of test scores. The next set of chapters discusses key test development steps, including test

design, content development, analysis, and evaluation. The final set of chapters addresses specific topics that span the testing process, including communication with stakeholders, security, program evaluation, and legal principles. As a response to the growing number of professions and professional designations that are tied to testing requirements, *Testing in the Professions* is a comprehensive source for up-to-date measurement and credentialing practices. ManageFirst National Restaurant Association Solutions 2008-10-29 The NRAEF is introducing a new program as part of its strategic focus on recruitment and retention. This new management training certification program is based on a set of competencies defined by the restaurant, foodservice and hospitality industry as those needed for success. NRAEF ManageFirst Program leads to a new credential, ManageFirst Professional (MFP), which is part of our industry career ladder. This competency-based program includes 12 topics, each with a competency guide, exam, instructor resources and certificate. Students earn a certificate for each exam passed. The topics and exams are aligned to typical on-campus courses. For example, the Controlling Foodservice Costs Competency Guide is designed to align with a Cost Control or Operations Management course. Competency Guides and Textbooks: Most guides are 150-200 pages in length and are designed to be used with traditional textbooks for each course area. Each guide contains the essential content for that topic, learning activities, assessments, case studies, suggested field trips & research projects, professional profiles and testimonials. Instructor resources are available electronically and include competency guide content, notes indicating points to be emphasized, recommended activities and discussion questions, and answers to all activities and case studies. Exams: Exams accompany each topic covered in the

competency guides. Pencil and paper and online exam formats are offered. They typically are proctored on campus at the end of a course by faculty. Certificates: The NRAEF provides a certificate to students upon successfully passing each exam. The certificates are endorsed by the NRAEF and feature the student's name and the exam passed. The certificates are a lasting recognition of a student's accomplishment and a signal to the industry that the student has mastered the competencies covered within a particular topic. Credential: Upon successful completion of five NRAEF ManageFirst Program exams (including three predefined core topics, one foundation topic, and ServSafe Food Safety) a student is awarded the NRAEF ManageFirst Professional (MFP) credential. There is no additional charge for the credential. The program is targeted at the academic community. The program is flexible for use at two-year or four-year restaurant, foodservice and hospitality programs, proprietary schools and technical/vocational career education schools. Although it is not solely responsible for ensuring the safety of the nation's food supply, the U.S. Food and Drug Administration (FDA) oversees monitoring and intervention for 80 percent of the food supply. The U.S. Food and Drug Administration's abilities to discover potential threats to food safety and prevent outbreaks of foodborne illness are hampered by impediments to efficient use of its limited resources and a piecemeal approach to gathering and using information on risks. Enhancing Food Safety: The Role of the Food and Drug Administration, a new book from the Institute of Medicine and the National Research Council, responds to a congressional request for recommendations on how to close gaps in FDA's food safety systems. Enhancing Food Safety begins with a brief review of the Food Protection Plan (FPP), FDA's food safety philosophy developed in 2007. The lack of sufficient detail and specific strategies in the FPP renders it ineffectual. The book stresses the need for FPP to evolve and be supported by the type of strategic planning described in these pages. It also explores the development and implementation of a stronger, more effective food safety system built on a risk-based approach to food safety management. Conclusions and recommendations include adopting a risk-based decision-making approach to food safety; creating a data surveillance and research infrastructure; integrating federal, state, and local government food safety programs; enhancing efficiency of inspections; and more. Although food safety is the responsibility of everyone, from producers to consumers, the FDA and other regulatory agencies have an essential role. In many

instances, the FDA must carry out this responsibility against a backdrop of multiple stakeholder interests, inadequate resources, and competing priorities. Of interest to the food production industry, consumer advocacy groups, health care professionals, and others, Enhancing Food Safety provides the FDA and Congress with a course of action that will enable the agency to become more efficient and effective in carrying out its food safety mission in a rapidly changing world.

Retail Food Safety Jeffrey Farber 2014-10-07
Currently, there is no one book or textbook that covers all aspects of retail food safety. It is becoming apparent that a number of issues relating to retail food safety have come to the forefront in some jurisdictions of late. For example, a recent USDA risk assessment has pointed out that issues occurring at USA retail appear to be critical in terms of contamination of deli-meat. As well, a large listeriosis outbreak in Quebec pointed to retail cross-contamination as a key issue. In terms of sanitation, a number of advances have been made, but these have not all been synthesized together in one chapter, with a focus on retail. In addition, the whole area of private standards and the Global Food Safety Initiative (GFSI) have come to the forefront of late and these as well will be explored in great detail. Other aspects related to the safety of important food commodities such as seafood, meat, produce and dairy will also be discussed and salient areas addressed.

Finding a Path to Safety in Food Allergy National Academies of Sciences, Engineering, and Medicine 2017-05-27
Over the past 20 years, public concerns have grown in response to the apparent rising prevalence of food allergy

and related atopic conditions, such as eczema. Although evidence on the true prevalence of food allergy is complicated by insufficient or inconsistent data and studies with variable methodologies, many health care experts who care for patients agree that a real increase in food allergy has occurred and that it is unlikely to be due simply to an increase in awareness and better tools for diagnosis. Many stakeholders are concerned about these increases, including the general public, policy makers, regulatory agencies, the food industry, scientists, clinicians, and especially families of children and young people suffering from food allergy. At the present time, however, despite a mounting body of data on the prevalence, health consequences, and associated costs of food allergy, this chronic disease has not garnered the level of societal attention that it warrants. Moreover, for patients and families at risk, recommendations and guidelines have not been clear about preventing exposure or the onset of reactions or for managing this disease. Finding a Path to Safety in Food Allergy examines critical issues related to food allergy, including the prevalence and severity of food allergy and its impact on affected individuals, families, and communities; and current understanding of food allergy as a disease, and in diagnostics, treatments, prevention, and public policy. This report seeks to: clarify the nature of the disease, its causes, and its current management; highlight gaps in knowledge; encourage the implementation of management tools at many levels and among many stakeholders; and delineate a roadmap to safety for those who have, or are at risk of developing, food allergy, as well as for others in society who are responsible for public health. *ManageFirst* National Restaurant Association 2012-09-10

 ****Testimonials****I just wanted to drop you guys a line and tell you that I passed my final CLEP exam last Monday which gives me all of the credits I need to graduate. I have taken 30 credits worth of CLEP exams and I've passed them all by using your study guides. I actually purchased one of your study guides and failed my first test. I didn't fail because of your guide though, I failed because I didn't manage my time effectively and I ran short. I looked at your study guide after failing though, and a lot of the information on your study guide was very relevant to what was on the test. So, I tried again with a different test and a different study guide of yours. I passed. This pattern continues for 30 credits. I graduate on June 9th thanks to you guys, so I wanted to say thank you. The guides were worth every penny. Thanks, -John S.***I would like to thank you for your study guides. I will be graduating in December with two bachelor degrees and CLEP helped me get there quickly. I gained 36 credits through CLEP and your study guides helped me through almost

all of them. I can honestly say that I would not have passed many of the tests without your guides. Great products. Thanks!! -Erin W.****
