**Trains to Victory** Donald J. Heimburger 2009-07-01 Trains to Victory tells the dramatic story of the years 1941-1945 when U.S. railroads, using fewer cars and locomotives than in WWI, moved more tonnage and more passengers than ever before. Divided into 13 chapters, plus a 32-page four-color section, an introduction, bibliography and a complete index, the volume appeals to railfans, historians, military historians, and many others. The 380-page hardbound book features 542 photographs, an additional 285 illustrations, a four-color laminated dustjacket and a complete listing of U.S. military camps, posts and bases as of August 1, 1941. The book discusses the implications of the war on the railroads, embarkation of troops and materiel, how the Military Railway Service joined the fight and what was happening on U.S railroads during the war. It also addresses new railroad cars and locomotives built for the war, military camp railroads, how Alaska's railroads played a part in the conflict, how women helped the war effort, and what was happening in foreign theaters. It describes how railroads aided in the return of wounded troops and equipment, and the atmosphere on the railroads immediately after the war. Scale drawings of war-emergency box cars are also included, as are troop train car plans. Trains to Victory covers such topics as the huge Chicago & NorthWestern Proviso Yards during wartime, personal glimpses of the war from a number of railroaders and intriguing aspects of the war from the Army Engineers, Association of American Railroads and the War Department. Wartime products of locomotive and railroad car manufacturers such as Baldwin, Alco, Davenport, Lima, Whitcomb, Budd, Electro-Motive, H.K. Porter, Pullman, American Car & Foundry and the St. Louis Car Company are documented throughout the volume. Hardbound, 8½ x11", 380 pages, 825 photos and illustrations, 32-page all-color photo section, 13 chapters, extensive historical military/railroad documentation.

**Getting the message through: A Branch History of the U.S. Army Signal Corps** Rebecca Robbins Raines 1996 Getting the Message Through, the companion volume to Rebecca Robbins Raines' Signal Corps, traces the evolution of the corps from the appointment of the first signal officer on the eve of the Civil War, through its stages of growth and change, to its service in Operation DESERT SHIELD/DESERT STORM. Raines highlights not only the increasingly specialized nature of warfare and the rise of sophisticated communications technology, but also such diverse missions as weather reporting and military aviation. Information dominance in the form of superior communications is considered to be sine qua non to modern warfare. As Raines ably shows, the Signal Corps--once considered by some Army officers to be of little or no military value--and the communications it provides have become integral to all aspects of military operations on modern digitized battlefields. The volume is an invaluable reference source for anyone interested in the institutional history of the branch.

**Spearhead of Logistics** Benjamin King 2016-02-25 Spearhead of Logistics is a narrative branch history of the U.S. Army's Transportation Corps, first published in 1994 for transportation personnel and reprinted in 2001 for the larger Army community. The Quartermaster Department coordinated transportation support for the Army until World War I revealed the need for a dedicated corps of specialists. The newly established Transportation Corps, however, lasted for only a few years. Its significant utility for coordinating military transportation became again transparent during World War II, and it was resurrected in mid-1942 to meet the unparalleled logistical demands of fighting in distant theaters. Finally becoming a permanent branch in 1950, the Transportation Corps continued to demonstrate its capability of rapidly supporting U.S. Army operations in global theaters over the next fifty years. With useful lessons of high-quality support that validate the

necessity of adequate transportation in a viable national defense posture, it is an important resource for those now involved in military transportation and movement for ongoing expeditionary operations. This text should be useful to both officers and noncommissioned officers who can take examples from the past and apply the successful principles to future operations, thus ensuring a continuing legacy of Transportation excellence within Army operations. Additionally, military science students and military historians may be interested in this volume.
