The Fifth Sun Burr Cartwright Brundage
1983-08-01 The ancient Aztecs dwelt at the center of a dazzling and complex cosmos. From this position they were acutely receptive to the demands of their gods. The Fifth Sun represents

a dramatic overview of the Aztec conception of the universe and the gods who populated it—Quetzalcoatl, the Plumed Serpent; Tezcatlipoca, the Smoking Mirror; and Huitzilopochtli, the Southern Hummingbird. Burr Cartwright Brundage explores the myths behind these and others in the Aztec pantheon in a way that illuminates both the human and the divine in Aztec life. The cult of human sacrifice is a pervasive theme in this study. It is a concept that permeated Aztec mythology and was the central preoccupation of the aggressive Aztec state. Another particularly interesting belief explored here is the "mask pool," whereby gods could exchange regalia and, thus, identities. This vivid and eminently readable study also covers the use of hallucinogens; cannibalism; the calendars of ancient Mexico; tlachtli, the life-and-death ball game; the flower wars; divine transfiguration; and the evolution of the war god of the Mexica. A splendid introduction to Aztec religion, *The Fifth Sun* also contains insights for specialists in ethnohistory, mythology, and religion.

Skywatchers Anthony F. Aveni 2001-08-15
Skywatchers of Ancient Mexico helped establish the field of archaeoastronomy, and it remains the standard introduction to this subject. Combining basic astronomy with archaeological and ethnological data, it presented a readable and entertaining synthesis of all that was known

of ancient astronomy in the western hemisphere as of 1980. In this revised edition, Anthony Aveni draws on his own and others' discoveries of the past twenty years to bring the Skywatchers story up to the present. He offers new data and interpretations in many areas, including: The study of Mesoamerican time and calendrical systems and their unprecedented continuity in contemporary Mesoamerican culture The connections between Precolumbian religion, astrology, and scientific, quantitative astronomy The relationship between Highland Mexico and the world of the Maya and the state of Pan-American scientific practices The use of personal computer software for computing astronomical data With this updated information, Skywatchers will serve a new generation of general and scholarly readers and will be useful in courses on archaeoastronomy, astronomy, history of astronomy, history of science, anthropology, archaeology, and world religions.

Iconographic Exegesis and Third Isaiah Izaak Jozias Hulster 2009 Although scholars employ pictorial material in biblical exegesis, the question of how images from the Ancient Near East can contribute to a better understanding of the Bible has been left unanswered. This is the first monograph to outline a historical method for iconographic exegesis. The methodological study includes both responses to important theoretical questions such as What is an image? and What is culture? and an interdisciplinary exploration of issues of history, art history, archaeology and cultural anthropology. The three-stage method proposed is embedded in hermeneutical and exegetical reflections. The application of iconographical exegesis to the interpretation of metaphors is also considered. In demonstrating the method and its application, Izaak J. de Hulster focuses on Third Isaiah and develops three iconographical exegetical studies on yad in Isaiah 56:5, light in Isaiah 60 and grape processing in Isaiah 63.

Apocalyptic Anxiety Anthony Aveni 2016-05-02 *Apocalyptic Anxiety* traces the sources of American culture's obsession with predicting and preparing for the apocalypse. Author Anthony Aveni explores why Americans take millennial claims seriously, where and how end-of-the-world predictions emerge, how they develop within a broader historical framework, and what we can learn from doomsday predictions of the past. The book begins with the Millerites, the nineteenth-century religious sect of Pastor William Miller, who used biblical calculations to predict October 22, 1844 as the date for the Second Advent of Christ. Aveni also examines several other religious and philosophical movements that have centered on apocalyptic themes—Christian millennialism, the New Age movement and the Age of Aquarius, and various other nineteenth- and early twentieth-century religious sects, concluding with a focus on the Maya mystery of 2012 and the contemporary prophets who connected the end of the world as we know it with the overturning of the Maya calendar. *Apocalyptic Anxiety* places these seemingly never-ending stories of the world's end in the context of American history. This fascinating exploration of the deep historical and cultural roots of America's voracious appetite for apocalypse will appeal to students of American history and the histories of religion and science, as well as lay readers interested in American culture and doomsday prophecies.

The Greenwood Encyclopedia of Global Medieval Life and Culture [3 volumes] Joyce E. Salisbury 2008-12-30 The period we know as the Middle Ages, roughly the years 400-1400,

saw the formation of ideas and institutions that mark modern societies. Developments as disparate as the foundation of Islam and the emergence of the middle class occurred during this pivotal millennium. Although historical study of the Middle Ages has traditionally focused on Western Europe, modern historians recognize the complex global nature of this era. For all major world regions, this three-volume work offers in-depth essays on broad themes, short entries on specific topics, and carefully selected primary documents to help readers more fully understand this critically important period. Edited by Joyce Salisbury, who is general editor of the award-winning Greenwood Encyclopedia of Daily Life, and written by Professor Salisbury and a series of prominent historians with regional expertise, Greenwood Encyclopedia of Global Medieval Life and Culture comprises three volumes covering the following areas of the globe: Volume 1: Europe and the Americas Volume 2: Islam and Africa Volume 3: Asia and Oceania Each regional section comprises seven in-depth essays covering the following broad topics and concluding with bibliographies of important and current information resources: Historical Overview of the Region, Religion, Economy, The Arts, Society, Science and Technology, and Global Ties. The Global Ties essays trace the political, social, economic, religious, technological, or commercial connections that existed between the region under discussion and any other world regions during the Middle Ages. Each regional section also includes a series of brief entries covering people, events, developments, and concepts mentioned in the in-depth essays. Examples of entry topics include the following: Berbers, Emperor Harsha, Ethiopian Christianity, Flowery Warfare, Footbinding, Hildegard of Bingen, Jainism, Jihad, Maya Collapse, Neo-Confucianism, Romanesque, and Sharia. A series of sidebars in each section will provide lists, graphs, charts, and other useful data relating to the region. Each section will also be illustrated and will include a selection of interesting primary documents that further illustrate the main themes addressed in the in-depth essays. Cross-references within the sections and a detailed subject index will also help readers access information in the essays

and short entries.

Encyclopedia of Cosmology (Routledge Revivals)
Norriss S. Hetherington 2014-04-08 The Encyclopedia of Cosmology, first published in 1993, recounts the history, philosophical assumptions, methodological ambiguities, and human struggles that have influenced the various responses to the basic questions of cosmology through the ages, as well as referencing important scientific theories. Just as the recognition of social conventions in other cultures can lead to a more productive perspective on our own behaviour, so too a study of the cosmologies of other times and places can enable us recognise elements of our own cosmology that might otherwise pass as inevitable developments. Apart from modern natural science, therefore, this volume incorporates brief treatments of Native American, Cave-Dweller, Chinese, Egyptian, Islamic, Megalithic, Mesopotamian, Greek, Medieval and Copernican cosmology, leading to an appreciation of cosmology as an intellectual creation, not merely a collection of facts. It is a valuable reference tool for any student or academic with an interest in the history of science and cosmology specifically.
