COMPSTAT 2000 is jointly organised by the Department of Methodology and Statistics of the Faculty of Social Sciences of Utrecht University, and Statistics Netherlands. It is taking place from 21-25 August 2000 at Utrecht University. Previous COMPSTATs (from 1974-1998) were in Vienna, Berlin, Leiden, Edinburgh, Toulouse, Prague, Rome, Copenhagen, Dubrovnik, Neuchatel, Vienna,

Statistical Techniques In Business And Economics With Student Cd Rom Mandatory Package

Barcelona and Bristol. The conference is the main European forum for developments at the interface between statistics and computing. This was encapsulated as follows on the COMPSTAT 2000 homepage <http://neon.vb.cbs.nl/irsmlcompstat>. Statistical computing provides the link between statistical theory and applied statistics. As at previous COMPSTATs, the scientific programme will range over all aspects of this link, from the development and implementation of new statistical ideas through to user experiences and software evaluation. The programme should appeal to anyone working in statistics and using computers, whether in universities, industrial companies, research institutes or as software developers. At COMPSTAT 2000 there is a special interest in the interplay with official statistics. This is evident from papers in the area of computerised data collection, survey methodology, treatment of missing data, and the like.

Information Sources on Islamic Banking

and Economics S Ali Nazim 2013-05-13 Islamic banking and economics (IBE) is a fast-growing subject of vital interest in both East and West as Muslims change their attitudes towards investments and find ways to invest their funds according to the Islamic faith. Along with the rapid developments in Islamic banking there has been a concomitant increase in the quantity of relevant IBE material generated. Since IBE is a highly specialized cross-disciplinary field involving economics, business, marketing, religion, philosophy and culture, it is difficult for researchers to locate and obtain information without having to go through several secondary sources such as indexing and abstracting services. In this electronic age, it is essential for researchers to be aware of the various forms of information available for consultation. Yet, until now, the few previous works on IBE information

sources have been limited to the coverage of materials available during the early 1980s, before the most recent period of expansion, and in addition the materials cited were often unpublished and therefore unobtainable. In answer to a long-felt need, "Information Sources on Islamic Banking and Economics" provides a detailed bibliography of IBE sources concentrating on the period 1980-1990 with some data from 1991 and 1992, and with the additional unique feature of setting out, for the first time, the information infrastructure of the IBE discipline. A comprehensive author index and a keyword subject index for important terms are provided, and only published - and therefore easily obtainable - items have been included. This book is essential reading for all researchers, economists, bankers and others who need information on the increasingly important field of Islamic banking and economics, and related areas.

topics are presented in a precise and clear style supported with solved examples, numbered formulae, graphic illustrations, and "Notes" to provide depth and statistical accuracy and precision. Applications used within the text and the hallmark problems, exercises, and projects are drawn from virtually all disciplines and fields providing motivation for students in virtually any college.
