More Than You Wanted to Know Omri Ben-Shahar 2014-04-20 How mandated disclosure took over the regulatory landscape—and why it failed Perhaps no kind of regulation is more common or less useful than mandated disclosure—requiring one party to a transaction to give the other information. It is the iTunes terms you assent to, the doctor's consent form you sign, the pile of papers you get with your mortgage. Reading the terms, the form, and the papers is supposed to equip you to choose your purchase, your treatment, and your loan well. More Than You Wanted to Know surveys the evidence and finds that mandated disclosure rarely works. But how could it? Who reads these disclosures? Who understands them? Who uses them to make better choices? Omri Ben-Shahar and Carl Schneider put the regulatory problem in human terms. Most people find disclosures complex, obscure, and dull. Most people make choices by stripping information away, not layering it on. Most people find they can safely ignore most disclosures and that they lack the literacy to analyze them anyway. And so many disclosures are mandated that nobody could heed them all. Nor can all this be changed by simpler forms in plainer English, since complex things cannot be made simple by better writing. Furthermore, disclosure is a lawmakers' panacea, so they keep issuing new mandates and expanding old ones,

often instead of taking on the hard work of writing regulations with bite. Timely and provocative, *More Than You Wanted to Know* takes on the form of regulation we encounter daily and asks why we must encounter it at all.

Protecting and Promoting the Health of NFL Players Christopher R. Deubert 2016-11-17 This comprehensive report, published as part of the Football Players Health Study at Harvard University, more than two years in the making and 493 pages long, is an unprecedented step towards improving player health, concluding with several important recommendations. To date, there has been no analysis of the universe of stakeholders that may influence the health of NFL players, nor any systematic analysis of their existing or appropriate legal and/or ethical obligations. While clinical health care interventions are essential, player health also depends on understanding the wider context in which players work. The report examines 20 diverse stakeholders: NFL players, the NFL, the NFLPA, NFL club medical staff, second opinion, neutral and personal doctors, NFL clubs and personnel, NFL coaches, contract advisors, financial advisors, equipment managers and manufacturers, players' family members, officials, the media, NFL business partners, and fans. In total, the report makes 76 recommendations. Highlights of the key proposals are summarized below: * Conflicts of interest: The current arrangement under which a team's medical staff, including doctors and athletic trainers, have responsibility both to the players and to the club presents an inherent structural conflict of interest. A division of responsibilities between two distinct groups of medical professionals is needed to minimize such conflict and ensure that players receive medical care that is as unbiased and uninfluenced by competing interests as possible. Care and treatment should be provided by one set of medical professionals, called the "Players' Medical Staff," appointed by a joint committee with representation from both the NFL and NFLPA. The evaluation of players for business purposes should be conducted by a separate set of medical personnel, known as the "Club Evaluation Doctors." * Player health and adversarial collective bargaining: The NFL

and NFLPA should refrain from making improvements to player health policies a "bargaining chip" in labor negotiations, to the extent that this is not already the case. Players should never be asked to trade their healthcare for other benefits in the collective bargaining process. * Ethical guidelines: Various stakeholders - including club doctors, athletic trainers, coaches, contract advisors, and financial advisors - should adopt, improve and enforce Codes of Ethics specific to the environment of the NFL.* Ongoing research into the health effects of the game: The NFL and NFLPA should continue to initiate and support efforts to scientifically and reliably identify the health risks and benefits of playing professional football. * Access to data: The NFL and, to the extent possible the NFLPA, should make aggregate, de-identified injury data publicly available for independent reanalysis. They should also continue to improve their robust collection of data and offer it to qualified professionals for analysis. * Meaningful penalties: The collective bargaining agreement (CBA) should be amended to impose meaningful fines for any club or person found to have violated Sections 1 through 6 of Article 39 of the 2011 CBA (players' rights to medical care and treatment). * Investing in players' health and care: The NFLPA should consider investing greater resources to investigate and enforce player health issues and enforce player rights, including Article 39 of the CBA. Published alongside the report are a list of the Top 10 Recommendations in the report (also included in the Executive Summary at the beginning of the report), and A Patient Bill of Rights for NFL Players - including current and proposed rights under the CBA, NFL policy, law and/or codes of ethics (which can be found on the Football Players Health Study at Harvard University website).
