Excerpt: Strasbourg Cathedral or the Cathedral of Our Lady of Strasbourg (French: , German:) is a Roman Catholic cathedral in Strasbourg, France. Although considerable parts of it are still in Romanesque architecture, it is widely considered to be among the finest examples of high, or late, Gothic architecture. Erwin von Steinbach is credited for major contributions from 1277 to his death in 1318. At 142 metres, it was the world's tallest building from 1647 to 1874, when it was surpassed by St. Nikolai's Church, Hamburg. Today it is the sixth-tallest church in the world. Described by Victor Hugo as a "gigantic and delicate marvel," and by Goethe as a "sublimely towering, wide-spreading tree of God," the cathedral is visible far across the plains of Alsace and can be seen from as far off as the Vosges Mountains or the Black Forest on the other side of the Rhine. Sandstone from

the Vosges used in construction gives the cathedral its characteristic pink hue. Monument to Johannes (Jean) Hultz, architect of the octagonal top, in Strasbourg The site of the Strasbourg cathedral was used for several successive religious buildings, starting from the Argentoratum period (when a Roman sanctuary occupied the site) up to the building that is... 25e Anniversaire de la fondation de la paroisse Saint-Maurice Strasbourg (Diocèse). Palmer 2013-10-24 The Reign of Terror continues to fascinate scholars as one of the bloodiest periods in French history, when the Committee of Public Safety strove to defend the first Republic from its many enemies, creating a climate of fear and suspicion in revolutionary France. R. R. Palmer's fascinating narrative follows the Committee's deputies

individually and collectively, recounting and assessing their tumultuous struggles in Paris and their repressive missions in the provinces. A foreword by Isser Woloch explains why this book remains an enduring classic in French revolutionary studies.

The Berlin-Strasbourg Apocryphon Alin Suci 2017-01-23 The incomplete state in which many Coptic writings have survived makes them difficult to assess, and the text studied in this book is no exception. Preserved in two

fragmentary manuscripts, the Berlin-Strasbourg-Apocryphon - previously known as the Gospel of the Savior - has been wrongly identified as a second-century gospel which was bypassed in the formation of the Christian canon. Alin Suci demonstrates that this misunderstanding of the text derives from an insufficient knowledge of Coptic literature. Rather, the Berlin-Strasbourg Apocryphon is one of the numerous "apostolic memoirs," a peculiar genre of Coptic literature which consists of writings allegedly written by the apostles, often embedded in sermons attributed to famous church fathers. These texts were composed following the Council of Chalcedon, as part of the attempt of the emerging Coptic church to mold its identity after the schism.

The First Epistle of Saint Paul to the

Corinthians Jean Hering 2009-01-30 Professor Hering was Professor Emeritus of the University of Strasbourg, where for many years had been a famous Protestant New Testament scholar. His wide philosophical interests include ethics and phenomenology, and he was well known as a contributor to the *Revue d'histoire et de philosophie religieuse*. His commentary on *La seconde epître de saint Paul aux Corinthiens* appeared in 1958, and in 1959 the new edition of his *Le royaume de Dieu et sa venue*. But this work is the first to be translated into English, and a lifetime of New Testament study lies behind it. At Professor Hering's request a new English translation of the text of the Epistle has

been prepared, which embodies the conclusions reached in the critical notes of the commentary. The body of the commentary is intelligible to the general reader, and the footnotes, in which much rich scholarship is garnered, are richly rewarding to the scholar and student.

A History of Performing Pitch Bruce Haynes 2002-11-06 Haynes (U. of Montreal) traces the history of musical pitch standards over the last four centuries, linking frequency values to pitch names and telling where, when, and why various pitch levels have been used. With a focus on Italy, France, Germany, the Netherlands and the Hapsburg lands, he covers the pitches of about 1,400 historical instruments and how the design and function influenced and were influenced by changes in pitch. In addition, he studies the effect of pitch differences on musical notation and choice of key. The author has also written a book on the oboe, the instrument that plays the "A" to which a symphony orchestra tunes. Annotation copyrighted by Book News, Inc.,

Neuropsychology of Childhood Epilepsy Isabelle Jambaqué 2006-04-11 This book is devoted to the neuropsychological description of childhood epilepsy, a neurological condition that constitutes one of the most prevalent forms of chronic and disabling childhood illnesses. Indeed, one child out of 20 experiences one or more seizures before the age of 5, and one in a hundred develops epilepsy as a chronic disorder. Approximately half of these children with epilepsy display academic difficulties and/or behavioral disorders. Moreover, it is now believed that a sizable proportion of children with learning disability suffer from undiagnosed

epilepsy. While a great number of textbooks have been devoted to various medical aspects of childhood epilepsy (diagnosis, genetics, etiology, drug and surgical treatment, etc.), there have been no comprehensive accounts of the cognitive consequences of this condition. Advance of medical knowledge has shown that childhood epilepsy should not be considered as a single disorder but encompasses a whole range of different conditions that exhibit specific clinical EEG and outcome characteristics. It is not becoming apparent that these various clinical entities have different cognitive expression that yet need to be specified. The purpose of this book is to provide a complete up-to-date analysis of this multi-faceted pathology. Le Musée de L'Œuvre Notre-Dame, Medieval and Renaissance Art, Strasbourg Cécile Dupeux 1995
