Take Me Fishing John Bryan 2007-05-17 Here is great angling writing from the best writers in the business—from Tom McGuane to John McPhee to Lefty Kreh. With proceeds going to FishAmerica, to help keep waters and fish healthy, and the Future Fisherman Foundation for education programs for children, these articles include Joan Wulff's look at the stages in an angler's lifetime; John McPhee's passage on our country's "Founding Fish"—the American Shad; Dave Barry's not-so-reverent take on fishing; Dave DiBenedetto on migrating stripers; Monte Burke on record bass; President Jimmy Carter on his youth; and Ted Williams on the environment. And there are many more, every one a joy to read.

Guns, Germs, and Steel: The Fates of Human Societies Jared Diamond 1999-04-17 "Fascinating....

Lays a foundation for understanding human history."—Bill Gates In this "artful, informative, and delightful" (William H. McNeill, *New York Review of Books*) book, Jared Diamond convincingly argues that geographical and environmental factors shaped the modern world. Societies that had had a head start in food production advanced beyond the hunter-gatherer stage, and then developed religion --as well as nasty germs and potent weapons of war --and adventured on sea and land to conquer and decimate preliterate cultures. A major advance in our understanding of human societies, *Guns, Germs, and Steel* chronicles the way that the modern world came to be and stunningly dismantles racially based theories of human history. Winner of the Pulitzer Prize, the Phi Beta Kappa Award in Science, the Rhone-Poulenc Prize, and the Commonwealth club of California's Gold Medal.

Unspeakable Horror Joseph B. Healy 2017-08-01 The story of the USS Indianapolis is well-known. After delivering crucial components of the atomic bomb that would level Hiroshima in 1945, the Indianapolis was sunk by a Japanese submarine in the South China Sea. Of the nearly 1,200 men aboard, 900 survived the torpedoing, spilling into the sea. White tip sharks began attacking the next morning and after four days only 300 sailors were alive to rescue. Less famous are the many stories of ships sinking in shark-infested waters with gruesome results. Such as the Cape San Juan, a US troop transport ship that was torpedoed by a Japanese submarine in the Pacific Ocean near the Fiji Islands; nearly 700 of the survivors were killed by sharks. Or the HMS Birkenhead, which sunk off Danger Point, South Africa, in 1852, resulting in 440 shark-related fatalities. In 1927, the luxury Italian cruise liner Principessa Maldafa sank ninety miles off the coast of Albrohos Island while heading to Porto Seguro, Brazil. Nearly 300 who survived the wreck were killed by sharks. In 1909, the French steamer La Seyne collided with British India Steamship Co. liner Onda near Singapore, twenty-six miles from land. One hundred and one people were eventually killed by sharks. In the water, human intelligence is no match for a shark's brutal, destructive instincts. Sharks are born to kill and eat: They detect distress, smell blood—and attack. Marine disasters such as those above result in humans becoming prey, floating in inner space as shadowy sharks swim below, ready to attack. Helpless to save yourself—floating and waiting, watching the malevolent creatures circle, knowing what will happen . . . a sudden swirl of water, a cloud of blood, the searing pain . . . until there is no more. This is unspeakable horror

A Sea Monster's Tale Colin Speedie 2021-06-08 There are few marine creatures as spectacular as the Basking Shark. At up to 11 metres in length and seven tonnes in weight, this colossal, plankton-feeding fish is one of the largest in the world, second only to the whale shark. Historically, Basking Sharks were a familiar sight in the northern hemisphere - off the coasts of Norway, Scotland, Ireland, Canada and the USA, for example. In an 18th Century world without electricity, they became the focus of active hunting for their huge livers containing large amounts of valuable oil, primarily used in lamps. Catch numbers were small enough to leave populations largely intact, but during the 20th Century a new breed of hunter joined the fray, some driven as much by a need for adventure as for financial gain. With improved equipment and experience, they exploited the shark on an industrial scale that drastically reduced numbers, leading to localised near-extinction in some areas. From the 1970's onward a new generation took to the seas, this time with conservation in mind to identify where the shark might still be found in the waters around the British Isles, employing new technologies to solve long-standing mysteries about the behaviour of this elusive creature. Using the best of both old and new research techniques, the case was built to justify the

species becoming one of the most protected sharks in the oceans. Today, the Basking Shark is a much-loved cornerstone of our natural heritage. There are positive signs that the population has stabilised and may even be slowly recovering from the damage of the past, proving that timely conservation measures can be effective. Join us on a journey amidst wild seas, places, people and conservation history in the battle to protect this iconic creature - a true sea monster's tale.

When Bears Attack Joseph B. Healy 2016-08-02 A great collection of bear attack true stories for hikers, hunters, and all who venture into the outdoors. Bears are one of nature's apex predators, gentle and fuzzy to watch from a distance, fierce and unpredictable when aroused—and then it's too late for humans to escape a dangerous, fearsome, or fatal encounter. In this collection, we gather the most thrilling and frightening bear-attack stories of the past few decades. Grizzlies, brown bears, black bears—and their unfortunate encounters with humans. This is what happens—When Bears Attack. Joseph B. Healy takes a closer look at some of the notable bear attacks of recent history in order to determine their causes, evaluate what happened, and appreciate the raw power—and danger—of mother nature. He tells tales of hikers enjoying weekend camping trips as well as workers going about their daily routines. Follow along as the victims' lives are disrupted by bears, and see how survivors were forced to think and act in the moment to stay alive. As modern life continues to encroach on the wilderness, encounters between bears and humans will only increase. Learn about the outcome of these feral clashes in When Bears Attack.

The Wild West Michael Wallis 2011-05-27 An extensively illustrated day-by-day adventure that tells the stories of pioneers and cowboys, gold rushes, and saloon shoot-outs on America's frontier. Beginning in the nineteenth century, the lure of land rich in minerals, fertile for farming, and plentiful with buffalo bred an all-out obsession with heading westward. The Wild West: 365 Days takes you back to these booming frontier towns that became the stuff of American legend, breeding characters such as Butch Cassidy and Jesse James. Prize-winning journalist and historian Michael Wallis spins a colorful narrative, separating myth from fact, in 365 vignettes. Learn the stories of Davy Crockett, Wild Bill Hickok, and Annie Oakley; travel to the O.K. Corral and Dodge City; ride with the Pony Express; and witness the invention of the Colt revolver. Included throughout are images drawn from Robert G. McCubbin's extensive collection of Western memorabilia, encompassing rare books, photographs, ephemera, and artifacts, including Billy the Kid's knife.

By the Cut of Your Clothes Dusty Richards Spur Award-Winning Author, winner of the 2007 Spur Award for Best Original Paperback Novel for *The Horse Creek Incident*. Miss Stout Rice and Mr. Locke McTavish make an unlikely couple—but one hell of a team. The West proves wild from the get-go for gentleman farmer Locke McTavish, late of Illinois. Just off the train in Flagstaff, he steps right into a full-scale dustup. The tenderfoot with quick fists wins the brawl—but not before he loses his heart to lovely Stout Rice. She's

as skilled a rider and roper as any seasoned cowhand, while a damned sight more pleasing to behold. And though Stout chuckles at McTavish's yen to set up in ranching, she agrees to give the slick-talking dandy a push in the right direction. The wagon ride to North Cut—where the Rice sisters tend their daddy's ranch—turns into a mighty tug-of-war between the mismatched duo. While Locke labors to court the feisty Stout, she busies herself trying to turn him into a competent frontiersman. Before walking arm-in-arm, though, they'll battle back-to-back against marauding Apaches and a pair of murderous outlaws with sore heads and itchy trigger fingers. Seems that when push comes to shove, it takes more than love to conquer all.... "Dusty's drawl humor makes his westerns larruping-good reads." —Suzann Ledbetter, Author of *The Toast Always Lands Jelly-Side Down*
