**Humanitarian Military Intervention** Taylor B. Seybolt 2007 Military intervention in a conflict without a reasonable prospect of success is unjustifiable, especially when it is done in the

name of humanity. Couched in the debate on the responsibility to protect civilians from violence and drawing on traditional 'just war' principles, the central premise of this book is that humanitarian military intervention can be

justified as a policy option only if decision makers can be reasonably sure that intervention will do more good than harm. This book asks, 'Have past humanitarian military interventions been successful?' It defines success as saving lives and sets out a methodology for estimating the number of lives saved by a particular military intervention. Analysis of 17 military operations in six conflict areas that were the defining cases of the 1990s-northern Iraq after the Gulf War, Somalia, Bosnia and Herzegovina, Rwanda, Kosovo and East Timor shows that the majority were successful by this measure. In every conflict studied, however, some military interventions succeeded while others failed, raising the question, 'Why have some past interventions been more successful than others?' This book argues that the central factors determining whether a humanitarian intervention succeeds are the objectives of the intervention and the military strategy employed by the intervening states. Four types of

humanitarian military intervention are offered: helping to deliver emergency aid, protecting aid operations, saving the victims of violence and defeating the perpetrators of violence. The focus on strategy within these four types allows an exploration of the political and military dimensions of humanitarian intervention and highlights the advantages and disadvantages of each of the four types. Humanitarian military intervention is controversial. Scepticism is always in order about the need to use military force because the consequences can be so dire. Yet it has become equally controversial not to intervene when a government subjects its citizens to massive violation of their basic human rights. This book recognizes the limits of humanitarian intervention but does not shy away from suggesting how military force can save lives in extreme circumstances.

Epistemologies of the South Boaventura de Sousa Santos 2015-11-17 This book explores the concept of 'cognitive injustice': the failure to recognise the different ways of knowing by which people across the globe run their lives and provide meaning to their existence. Boaventura de Sousa Santos shows why global social justice is not possible without global cognitive justice. Santos argues that Western domination has profoundly marginalised knowledge and wisdom

that had been in existence in the global South. She contends that today it is imperative to recover and valorize the epistemological diversity of the world. Epistemologies of the South outlines a new kind of bottom-up cosmopolitanism, in which conviviality, solidarity and life triumph against the logic of market-ridden greed and individualism.

**Social Linguistics and Literacies** James Paul Gee 1996 Gee (linguistics, U. of Southern California when the 1990 first edition came out) argues that an appreciation of language in its social context requires a focus not on language alone but also on the set of behavior and expectations, linguistic and otherwise, relating

to a particular role among a particular group of people. The second edition removes some of the technical language of the first, and is revised in light of reaction to it. Annotation copyrighted by Book News, Inc., Portland, OR

Hedonistic Utilitarianism Tannsjo Torbjorn Tannsjo 2019-08-08 This volume presents a comprehensive statement in defense of the doctrine known as classical, hedonistic utilitarianism. It is presented as a viable alternative in the search for a moral theory and the claim is defended that we need such a theory. The book offers a distinctive approach and some quite controversial conclusions. Torbjorn Tannsjo challenges the assumption that hedonistic utilitarianism is at variance with common sense morality particularly as viewed through the perspective of the modern feminist moral critique.

bureaucracy, and addressing the question of social work autonomy within organizations, this book discusses how dwindling resources have forced social work practice to become more results-oriented in a limited time frame.

*Qualitative Methods in International Relations A.* Klotz 2008-02-27 We still lack practical answers to one of the most basic questions in empirical research: How should researchers interpret meanings? The contributors take seriously the goals of both post-modernist and positivist researchers, as they offer detailed guidance on how to apply specific tools of analysis and how to circumvent their inherent limitations.

**Ecopolitics** Verena Andermatt Conley 2006-07-13 Ecopolitics is a study of environmental awareness - or non-awareness - in contemporary French theory. Arguing that it is now impossible not to think in an ecological way, Verena Andermatt Conley traces the roots of today's concern for the environment back to the intellectual climate of the late 50s and 60s. The

author considers key texts by influential figures such as Michael Serres, Paul Virilio, Gilles Deleuze and Felix Guattari, Michel de Certeau, Hélène Cixous and Luce Irigaray. Ecopolitics rehabilitates some ecological components of French intellectual thought of the past thirty years, and reassesses French poststructural thinkers who explicitly deal with ecology in their work.

### **Contemporary Models in Vocational**

**Psychology** Frederick Leong 2005-05-18 This volume, prepared in honor of Samuel H. Osipow, a prominent teacher, researcher, author, and pioneer in vocational psychology, deals with significant theoretical and practical issues in the field of vocational psychology. As a state-of-the-art review of contemporary models of vocational psychology, this book will provide current and up-to-date coverage of the topics. It will also contain in-depth reviews of models of vocational psychology by leading scholars, including career decision making models, career self-efficacy,

occupational stress, cross-cultural assessment of interests, and career counseling services within university systems. A major theme that runs throughout all chapters is the concept of change. This unifying theme is fitting since the authors have prepared their chapters in honor of Osipow, who has significantly changed the field over the last four decades. This volume should serve as a valuable resource for vocational psychology researchers, counseling graduate students, and career counselors. In addition to being a professional text, it should also be a useful supplement text for career development and career counseling courses in graduate programs of counseling, counseling psychology, and industrial/organizational psychology.

*From Neurons to Neighborhoods* National Research Council 2000-11-13 How we raise

young children is one of today's most highly personalized and sharply politicized issues, in part because each of us can claim some level of "expertise." The debate has intensified as discoveries about our development-in the womb and in the first months and years-have reached the popular media. How can we use our burgeoning knowledge to assure the well-being of all young children, for their own sake as well as for the sake of our nation? Drawing from new findings, this book presents important conclusions about nature-versus-nurture, the impact of being born into a working family, the effect of politics on programs for children, the costs and benefits of intervention, and other issues. The committee issues a series of challenges to decision makers regarding the quality of child care, issues of racial and ethnic diversity, the integration of children's cognitive and emotional development, and more. Authoritative yet accessible, *From Neurons to Neighborhoods* presents the evidence about

"brain wiring" and how kids learn to speak, think, and regulate their behavior. It examines the effect of the climate-family, child care, community-within which the child grows.

written, enacts social and cultural perspectives and identities. Assuming no prior knowledge of linguistics, *An Introduction to Discourse Analysis* examines the field and presents James Paul Gee's unique integrated approach which incorporates both a theory of language-in-use and a method of research. *An Introduction to Discourse Analysis* can be used as a stand-alone textbook or ideally used in conjunction with the practical companion title *How to do Discourse Analysis: A Toolkit*. *A Theory of Intergenerational Justice* Joerg Chet Tremmel 2009-12 This highly accessible book provides an extensive and comprehensive overview of current research and theory about why and how we should protect future generations. It exposes how and why the interests of people today and those of future generations are often in conflict and what can be done. It rebuts critical concepts such as Parfits' non-identity paradox and Beckerman's denial of any possibility of intergenerational justice. The

core of the book is the lucid application of a veil of ignorance to derive principles of intergenerational justice which show that our duties to posterity are stronger than is often supposed. Tremmel's approach demands that each generation both consider and improve the well-being of future generations. To measure the well-being of future generations Tremmel employs the Human Development Index rather than the metrics of utilitarian subjective happiness. The book thus answers in detailed, concrete terms the two most important questions of every theory of intergenerational justice: what to sustain? and how much to sustain?

### **The Meaning of Things** Mihaly

Csikszentmihalyi 1981-10-30 The meaning of things is a study of the significance of material possessions in contemporary urban life, and of the ways people carve meaning out of their domestic environment. Drawing on a survey of eighty families in Chicago who were interviewed

on the subject of their feelings about common household objects, Mihaly Csikszentmihalyi and Eugene Rochberg-Halton provide a unique perspective on materialism, American culture, and the self. They begin by reviewing what social scientists and philosophers have said about the transactions between people and things. In the model of 'personhood' that the authors develop, goal-directed action and the cultivation of meaning through signs assume central importance. They then relate theoretical issues to the results of their survey. An important finding is the distinction between objects valued for action and those valued for contemplation. The authors compare families who have warm emotional attachments to their homes with those in which a common set of positive meanings is lacking, and interpret the different patterns of involvement. They then trace the cultivation of meaning in case studies of four families. Finally, the authors address what they describe as the current crisis of

environmental and material exploitation, and suggest that human capacities for the creation and redirection of meaning offer the only hope for survival. A wide range of scholars - urban and family sociologists, clinical, developmental and environmental psychologists, cultural anthropologists and philosophers, and many general readers - will find this book stimulating and compelling.

### **The Psychology of the Language Learner**

Zoltán Dörnyei 2014-04-04 Research results over the past decades have consistently demonstrated that a key reason why many second language learners fail--while some learners do better with less effort--lies in various learner attributes such as personality traits, motivation, or language aptitude. In psychology, these attributes have traditionally been called "individual differences." The scope of individual learner differences is broad--ranging from creativity to learner styles and anxiety--yet there is no current, comprehensive, and unified volume that

provides an overview of the considerable amount of research conducted on various language learner differences, until now. Each chapter in this new volume focuses on a different individual difference variable. Besides a review of the relevant second language literature, Zoltán Dörnyei presents a concise overview of the psychological research involving each topic. A key concern for the author has been to define the various learner factors as measurable constructs and therefore the discussion includes a summary of the most famous tests and questionnaires in each domain. A wide range of readers will benefit from this book--students in linguistics, applied linguistics, modern languages, and psychology programs; second language teachers participating in in-service training courses; and researchers in second language acquisition and psychology.

**Studying Organization** Stewart R Clegg  
1999-04-29 In response to the needs of lecturers, the acclaimed Handbook of

Organization Studies has been made available as two major paperback textbooks. Studying Organization is an ideal textbook around which to build courses on organization theory and research methodology. Central to the enterprise has been a concern to reflect and honour the manifest diversity of the field, including recognition of the extent to which the very notion of a single field of organization studies is debated. Part One locates the study of organization by reviewing some of the most significant theoretical paradigms to have shaped our understanding. The second part reflects on the relationships between theory and research in organization studies.

*A History of Yugoslavia* Marie-Janine Calic

2019-02-15 Why did Yugoslavia fall apart? Was its violent demise inevitable? Did its population simply fall victim to the lure of nationalism? How did this multinational state survive for so long, and where do we situate the short life of

Yugoslavia in the long history of Europe in the twentieth century? A History of Yugoslavia provides a concise, accessible, comprehensive synthesis of the political, cultural, social, and economic life of Yugoslavia—from its nineteenth-century South Slavic origins to the bloody demise of the multinational state of Yugoslavia in the 1990s. Calic takes a fresh and innovative look at the colorful, multifaceted, and complex history of Yugoslavia, emphasizing major social, economic, and intellectual changes from the turn of the twentieth century and the transition to modern industrialized mass society. She traces the origins of ethnic, religious, and cultural divisions, applying the latest social science approaches, and drawing on the breadth of recent state-of-the-art literature, to present a balanced interpretation of events that takes into account the differing perceptions and interests of the actors involved. Uniquely, Calic frames the history of Yugoslavia for readers as an essentially open-ended process, undertaken from

a variety of different regional perspectives with varied composite agenda. She shuns traditional, deterministic explanations that notorious Balkan hatreds or any other kind of exceptionalism are to blame for Yugoslavia's demise, and along the way she highlights the agency of twentieth-century modern mass society in the politicization of differences. While analyzing nuanced political and social-economic processes, Calic describes the experiences and emotions of ordinary people in a vivid way. As a result, her groundbreaking work provides scholars and learned readers alike with an accessible, trenchant, and authoritative introduction to Yugoslavia's complex history.

Attachment-Informed Grief Therapy Phyllis S. Kosminsky 2016-04-14 Attachment-Informed Grief Therapy bridges the fields of attachment studies and thanatology, uniting theory, research, and practice to enrich our understanding of how and why people grieve and how we can help the bereaved. In its pages, clinicians and students will gain a new understanding of the etiology of complicated grief and its treatment and will become better equipped to formulate accurate and specific case conceptualization and treatment plans. The authors also illustrate the ways in which the therapeutic relationship is a crucially important—though largely

unrecognized—element in grief therapy, and offer guidelines for an attachment informed view of the therapeutic relationship that can serve as the foundation of all grief therapy.

**Sylvia Wynter** Katherine McKittrick 2014-12-08 The Jamaican writer and cultural theorist Sylvia Wynter is best known for her diverse writings that pull together insights from theories in history, literature, science, and black studies, to explore race, the legacy of colonialism, and representations of humanness. Sylvia Wynter: On Being Human as Praxis is a critical genealogy of Wynter's work, highlighting her insights on how race, location, and time together inform what it means to be human. The contributors explore Wynter's stunning reconceptualization of the human in relation to concepts of blackness, modernity, urban space, the Caribbean, science studies, migratory politics, and the interconnectedness of creative

and theoretical resistances. The collection includes an extensive conversation between Sylvia Wynter and Katherine McKittrick that delineates Wynter's engagement with writers such as Frantz Fanon, W. E. B. DuBois, and Aimé Césaire, among others; the interview also reveals the ever-extending range and power of Wynter's intellectual project, and elucidates her attempts to rehistoricize humanness as praxis.
