**Writing and Rhetoric Book 1: Fable** Fable Stu Ed 2013-08-15 The *Writing & Rhetoric* series method employs fluent reading, careful listening, models for imitation, and progressive steps. It assumes that students learn the best by reading excellent, whole-story examples of literature and by growing their skills through imitation. Each exercise is intended to impart a skill (or tool) that can be employed in all kinds of writing and speaking. The exercises are arranged from simple to more complex. What's more, the exercises are cumulative, meaning that later exercises incorporate the skills acquired preceding exercises. This series is a step-by-step apprenticeship in the art of writing and rhetoric. *Fable*, the first book in the *Writing & Rhetoric* series, teaches students the practice of close reading and comprehension, summarizing a story aloud and in writing, and amplification of a story through description and dialogue. Students learn how to identify different kinds of stories; determine the beginning, middle, and end of stories; recognize point of view; and see analogous situations, among other essential tools. The *Writing & Rhetoric* series recovers a proven method of teaching writing, using fables to teach beginning writers the craft of writing well.

**The Routledge Handbook of Digital Writing and Rhetoric** Jonathan Alexander 2018-04-27 This handbook brings together scholars from around the globe who here contribute to our understanding of how digital rhetoric is changing the landscape of writing. Increasingly, all of us must navigate networks of information, compose not just with computers but an array of mobile devices, increase our technological literacy, and understand the changing dynamics of authoring, writing, reading, and publishing in a world of rich and complex texts. Given such changes, and given the diverse ways in which younger generations of college students are writing, communicating, and designing texts in multimediated, electronic environments, we need to consider how the very act of writing itself is undergoing potentially fundamental changes. These changes are being addressed increasingly by the emerging field of digital rhetoric, a field that attempts to understand the rhetorical possibilities and affordances of writing, broadly defined, in a wide array of digital environments. Of interest to both researchers and students, this volume provides insights about the fields of rhetoric, writing, composition, digital media, literature, and multimodal studies.

The book provides students with an introduction to the diversity, complexity and connectedness of writing in higher education today. Part I, a short Guide to Academic Writing, teaches rhetorical strategies and approaches to academic writing within and across the major divisions of the academy.
