The Dilemmas of Dissidence in East-Central Europe Barbara J. Falk
2003-01-10 Discusses one of the major currents leading to the fall of communism. Falk examines the intellectual dissident movements in Poland, Czechoslovakia and Hungary from the late 1960s through to 1989. In spite of its historic significance, no other comprehensive survey has appeared on the subject. In addition to the huge list of written sources from samizdat works to recent essays, Falk's sources include interviews with many personalities of those events as well as videos and films (including Oscar winners).

The European Court and National Courts Anne Marie Slaughter
1998-03-01 The essays comprising this volume are the outcome of a major and unique project which looks in detail at the application of EC law by national courts and the interaction of the demands of EC law with the constraints imposed by national legal orders and, especially, national constitutional orders. The volume comprises seven country studies which are shaped around a common research protocol. These are supplemented by three cross-cutting studies which draw on the country studies as well as on broader contextual research work aimed at trying to understand the role of the European Court of Justice in the round. The results of this multi-national research are certain to provoke widespread interest among scholars of European law, international law and European

politics, for they offer the first systematic and rigorous attempt to assess the impact of the ECJ among the leading member states of the European Union.

Sovereignty in Transition Neil Walker 2003-11-28 Sovereignty in Transition brings together a group of leading scholars from law and cognate disciplines to assess contemporary developments in the framework of ideas and the variety of institutional forms associated with the concept of sovereignty. Sovereignty has been described as the main organising concept of the international society of states - one which is traditionally central to the discipline and practice of both constitutional law and of international law. The volume asks to what extent, and with what implications, this centrality is challenged by contemporary developments that shift authority away from the state to new sub-state, supra-state and non-state forms. A particular focus of attention is the European Union, and the relationship between the sovereignty traditions of various member states on the one hand and the new claims to authority made on behalf of the European Union itself on the other are examined. The collection also includes contributions from international law, legal philosophy, legal history, political theory, political science, international relations and theology that seek to examine the state of the sovereignty debate in these disciplines in ways that throw light on the focal constitutional debate in the European Union.

The Sound of Indo-European Benedicte Nielsen Whitehead 2012 This contribution in this volume discuss a large variety of issues from the realm of Indo-European phonology in its broadest definition, stretching from minute phonetic to more abstract levels of phonemics and morphophonemics and centering upon all varieties of Indo-European, including the protolanguage and its recent pre-stages and, in effect, all of its post-stages till this day.

Central Europe Since 1945 Paul G. Lewis 2014-01-14 Central Europe - here, Poland, the German Democratic Republic, Czechoslovakia and Hungary - is at the centre of international attention since the Soviet collapse. An understanding of its postwar history is critical to an appreciation of the challenges facing its present rulers. This is an engrossing account of the installation, development, operation and eventual downfall of its (very different) communist regimes, and the transition to the freedoms and uncertainties of the post-Soviet world. The book covers political, economic, social and cultural change, emphasising the crucial relationships with the USSR throughout.
